Silence PleaseAuthorArthur C. ClarkeCountryUnited KingdomLanguageEnglishSeriesTales from the White HartGenre(s)Science fictionPublished in Science-FantasyPublication typeMagazinePublisherNova Publications dateWinter 1950Followed by Big Game Hunt Silence Please is a science fiction short story by the British writer Arthur C. Clarke, first published in 1950. [1] The play was later used as an introductory story for Clarke's collection Tales from the White Hart. [2] This funny story describes the efforts of a brilliant student to design a machine that would cause an area of absolute silence. The gadget is then used in a joke, with tragic results. The story touches (albeit humorously) on the popular science fiction theme of an inventor who gets into the hands of their invention to the grief, best known for Mary Shelley's novel Frankenstein. The piece also refers to the composer Edward England, an obvious parody of the work of Benjamin Britten. [3] The Fenton Silencer described in the story uses the same phase-inversion principle found in modern noise-cancelling earphones. The story was one of two works by Clarke translated by Hungarian writer and politician Árpád Göncz: the other was 2001: A Space Odyssey. [4] References ^ Silence Please by Arthur C. Clarke.
