## Android games apk hack

End of line! Open world games are interesting. Players have the whole world of the game at hand. They can explore, make history, do side searches and usually walk around the world in the game the way they like. Grand Theft Auto III revolutionized the genre and one of the world's most popular games, Minecraft, is also an open world. You can find open world mechanic shooters, RPG, adventure games, and all sorts of other genres. This means that you have a lot to choose from. Here are the best open world games for Android.**Read more:**ARK: Survival Evolved**Price:** Free to play / \$4.99 per month / \$39.99 per yearARK: Survival Evolved is an open world adventure game with survival and other game elements. Players try to survive a landscape prevalent with dinosaur life. You can create a base, tame various dinosaurs for your own use, craft items and build things. There is also a social element. You can play with (or against) other players and even join Tribes for more collaborative play. The game is free to play with an optional subscription. Subscriptions provide double experience points and connections to better servers. Honestly, you really don't need to enjoy the game. Baldur's Gate: Enhanced Edition**Price:** \$9.99 with in-app purchasesBaldur's Gate: Enhanced Edition is a popular open-world RPG port since the early 2000s. It has a long, complex line of history, along with a vast world that you can explore in your spare time. It's a faithful recreation of the original and plays as the original sans touch screen control. We recommend this on larger screens because the user interface may be a little cluttered. Otherwise, it's an outstanding RPG experience. There are in-app purchases, but the only thing you can buy is voice packages for your character. The game also includes all DLLs from the original. The game has not seen an update since 2018, but developers from this time of writing are working on a rather large patch. Crashlands**Price:** \$6.99Crashlands is one of the really very open world games on mobile phone. This is an adventure game with RPG elements. Players end up trapped on the planet and have to get packages they promised to deliver. There are more than 500 items of craft, a big world to explore, and players can even build bases and tame creatures. In addition, the game includes cloud saving and multi-platform support. This one can sink your teeth and play for a very long time. Also for free if you're using Google Play Games.**Don't Starve (two games)****Price:** \$4.99 each**Don't Starve: Pocket Edition** and **Don't Starve: Shattered** are two great open world survival games. You get dropped into an alien world where you have to make ends meet on your own. It features a classic survival theme with some modern twists. There are things to collect, and build while you explore the world of the game. The game is also several biomes and seasons. The only real drawback is control. Touchscreen controllers are a bit iffy, but it does play a much better controller. **Gangster Vegas: World of Crime****Price:** Free to play**Gangster Vegas: World of Crime** is one of the oldest open world games for android. It is a reef of the popular Grand Theft Auto franchise. The player is dropped into the city and can cross the city will while completing story line missions and side quests. There are also many mini-games, such as casinos, racing challenges, collectibles and other things to keep the player busy. It pales in comparison to the sheer size and depth of a console or PC game like Grand Theft Auto 5, but it's a useful replacement and a good open world adventure game with shooter elements. Try these through:**Genshin Impact****Price:** Free to play**Genshin Impact** is one of the newer mobile open world games. It's very reminiscent of Zelda: Breath of the Wild. You get a huge open world to explore and you can crawl through every inch of it. The game even gives you a glider to make it a little easier to ride over larger distances. As for the game, it's an action RPG with some light gacha elements. Additional characters unlock during quests rather than pulling them with game money, like most gachas. We greatly appreciate the attention to detail in this and it should remain popular and good for quite some time. **Grand Theft Auto Series (five games)** (**Price:** \$4.99-\$6.99 each) Of the courses we are putting Grand Theft Auto on this list. **Grand Theft Auto III** has modernized the open world genre and yes, it's on mobile along with **Grand Theft Auto: San Andreas**, **Vice City**, **Liberty City Stories**, and **Chinatown Wars**. Most people know how GTA works. You get full access to the mass city. There are side quests, story line missions, and various mini-games to entertain you while you progress through the game. You can also steal cars, antagonize the police and even buy property in newer names. Games range from \$4.99 to \$6.99 in addition to in-app purchases. **Rockstar Games** is also a bully (Google Play link), an open world game in which you control a student, not a gangster or mobster. Any of the six games make for an excellent open world experience. **MadOut2 BigCityOnline****Price:** Free play**MadOut2 