In 1956, the new Armitron watch brand appeared, at the same time as the founding of E. Gluck Corporation, as well as the Anne Klein brand. The American armitron watch owes its appearance to the president of the company Eugen Gluck. It was just his idea to create a real brand of people. His idea and desire were realized, after a short time, the watches of this brand have deservedly become gaining popularity and have confidently occupied their niche in the watch market. In addition, I cannot help noticing that this brand, today, has entered the top ten of the best-selling watches in the North American market among brands such as Timex, Fossil, Guess, Seiko, Bulova, Citizen, Casio, Pulsar, Movado. Armitron watch models combine a unique and at the same time well-recognizable style, high quality, reliability and practicality. In our selection there are 7 best-selling models of Armitron watches with a price tag of up to $50. 1. Armitron Men's Watch 408231RDGY Chronograph Digital Sport Armitron 408231RDGY Chronograph Digital Sport This digital chronograph has a special male character. These men's watches remind everyone of the famous Casio G-Shock. These watches have functions such as chronograph, stopwatch, countdown timer, time timer, date display, day of the week and battery charge indicator. The watch case and strap are made in two colors. The main tone is black and bezel, some details are silver. Inside the watch there is a Japanese quartz movement. The water resistance of the watch is 100 meters. The price of this model is about 25 dollars. 2. Mens Watch Armitron 408188GMG Chronograph Digital Sport Armitron 408188GMG Chronograph Digital Sport This model almost completely repeats the functionality of the previous hours, there are only changes in design. Changed the design of the digital dial. Added a bright orange color that revitalizes this model and gives it some freshness. Changed the location and nature of the subfield display showing additional parameters. The design also looks very brave, brave, charismatic and expensive. The price of this model is also about 30 dollars. 3. Mens Watch Armitron 408209BLK Chronograph Digital Sport Armitron 408209BLK Chronograph Digital Sport The next two-tone chronograph that has the basic functionality of a digital watch and good design. The set of of this model, although not rich, but useful and applied almost daily. Water resistance is also maintained at a level of 100 meters. The price of this model is about 20 dollars. 4. Armitron Men's Watch 408177RED Digital Sport Armitron Chronograph 408177RED Chronograph Chronograph Sport Rectangular sports watch in original red-black color. The dial is big enough that the weather is easy to read while doing sports and doesn't distract much attention to read the weather. The strap is made of black rubber and has the possibility to be mounted on almost all wrists. The holes for fixing on the strap are made quite often. The dial is made a bit unusual, the main part of the LCD display, the background, is made of black and the information part is made of white. The water resistance of the watch is 100 meters and the price does not exceed 30 dollars. 5. Women's Armitron Watch 456984PNK Digital Sport Armitron 456984PNK Digital Sport This model is strictly focused on girls. This is evident from the use of pink in the design of the watch face and case. The watch also has smooth and smooth lines. The design is stylish and clean. The combination of pink bezel, silver and black strap looks optimal and deservedly gives this model the glory of one of the best-selling. The watch has a useful second time zone function. The water resistance of this female model is lower than that of men's sports models and is 50 meters. And the price is kept at a more than affordable level of $30. 6. Mens Watch Armitron 40/8251 Digital Sport Armitron 40/8251 Digital Sport This men's model, perhaps the most brutal of all presented to your attention. Bright red accents, silver bezel, sharp edges and sharp shapes, all this gives the watch a feeling of brute strength and power. The functionality is always the same, the second time zone and a set of standard functions for digital watches. Water resistance is 100 meters, like previous male models. The price continues to please and is only about 30 dollars. Armitron 752433BLK NOW Diamond Accented This female model is eliminated from the range of what was presented above. This elegant female model has gained popularity among women all over the world, but in the North American market this model is particularly popular and is the leader in sales. The watches have curves and smooth lines and have a powerful and attractive design for the beautiful half of our planet. The dial is made analog and has three hands, as well as a large white stone around 12 hours and replaces the index finger. Stone and arrows contrast perfectly with the black dial. The watch has excellent readability. The watch looks very expensive and stylish. The bracelet can be adjusted, removing links, which ensures comfortable use of this model, which is so important for girls. The watches have a diameter of 19.2 mm. The case and bracelet are made of metal and have protection from scratches. Inside the watch there is a japanese quartz. Unfortunately, the water resistance of these watches is very small, it is worth using them carefully even when washing your hands. The price of this model is 50 dollars. In conclusion, I mean that for excellent excellent design good quality of performance, the Armitron brand takes rather modest money. Our article described the most popular models. But there are actually many of them and you can find yourself a model for each day, so the bag does not lose much weight. How to set the time on your Armitron Pro-Sport digital watch Your new post is loading... Your new post is uploading... Harvested by lttvgig Scoop.it!
