I read that anbox can do this, but I want to know whether a secure and reliable method x33a forum fellow is registered: 2009-08-15 Posted: 4,586 What are you trying to achieve, why can't you use an emulator? These platforms are not for anbox support, so we can't comment on its safety or reliability. That said, its code is hosted on Github and it seems quite popular. Visit your issue tracker to see how secure and reliable it is.