BigCityOnline** is another adventure game with elements similar to Grand Theft Auto. You can steal cars, fight people, shoot stuff, and cruise around the open world. However, this one also borrows some elements from racing games and allows you to do things like customize your cars, race people and do other things. The game also has more than 40 cars, various missions, and there can be up to 100 players on the map at a time. It's neat in general, but not quite as polished as Gangster Vegas or GTA. **Minecraft****Price:** \$6.99 with in-app purchases**Minecraft** is one of the most popular open world gaming games on any platform. Survival mode is a pure experience of the open world. You can dig resources, craft things, build stuff, kill bad guys, go fishing, and even ride into alternative worlds. There is a creative mode that is open to the world, but it's more of a sandbox experience than an open world. You can play solo or with friends and create really funny stuff with a little patience. The game is \$6.99 with some of the skins in the program buying characters if you like. They are completely optional. There is also **Minecraft Earth** (Google Play link) if you want to play the game in the real world. **Oceanhorn****Price:** Free/\$5.49**Oceanhorn** is an adventure game similar to the Legend of Zelda series in terms of mechanics. The player gets a series of islands to explore and each of them is his little open world. There are various puzzles, mini games, and what to collect along with the story. It is technically not an open world according to the correct definition of the word, because there are several areas. However, you can explore them as you so choose that you get the same effect. It's not nearly as good as the Legend of Zelda game, but the spirit is and the soundtrack is the famous Nobuo Uematsu, composer of most previous Final Fantasy games. **More Android games here:**15 best android survival games15 best Android games available now**Pokemon Go****Price:** Free to play**Pokemon Go** can be the most open game of all time in the world. Players explore the actual, real world and use augmented reality features in the game to actually play. There are gyms and poke stops all over the real world, and you travel there in real life or battle or collect things. The game has evolved quite a bit since its early days. You can battle trainers, take over gyms, collect items, walk around hatching eggs, and complete missions during the game. The game has an occasional bug and for a long time players are getting a little burned, but the game is fun and friendly to the family. **Old school RuneScape****Price:** Free/\$10.99 per month/\$99.99 per year**RuneScape** is one of the most popular MMORPGs of all time. It has also been around for almost 20 years. It's an open world for MMORPG with solo and collaborative play. There are a ton of missions and quests to play through, items to collect, gear installed, and more. The game also has one of the deepest players driven by economy of any game. The free version covers most of the game. If you go with a subscription service, you'll get extra skills, a bigger world, more searches and 400 extra bank slots. It's also one of the few MMORPGs with subscriptions rather than microtransactions. Most MMORPGs are open to the world and you can check out other great Android MMORPGs here. **Portal Knights****Price:** \$4.99**Portal Knights** is open action RPG with some sandbox elements. It has all the usual RPG stuff, such as level progression, story line, boss fights, and lots of things, things. However, the game involves a lot of crative mode where you can build your own island and the world is randomly created as Minecraft. You can also play multiplayer with other people as well. It's seriously underrated game and it's surprisingly cheap how big it is. You can also play for free with Google Play Pass.**Sky: Kids Light****Price:** Free to play**Sky: Children of Light** is something a little different in this genre. It's an open world game, but it doesn't feel like a GTA or Minecraft experience. Instead, players drift around the world to explore all their oddities. It's a bit like the portal knights, where there are seven different areas to explore, but you are free to explore them in your spare time. So purists can't identify as a true open world game. Anyway, it's really enjoyable and we really like the art style and atmosphere of this one. It's much more relaxed than most other genre. **Terraria****Price:** The \$4.99 **Terraria** is one of Minecraft's biggest competitors. It takes place in a 2D world, not in a 3D world, but you still have a ton of freedom to explore the way you choose. The game includes construction, craft, mining, boss fights, and all other activities. You'll also get customizable controls and different global sizes if you want something massive or smaller. The game was completely redesigned not so long ago, and now basically equals the game with the PC version. This is definitely one of the genre's greats. Thank you for reading. Try these too many!15 best and biggest MMORPGs android15 best gacha games androidIf we missed any great open world games for Android, tell them in the comments about them.
