The 10th kingdom 2 full movie

Edit Shared Community content is available under CC-BY-SA unless otherwise noted. I know I keep harping on all the next parts that I want. But you can really blame me, I mean there's a reason I love the movie/mini-series. I mean the possibility that someone will read this and say hey this is a great idea is slim to nobody, I admit that. But there's always hope that someone will read this and actually do it. Now according AngelFire.com, it took Simon Moore, the author, and writer of the 10th Kingdom over 12 years to get the original miniseries done. That was all before 2000. After 2000, after the NBC premiere, Moore responded to fan letters with a short summary of the next season (as it was suggested at the end of The 10th Kingdom). He told fans that it would take place mainly in the 2nd Kingdom and would be centered around Wolf (who was played by Scott Cohen) this time around. He also said that Virginia was heavily pregnant. In 2001, it was noted that all actors, with the exception of John Larroquette [Tony], were interested in returning for the next season. However, even he said he would return for a short cameo role. He argued that he hated the six months of filming that took him out of his family. That's perfectly understandable, people are homes. We all know there's never a next part. Hallmark never picked it up, nor NBC, though fans have been asking for it for 11 years now. NBC's whole argument is that because miniseries have dismal ratings, in the U.S. anyway, make them have little or no interest in a follow-up. Even so, Hallmark had more orders for canned tape than they could fill. I contributed, bought both boxed video sets and DVDs when it came out on DVD. There's a little hope, though. As of March 2004, Moore said in an interview: I would love to continue the adventures of Wolf and Virginia, but there are some obstacles in the way. However, as some of you know, the 10th Kingdom takes almost twelve years to be done, so don't give up the next section quite! In 2006, Moore offered a less hopeful response when he said: Most of you know that a second series of 10th Kingdom is something I would love to do, but we'll all have to wait until the time is right and the opportunity presents itself. I have no more news on this topic, but if it is meant to happen, then one day it will ... I would love a next, heck even a prequel would be great. Who says it should be a miniseries. It could be a movie or even a drama. Fairy Tale shows are all the rage at the moment. So why not? If you want to see the sequel, you can sign The 10th Kingdom Sequel Petition. I did! It depicts the adventures of a young woman and her father after they are transported from New York City, through a magical mirror, into a parallel world of fairy tales. Miniseries originally aired for five nights during a two-hour episode on NBC, beginning on February 27, 2000. It won an Emmy award for outstanding title design in 2000. The premiere had over 14.04 million viewers. [1] Plot In a hidden kingdom, fairy characters live in nine magical kingdoms, where a Demon Queen plots to rule them. She was held in a prison in the Kingdom of The Fourth Kingdom. The kingdom was ruled by Prince Wendell, the spoiled, arrogant nephew of Snow White. Weeks before her coronation, the Queen enlisted the brutal Troll King and her three children to release her just before the Prince made his annual visit to prison. Prince Wendell was captured by the Evil Queen, his wicked step-mother. She turns him into a Golden Retriever while her very own retriever is transformed into a copy of Wendell. In panic, the transformed Prince fled through the prison, tripped over a mirrored gate in the basement, and was transported to New York City. Troll King orders his muttering children Burly, Blabberwort and Bluebell to bring the prince away while the Queen releases a half-wolf prisoner (who is simply called Wolf) to take him instead. Meanwhile, frequent Manhattan residents, powerful waitress Virginia Lewis and her personal father Tony are entangled in the risks out by magical city nosies, including Wolf falling helplessly in love with Virginia and Tony being given six wishes (which he foolishly uses for personal benefit, for which they tend to backfire). With Virginia having determined that Wendell was transformed- named by a fellow waitress as 'Prince' even before Virginia knew his identity was more than a normal one, Tony used his ultimate desire to get the ability to understand, who urged them to travel back to The Nine Kingdoms with him to spell. Tony, feeling responsible for Prince, reluctantly accepted, and Virginia and Tony were brought back to the kingdom through the magic mirror. At first, Tony and Virginia are desperate to get home, while magic mirrors are being taken from place to place around the Kingdom – cleared out of prison, taken as a prize for a sheep farming competition, and then sold in an auction. The party travels through the lands to pursue the mirror, facing many dangers and challenges in the process, including Virginia's enchanted hair to an impossible length, pursued by the Queen's Huntsman, and a plot by little Bo Peep's descendants to take good control of a town's wishes. During their journey, Wolf questioned his loyalty to the Queen