C9 led christmas lights red and white

Looking for a simple but sophisticated way to decorate your holiday home? Try a Scandinavian theme. We share the details that make this living room celebrate Scandinavian style. Scandinavian style has had its time in the spotlight for a while now (hello, IKEA!) due to its clean lines and soothing simplicity. Carry the minimal design over for Christmas with these ideas. A classic Scandinavian colour palette includes white and just a different color. For the holidays it's red. Think bakers twine and peppermint candies. Organic elements, especially natural wood, are also a hallmark of this appearance. See how some simple adaptations to this living room will be a wonderful nod to Scandinavian style. Explore Scandinavian Decor Gathering around a crackling fire when you live in the cold north, so make the mantle stand out this season. A vase with winter flowers, such as paperwhites, adds life and will last throughout the holidays. A collection of Swedish Dala horses of wood arranged next to the vase gives an unexpected touch. They are traditionally hand-painted and hand-cut, and the cheerful bright red shown here is a characteristic design. (If you don't have any or don't want to buy them, you can sew your own Dala horse ornament!). To complete the look, simple hurricane light takers flank each side of the accessory. Keep things personal by using the leftover mantle space to show cards from family and friends. Stockings hang below on discreet nails and wear the red and white color scheme. To decorate the tree, choose cozy felt ornaments, salty snowflakes, traditional wheat or straw bundles, and wooden pearl ornaments that will not weigh down the branches. They are a nod to the natural elements for which Scandinavian style is known, and they are children and pets safe. You can also create your own complementary wooden pearl wreath for the tree or mantle. For the gifts under the tree, use wrapping paper to set the stage. Try paper with a seasonal natural motif, such as deer, bears or holly berries. Keep patterns coherent by completing each gift with simple ribbons or bakers twine. For a simple holiday update that doesn't take up space, replace some lampshades for a festive red. Do you have a living room hook, side shelf or bookcase? Dress it up with an arrangement of moss and extra themed ornaments located in a cork or wooden bowl. Natural elements like these keep this simple style from looking dull or lifeless. A striped throw pillow and red mirror or photo frames help tie the room together with bonus pops of color. Dress up the coffee table with a trio on a tray - a vase with colorful candy cane cloves, a bowl of peppermint, and a third dish filled with surprise candy. You can quickly move the board out of the way when you entertain, and your guests will enjoy the thoughtful treats. Scandinavian Christmas decorations you can do first it candles, then bulbs, then strict light, and then yarn. The technology around the holiday lights is only evolving, and now that we have the best artificial Christmas trees with LED lights, it's as easy as ever to add some warmth and cheer to your home. After all, evenly stringing the lights is one of the most time-consuming steps, so when choosing a pre-lit Christmas tree instead, you are so much closer to hanging ornaments. According to Consumer Reports, there are some must-have features to consider when shopping for an artificial tree. The best prelitfithralf artificial Christmas trees have all hinged branches, a solid base and fire retardant needles, but it is also important that you choose the right type of bulbs. LED lights use less power and fade instead of burning out, so you don't have to deal with an entire dead thread because of a single bulb. Of course, convenience is a big factor here, so all these best-selling artificial trees are extremely easy to set up. They come in three or four sections and have the aforementioned hinged branches that just fall into place. After that, simply connect to the lights, fluff the branches, connect it, and you're ready to start decorating.1National Tree Carolina Pine Artificial Christmas TreeAvailable sizes: 4.5, 6.5, 7, 7.5, 9 feet No joke, it looks like it's real, says one reviewer, and dozens more agree that it just lacks the woody scent and messy needles. Thanks to its full, rounded branches, multicolored foliage and built-in flocked pine cones, the National Tree Carolina pine tree will get all your guests fooled. It is pre-tense with 750 bright lights, and it is resistant to fire and allergens. No wonder buyers have given it a 4.5-star rating overall after 1,000 reviews. While, it's a little more expensive and it will require a good amount of fluffing before it looks like the picture, reviewers say it's worth the money and trouble. According to one reviewer: I was surprised by the pine cones they look realistic. The lights on the tree are enough you do not need to add extra light, they are bright and look elegant. The setup was simple. It took about 10 minutes to set up. The needles did not fall off and the cleanup was simple, well worth the money and would recommend to everyone. 2Evergreen Classics Color-changing Spruce Artificial Christmas treeAvailable sizes: 6.5, 7.5, 9 footColored lights are whimsical, but white lights are so stylish - how can you possibly choose? Luckily, Evergreen Classics offers spruce both, so you don't need it. Its 600 low-voltage LEDs switch between clear, multicolored or both (back and forth from one to the other) using the included remote control, and it even comes with a foot pedal. Buyers say it is extremely easy to set up and are so lush and real-looking that they are filled with childlike wonder. According to a reviewer: Very fast delivery on tree and it looks better in person than in online pictures! My previous tree was beautiful, so I was nervous to buy a new one online, but I was so pleasantly surprised at how pretty it was personally. Especially after being decorated. 