Second Update (2017.2) Sage 50 2017. Schedules are updated in July and service releases are in October and March. Everyone in the current subscription or business care plan will receive a download notification when available. This update includes: Click-to-pay invoices: If you use the Sage payment solution to process a credit/debit card or virtual cheque (ACH payment), you can now include a link when you email the invoice so that your customer can make a payment online. This link will take them to a secure web page where they can put credit/debit cards or their bank information. You can then download their payment directly to Rishi 50 as a cash receipt (received money) transaction and it will be applied to the invoice as if you entered it yourself. The update for Rishi 50C users only (subscription, not cloud based software) enhanced Rishi was introduced in online challan version 2017 through integration with a mobile challan: Rishi A. Three important improvements have been made to make 1 online/mobile challan. (1) Your sage 50 sales tax are automatically uploaded to Rishi A. (2) Your sage 50 inventory and service items are automatically uploaded to Sage One. (3) Receipts (which customers use the click-to-pay option) are automatically downloaded in Sage 50. Sage Contact App for Microsoft Office 365 Business Premium: Office 365 Connection Wizard will sync customer and vendor contact information between your Sage 50 company and Office 365 (365 Business Premium required). In addition to being able to keep basic contact information, the Rishi Contact app will allow you to view the last 5 invoices and final 5 receipts/payments within the last 90 days. The contact information converted into rishi contact app will sync back to your sage 50c data. You can schedule sync to run every 4, 12 or 24 hours as well as start it manually. Improved Office 365 cloud backup: Now you don't need to run Rishi 50 as administrator for Office 365 Cloud Backup to work and improvements were made to help with backups of large companies behind the scenes. Finally, the interface for email notification has been updated. Here's Rishi's video with new features in Rishi 50 2017.2. Rishi 50 is peach in the east.