in favor of stubborn Virginia and quickly sided with them. This action prompted the Queen to send huntsman relentlessly and cold-bloodedly to catch the Prince along with Virginia and Tony. Virginia finally meets the ghost of Snow White, who reveals she is set to save nine kingdoms. Tony also recognized the Queen as his long-lost wife and Virginia's mother. They go to the castle to stop her, but Wolf seems to have betrayed Tony and Virginia. They were thrown into the dungeon where Tony revealed to Virginia that her mother had suffered a mental breakdown and had tried to engulf Virginia the night she left. The Queen had an impersonate of Prince Wendell crowned the king and then tried to poison all the kings who attended the ceremony. Fortunately, Wolf transferred the poison to a sleeping pill, so people woke up unharmed. Virginia had to kill the Evil Queen in self-defense, which hurt her a lot. Prince Wendell actually turned into a human being and crowned, forgiving demons, and allowing them to return to their kingdom after the death of their father. Grateful to Tony for all his help, Prince Wendell offered him a job at the palace, which he accepted. Virginia and Wolf, now expecting a child, return to New York City. Kimberly Williams as Virginia Lewis - Virginia is a beautiful 21-year-old woman who lives on the edge of Central Park with her father. Virginia, while very skeptical and tired, is also an ambitious restaurant, and while she claims that she doesn't care about her mother or dating, it soon becomes clear that she feels very lonely. She later revealed that she blamed herself for her mother's departure. Initially, she was only interested in returning to her own world, but she eventually pledged to help Wendell rescue her kingdom. Virginia must learn to face the pain caused when her mother abandons her. Gradually she developed feelings for Wolf. According to Ron Wertheimer (New York Times), Virginia is a lucky waitress on the road to confidence. John Larroquette as Anthony Tony Lewis - Tony is a laborer and single father mostly forget his own Virginia, problems, and emotions. Initially, he is portrayed as selfish, greedy and cowardly, but at the end of the series, he is willing to do anything to save Virginia, Scott Cohen as Wolf - Wolf is freed by the Evil Oueen from Snow White Memorial Prison after he swears his lovalty to her. He went to New York City in search of Prince Wendell and met Virginia, whom he loved immediately. He spent much of the film helping Virginia and Tony escape the kingdom, loving Virginia more. Dianne Wiest as Christine White[2] is often referred to as the Evil Emperor - the film's main anthry and Step-mother of Prince Wendell. She was sentenced to life imprisonment for killing both Wendell's parents and nearly killing him. She was later revealed to be Virginia's mother. Before the events in the mirror traveling after being mentally debilitated and fleeing a failed attempt to kill Virginia. She is brought in by the swamp witch (Snow White's step-step-mother) and becomes her consce insced. The plot of the series relates to her plans to take over Nine Kingdoms. At the start of the program, she was released from prison and turned Wendell into one. Daniel Lapaine as Prince Wendell, grandson of Snow White, the spoiled, arrogant and depressed heir to the throne of the 4th kingdom, Prince Wendell spends most of the film as one. He can only communicate with Tony and gradually becomes more humble and responsible. After his adventures and time with Tony, he is fascinated by the Modern 10th Kingdom (New York City) and insists that Tony build him a bouncing castle and thus encourages Tony to give him an industrial revolution. Rutger Hauer as The Huntsman, the Evil Queen's hunter who is sent to kill Virginia and Tony, carrying a magic crossbow that never fails to hit the heart of a living creature when fired. Huntsman is totally devoted to the Evil Queen and firmly believes in fate and fate, not caring about mercy. Ed O'Neill as Relish, Troll King - Relish is the king of the troll kingdom and the father of Burly, Blabberwort and Bluebell. He temporarily joined forces with the Evil Queen, but later abandoned her plan of conquest when he decided to take his 4th Kingdom. Hugh O'Gorman, Dawnn Lewis, and Jeremiah Birkett as Burly, Blabberwort, and Bluebell - Three troll siblings released from Snow White Memorial Prison by their father, who, not long afterwards, is tasked by the Evil Queen that they try to complete the hunt for Prince Wendell, then Virginia and Tony. They spend a large part of the film as golden statues after Tony abuses a magic. Camryn Manheim as Snow White - She is mentioned many times and is ultimately only seen by Virginia and her nephew, Wendell (as a dog) in the White cave in an ice-like coffin. She defended Virginia and shielded her image from the Evil Queen. When she met her, she told Virginia her childhood story and told Virginia that she was premedued for many wonderful things and gave her advice on how to kill the Evil Queen. Ann-Margret as Cinderella - She is one of the oldest living princesses of the Nine Kingdoms. Moira Lister as Virginia's Grandmother - She despises her son-in-law Tony because he is a lower class, but loves Virginia and thinks she needs to marry a high