40 oz of freon to lbs

06-29-2005, 9:40 A.M. User Registration Date: April 2005 Location: Austin, TX Article: 631 Freon Questions - Ounces and Hey Pounds, quick questions about weights and measures for R-12. Is a pound of reeds equal to 16 ounces? i.e. can a 12oz equa be equivalent to three-quarter of a pound? Sometimes it's a liquid, and sometimes it's a gas, and I measure either of the pounds that seem counterintuitive. Thank. 6-29-2005, 9:45 AM I'm not here Join Date: October 2004 Location: Deltona, Florida Article: 2360 Quote: Originally posted by techguy512 Is a pound of receding receding by 16 ounces? i.e. can a 12oz equa be equivalent to three-quarter of a pound? This is correct. It doesn't matter if you charge as a liquid or gas. If you add a 12oz you can add 3/4 of a pound. PS. charged as a gas. Danny _____ 1984 300SD Turbo Diesel 150,000 miles OBK member #23 (_____) (=.' =) This is Bunny. Lbs is kind of an cymous measurement for mass. Unfortunately the weight and liquid measures both used once in the English system. If you notice it says nt wt on the bottle instead of fl ozs. I don't mind if this is so I would doubt a fl oz of 1 oz distilled water weight. If so the system is even more screwed up think I think. If you struggle with mass concepts be sure to study more difficulties before taking this job. It's hard to keep straight. _____ My Daily: 96 E-300 Diesel with 195,000 Miles Retirement: 92 300D 2.5 T 345K miles and for sale Retirement: 95 E320 157K miles and currently parked with blown engines Both vehicles Retired car sold as my w124 store inventory From 6-29 to 2005, 10:16 AM I LOVE BRUNETTES Join Date: September 2004 Location: FUNKYTOWN Article: 9087 Report: Originally posted by dannym PS. charged as a gas. My total weight resolyc solvent, using my newly honed weight a skill measure is 1.5 pounds. The total cost is \$25 delivered, or \$16.60 per pound. I think I was lucky, but even so, it's a long way from your \$100/lb figure. I just don't see any reason today to convert an A/C system to something other than the receding resolyc agent it was designed for. No, techguy, it's about going rates for R12 these days. I just bought £30 for \$14.06 per pound. Stores are charging \$100 per pound to simply prey on people who don't know any better. When R12 is actually at \$45 per pound or so, hard to blame someone for using a garbage receding, but now the garbage receding will definitely cost more in the long run, but a lot less in the short term. Have a Great Day, Copyright © 1998-2009 UnitConversion.org Privacy & Terms | About | FAQ | Help | Contacts | | | to Us Re: converting Freon from pounds to ounce Originally posted by dorysue How to calculate the number of Freon ounces in a pound? Being like water 16 ounces in a pound of Thanx before Ounces makes a lot of sense. As a unit of weight, avoirdupois ounce is 1/16th of a pound, no matter what is being considered. I guess that's the ounce you mean. Then there is the liquid ounce, which is used in measuring the volume of the liquid. There is 16 ounces of liquid per pint. 1 fl oz water is not 1 av oz water, although it is quite close. Then there are troy ounces used in measuring gold and other precious metals. It is different in size than av. oz., and has 12 troy ounces in a troy pound. (and they say the figures are difficult))
