Castlevania: Aria from Sorrow is an action role playing game for the Game Boy Advance. Aria van Grief brings us back to the Action-RPG stylings that started in SOTN. You play as Soma Cruz, someone who leads to Dracula's Castle and finds out that he has the ability to control the powers of demons. Not only do you have an equipment system allowing you to get new weapons, armor and so, but you also have the soul system. This system allows you to get the powers of all the different demons you will fight in Dracula's Castle. There are four types of souls you can get: Bullet Type (those who give you a sub-weapon like ability, cost small amount of MP), Guardian Type (those who appeal to the demon itself to give you an ability cost a lot of MP), Support Type (those who only contribute to your statistics or give you an ability but don't cost MP and are always active) and Ability (those who contribute only to your statistics or don't cost you MP and are always active) and Ability , like Double Jumping). Part Tweet This is a hack that raises the characters in Seiken Densetsu 3. This gives them better color palettes, sprites and menu photos. Here's a list of changes, taken from Tenchi's website: Graphic Improvements: Angela now wears a bikini Angela now has much better eyes and real eye colors instead of simple black dots as before. Lise has now also improved eyes and real eye colours! Color Improvements: All classes of all six characters!