society. Warwick Davis as Acorn, the dwarf - He helps Tony and the others escape from prison. He then sold various stolen items, such as magic mirrors. He appears again while hiding in the swamp in the very house where Snow White's evil step-step-mother lived. He gave Virginia a short break when she was looking for her father and even allowed her to see the tomb of the Evil Queen. He then guides her to where she can find Tony. Lucy Punch as Sally Peep - A shepherd who lives in Little Lamb Village on the edge of the Enchanted Forest. Virginia competed with Sally Peep in the Sheep and Shepherdess competition to win the travel mirror, which was first prize. Producer Simon Moore, the screenwriter of the script, wondered about what happened after Happy Ever After's old fairy tale. His vision became the 10th Kingdom. According to The New York Times There are humorous tips for familiar characters such as The Seven Dwarfs and Rapunzel during the 10 hours and appearing with updated versions of Snow White (Camryn Manheim) and Cinderella (Ann-Margret). Executive Producer Robert Halmi Sr. explained, We want the down side of these celebrities. Cinderella, for example, is now 200 years old. And Camryn took her part because she loved the idea that Snow White is now overweight. [3] Camryn Manheim added, Yes, I've been playing her in my bedroom for years now, so I'm ready for her. But it was amazing, I grew up reading about Snow White and imagining about being the fairest of all of them, and I was there. My manager told me that NBC gave me the role of Snow White and I said, 'I'll take it.' I agreed to do it even before reading the script because I was so excited that they were moving away from the usual snow white. I'm playing Snow White, and we went very far from that image when I was growing up and we're getting all sorts of beauty. So it was really thrilling to get in the tight corset and be able to highlight my assets, no pun intentions and, yes, it was a return to my better days[4] The Times reported that the role of Virginia Lewis, Kimberly prefer to work in movies and theater rather than television. Because the TV happened so fast, I felt panic, she explained. However, despite the misgivings, she can't resist to star in The 10th Kingdom alongside Dianne Wiest, Jimmy Nail, and Rutger Hauer. Simon intertwined all the old fairy tales and updated them, exploring what happened after Happily Ever After, Williams, virginia's character as a waitress in New York plunged into a parallel world inhabited by trolls, talking dogs and evil step-mothers. Broadcast and received miniseries originally aired as five 2-hour episodes on NBC, beginning February 27, 2000. The 10th Kingdom won an Emmy award for outstanding title design in 2000. [to quote] It aired in the United Kingdom on Sky One. [to quote] Variety's Laura Fries (February 21, 2000) confirmed that Kimberly Williams is doe-eyed and beautiful and is featured a lot throughout, but 10 hours is a lot for this star to wear on her shoulders. [to quote] Christopher Null Filmcritic.com that Larroquette was an unfortunate casting choice. The Night Court's 30 minutes have always been my limit for the guy. The 417th minute was too much of his abrasive attitude to handle. [to quote] Related Media During the initial broadcast of The 10th Kingdom there was a toll-free show so one could order a set of novels, CD soundtracks, and entire miniseries on three VHS tapes. In May 2000, The 10th Kingdom was released by Hallmark Entertainment and Artisan Entertainment) on VHS as both tapes and as an Extended Play single. About two hours of miniseries were cut out to make it fit on two tapes. No footage is dealt with with the main plot elements, but the sheer number is eliminated resulting in a significantly different viewing experience. Miniseries was later released on a three-disc DVD in October 2000. A set of two discs followed in May 2002, using a double-sided disc and a one-sided disc and including the special feature The 10th Kingdom: The Making of an Epic, hosted by John Larroquette. All 5 episodes have been streamed instantly on Netflix since the 3rd week of August 2012. It was the first time the series had been presented in a single episode format since its initial airing on NBC. On March 19, 2013, after years of not being available, Mill Creek Entertainment re-released the full miniseries and presenting miniseries as five separate parts. Also on that day, it was offered on Amazon. On November 3, 2015, Mill Creek Entertainment released Blu-ray The 10th Kingdom - 15th Anniversary Special Edition, marking the first high-definition released in February 2000 by Hallmark-Kensington Books, was written by Kristine Kathryn Rusch and Dean Wesley Smith under the name Kathryn Wesley. Novel based an early version of the script; copies; only a few differences exist between the novel and the film, with mostly minor changes in conversations and other minor details. For a number of years, it was available in a package with the VHS release of the film and the soundtrack, but now it has run out of prints. Varèse Sarabande released a soundtrack album on compact disc, with Anne Dudley's soundtrack and Wishing on a Star cover of Miriam Stockley being heard through the opening title and the final credits of each episode.
