To be honest, we have comments on sound effects or the sound quality of the application simply because the function of the application does not make a sound. All showbox audio comes from streaming videos. And these quality sounds depend on many factors, in which the application is only a small one. Besides, the quality of the internet connection will also affect video audio. And your device's speaker affects the sound. Therefore, it is not fair to judge whether Showbox has good or poor sound quality. Keep in mind that you can't find the Showbox app in your Google Play store.