3National Tree Downswept Douglas Fir Artificial Christmas TreeAvailable sizes: 7.5 feet (other sizes are available in different styles of trees)This easy-to-assemble Douglas fir by the National Tree Company has won over many fans on Amazon. Available in just one size (7.5 feet high), it is slightly less customizable than other trees on this list. However, The National Tree Company does this in a few different styles and sizes, so there are other options if this height doesn't match your space. It has 750 clear LED lights equipped with special locks to keep the bulbs from falling out. They are also flame resistant and, according to reviewers, easy to set up and take down. According to one reviewer: We've always had real trees, and this year decided to go with an artificial one. Very nice and solid wood, easy to put together. I would definitely buy another one if I needed one. 4Balsam Hill Classic Blue Spruce Artificial Christmas TreeWhen it comes to Balsam Hill classic blue spruce, you get over 2300 branches and 850 LED lights – but you also get plenty of bonuses. This tree comes with a free storage bag, cotton gloves, replacement bulbs, extra fuses and a foot pedal, so you can easily turn it on and off. It even has a three-year limited warranty as well. We were blown away at the level of detail, a reviewer raves. This tree was going to last us for the rest of our lives. According to one reviewer: The tree is solid and the pieces go together without any problem. I am very pleased with my balm hill tree. Can't wait until next Christmas. 5Pencil Slim Artificial Christmas TreePencil Slim Artificial Christmas TreeAmazonFor college suites, cramped apartments and cozy cottages, the aptly named Pencil Slim Christmas Tree. Since it is only about 20 inches in diameter, it fits easily into tight corners or against walls, so you can enjoy some holiday heat without clutter. This one has over 300 lights and has soft-tip branches, you should back in it by accident. Remember, this is only available at a height (7 feet), so pay attention to the ceiling height before purchase. According to one reviewer: I searched high and low for a thin tree that could fit in a small space. This tree is perfect! It is still tall, but fits perfectly in a narrow area. And it's prelitened! She loves it. She was able to fit her favorite ornaments on it, and it looks beautiful. 6Easy Treezy Pre-Decorated Christmas TreeEasy Treezy Pre-Decorated Christmas TreeAmazonAvailable sizes: 7.5 feetExtended work schedules, massive shopping lists, busy weekends - for some it's the most hectic time of year, you may not have much time to set up a tree. According to reviewers, the Easy Treezy Christmas tree takes a total of 90 seconds to fully assemble, and that's because it comes prelit and already decorated. The four sections snap together with a genius magnetic design, so all you have to do is stack the pieces, plug in the bright LED bulbs and enjoy. You can get this in seven different decorated designs, as well as some less ornate styles if there is more to your liking. According to one reviewer: There was almost no fluffing, and there are no holes. I really dislike setting up artificial trees, with their pokey branches and time-consuming fluffing. One of the best things about this tree is taking down is just as easy. I had it down and back in the box in just a few minutes. This system is brilliant! 7National Tree White Dunhill Fir Artificial Christmas TreeAvailable sizes: 4.5, 6.5, 7, 7.5, 9 footWhite trees have a certain magical elegance, and this Dunhill fir from the National Tree is no exception. The 2,500 hinged branches have snow-white needles and 750 LED lights equipped with bulb locks, so if you burn out, the others remain lit. It's packaged in a storage box that you can reuse, and it's also protected by a one-year warranty. One note: Since it is white, it is prone to discoloration, then carefully wrap it and store it somewhere clean. According to one reviewer: I use this 4.5 white tree on a large round glass sofa table instead of buying a large tree sitting on the floor. This small tree will be easier to store than a large one. Must be fluffed to look drunk, but it wasn't hard. All the lights work. This was a good finding. Very pretty with a traditional Christmas tin reform. 8Best Choice Products Pre-Lit Spruce Artificial Christmas TreeAvailable sizes: 6 feet, 7.5 feet, 9 feetYou'll be hard pressed to find a quality artificial tree for under \$150 in store - never mind a prelitone - but Best Choice Products spruce offers 6 feet of pre-lit festivities for just over \$100. With nearly 800 flame retardant branches and 250 LED lights, it's anything but sparse, and the solid metal frame provides durability despite the affordable price tag. Should you choose to go higher, the 7.5- and 9-foot options are both under \$250, which is practically unheard of. Remember: You get what you pay for with this tree, and some reviewers have had problems with small parts of the lights that aren't working properly. According to one reviewer: Love the tree!!! It came just before Thanksgiving. Easy to assemble and super fun to fluff. I'm not a big fan of the wooden stand, because I usually go overboard decorating the tree. The tree seems to be holding up well and I am very happy for my purchase.
