History[editing | editing source] Arahabaki is an ancient Japanese indigenous god from the Khofun period. Momunofu was his servants and before his religion was sunk by the Shinto pantheon, Arahabaki was worshipped in the northeastern regions of Japan as a god of travelers. He was also worshipped by Nagasunehiko, enemy of Emperor Jimmu, and so from the orders of Emperor Arahabaki became a symbol of betrayal, rebellion and heresy and worship was forbidden for a long time afterwards. However, this refers only to Tsugaru Soto-Sangunshi (which is said to have been drafted in the 1970s) which has been inferred as a false document. Views[editing | editing source] Profile[editing | editing source] Shin Megami Tensei[editing | editing source] Source: Japan. A local god of ancient Japan. Because its sanctuaries are found all over Japan, it is known as the god of travelers. In one account, he was the main god when Nagasunehiko and Abihiko began their kingdom. —Shin Megami Tensei A-Mode DDS dictionary Arahabaki appears as a rare encounter at the Imperial Palace. He could later be hired in Tokyo Destinyland after hitting the evil summoner there on the neutral route. Shin Megami Tensei III: Nocturne[editing | source editing] An important deity in ancient Japanese mythology. Clay dolls were often sculpted in his image. Because this god was worshipped by a revolutionary, the dolls came to be considered symbols of contempt. —Shin Megami Tensei III: Nocturne compendium Arahabaki can be taken with Momunofu evolution when he has enough experience at level 24. Arahabaki has the ability to ward off the ice and cancel miscarriage, death and physical attacks. However, it is weak for other affinities. Arahabaki may also come across the Obelisk as a chance encounter, but as a wretched demon, he can't be hired with medium, even during the Full Kaguchi and while begging for his life. A powerful Arahabaki that can shed Makarakarn to protect its weaknesses in addition to diseases can be purchased in the Labyrinth of Annala by a Shady Broker located behind a door that set opens to a demon of light. Therefore, the title of Demi-fiend must be light-aligned before it can try to buy this Arahabaki. Shin Megami Tensei IMAGINE[editing | source processing] Arahabaki can only be acquired through fusion. He appears as the last boss of the presence silver level Ichigaya Camp and will always give birth to Momunofu. It also appears as a nightmare variation on the basement level floors of the golden case. Shin Megami Tensei IV Apocalypse [edit | edit source] One of the main gods of ancient Japanese tradition. His image is reflected in the shakoukidogu statues. Because he was worshipped by Nagasunehiko, who defeated Emperor Jimmu's army, he was considered a symbol of rebellion towards the Emperor, provoking the persecution of his followers. Shin Megami Tensei IV Apocalypse collection Arahabaki is found at tennozu shelter in the Quest Challenge [Ttg] Secure an Evac spot. Arahabaki took refuge in the shelter, stating that he still had a partner that Arahabaki found pleasant. He demands that Nancy and the gang worship him when they meet, and he's outraged if he's asked to leave. Arachabakis will constantly use Makarakarn to cover up his weaknesses in battle, preventing the use of elemental magic on him. However, a weapon loaded with elemental rounds can bypass this, as they are considered type bodily harm. Arahabaki has no means of removing debuffs from himself or buffs from the party, which may be necessary to use as Arahabaki will pass turns using Concentrate followed by a sea of chaos. Arahabaki can teach Nanashi the Sea of Chaos, Makarakarn, Concentrate and Energy Drain skills through the Whisper Demon. It benefits from learning almighty and support skills. Persona 3[editing | editing source] Arahabaki is the ultimate Persona of Hermit Arcana. It's unlocked after maxing out Maya's Social Connection. However, Arachabaki requires a special cross-fusion and thus can only be merged after 21st E/21 and the protagonist is Level 60. The faces? Omoika, Tak-Minakata, Okuninushi and Kikiuri-Hime are needed to crush the Arachabaki. The film [editing | editing source] Arahabaki is called by Makoto during the battle against Chidori Yoshino and against other Strega members thereafter. Persona 4 The Motion [editing | editing source] Arahabaki was used in an attempt to slow down and damage Shadow Naoto. Attack me, possibly, Torrent Shot. Arachabaki also made a brief appearance in the match against Kunino-sagiri. While Yu was in control, he used Arahabaki to block Kanji's hasty Take-Mikasuchi in to help. In the True Ending special, Arahabaki appears to attack Cu Chulainn Margarita using Vicious Strike and brings a message of support from Fox. Arahabaki is the Persona that represents the bond between Yu and Fox. Persona 5[editing | editing source] A mysterious god of ancient Japan. Most famously worshipped by who was defeated in the battle against Emperor Jimmu, Arahabaki came to be treated as a symbol of rebellion and contempt. It is the first Persona to learn the Null Brainwash skill and the first Persona that can be used in battle by the protagonist to learn Maeiga. When detailed through the electric chair performance in the Velvet Room, Arahabaki attaches the Tapsuan armor to the female characters, which has 160 DEF, 12 EVA and grants the Evade Wind (high) effect to the user. Arahabaki is one of the faces required to call Yositsune through an advanced fusion in the Velvet Room. Digital Devil Saga: Avatar Tuner[editing | editing source] Arahabaki is an enemy facing in the Samsara tunnels under Manipura. It tends to use physical attacks like Impulse Hell and Gates of Hell. To defeat it, an ally must have a powerful spell of ice, like Cockytus, and freeze it. This bypasses its defences and the party can cause critical damage after a critical attack. Attacks and almighty skills are the only other methods that can harm it. It sheds fusion cells and vital noises. Arahabaki is also the fourth demon to be called by Demi-fiend in the optional secret boss fight. In this battle, it has no elemental weaknesses or resistances and has access to dangerous movements such as Debilitate and Ragnarok. Digital Devil Saga: Avatar Tuner 2[editing | editing source] Arahabaki is a common enemy in the higher layers of the Sun. Devil Survivor 2 [editing | source editing] One of the main gods of ancient Japanese tradition. His image is reflected in the statues of Sakukindu. Because he was worshipped by Nagasunehiko, who defeated Emperor Jimmu's army, he was considered a symbol of rebellion towards the Emperor, provoking the persecution of his followers. —Devil Survivor 2 compendium Arahabaki can only merge after the protagonist reaches Fate Rank 3 with Jungo Torii. Shin Megami Tensei: Liberation Dx2[editing | editing source] One of the main gods of ancient Japanese tradition. His image is reflected in the statues of Sakukindu. Arahabaki in Shin Megami Tensei: Liberation Dx2 Trivia [editing | editing source] The Arahabaki design is based on the glasses-eyed doguu (or shakouki doguu), a kind of clay figurine made during the Jomon period of prehistoric Japan (approximately 14,000 to 400 BC). [1] While Arahabaki is often referred to as that in the game text, the original clay figurines were actually formed after women. [1] In Shin Megami Tensei, he appears as a deity of light-law alignment. However, it was considered a symbol of contempt, rebellion and heresy. This could possibly be a reference to his previous positon as a deity. References[editing | source processing] Community content is available under CC-BY-SA, unless otherwise stated. Noted.
