Tanix offers a great Android TV Box on budget. Now, if you don't already know, the Tanix TX6 TV Box runs on an Allwinner H6 processor as well as 4GB of RAM and a 32GB ROM. There may be a couple of reasons why you might be willing to do so. For example, you might be someone who has tried any other firmware on your device, or maybe you have some issues with your device. Be that as it may, the thing is, you want to install the warehouse firmware on Tanix TX6 TV Box and want to do it quickly. So today, in this post, we cover how to install Tanix TX6 TV Box Stock Firmware. If that sounds interesting, we'll jump right into it. Should we? the main features of the allwinner H6 processor in Tanix TX6 TV Box Android 7.0, up to 1.5 GHz, Quad-Core, ARM Cortex-A53 Mali T720 GPU 4GB DDR3 RAM + 32GB/64GB EMMC ROM 2.4GHz + 5.8GHz Dual Band WiFi 100Mbps Ethernet Support 6K ultra HD image display H.265 Decoding Benefits Installation Stock ROM Here are some advantages of installing stock ROM Tanix TX6 TV Box: You can disconnect the bricked device. To fix the startup loop problem, install the stock ROM. Updates or downgrades the rating. Fixing errors will be delayed on your Android device. This software update will help solve the problem with WiFi, Bluetooth and others. Firmware Details: Package Name: Tanix TX6 Firmware Package Firmware Package Firmware: Tanix TX6 TV Box File Size: 686 TT/795 TC Processor: Allwinner H6 CPU Android OS: 7.0 Nougat Today, the market is full of affordable Allwinner H6 TV boxes that can be used to browse the Internet, play multimedia for photos/videos, and even play video games. The digital electronic product manufacturer launched a new Android TV box called Tanix TX6. The console has improved two-band Wi-Fi with 2.4GHz + 5GHz Wi-Fi, Bluetooth 5.0 and has 4GB of RAM with 32GB of internal storage. Support for 4K and 6K displays is a great addition. In this article, we will give an objective overview of Tanix TX6 and explain its pros and cons. We'll make sure you get the best value for money. Go buy your own Tanix TX6 TV Box from this link. What to look for when buying an Android TV box? When you are looking for Android TV Box, you will find a lot of options. Many manufacturers put the specifications front and center on their website, even the bad ones. So you should know what to look for1. ProcessorKoree large companies make android TV box processors: AmLogic, RockChip and Allwinner. AmLogic is the most common of the three, while RockChip-based devices only look great on paper. Allwinner is known for promising many things but not delivering at the last minute.2. MemoryMemory makes the operating system go, so the more, the better. However, you can practically use a lot of RAM, and at the moment it is 4 GB. Everything else is jätreå.3. Storage There are smartphones with 128GB and 256GB on the market. But most TV boxes are still stuck at 16GB. The reason is the cost, and the fact that we use Android boxes for streaming helps. There are a few TV boxes with 32GB of internal storage, which helps if you're a player.4. Wi-Fi &amp; EthernetEnsi before choosing Android TV Box, make sure it has at least 802.11 ac or Gigabit Ethernet, which is still the preferred way to connect to the Internet.5. HDMI 2.0 Investigation is necessary if you want to play 4K content in 60 seconds. Some devices have older HDMI 1.4, where you are limited to 30 images per second. So, better to choose HDMI 2.0 port and future insulation for your device. Tanix TX6 Android TV Box ReviewAppearance &amp; DesignThe Tanix TX6 is made of ABS plastic material that is shock resistant design plastic. is quite compact and painted in a black color with the company name on top. Console Console a front screen indicating that it is performing its current operation. There is an external antenna Wi-Fi antenna that is convenient if you keep the box away from the router with a visible USB 3.0 port nearby. We can see the USB 2.0 port, HD output, power input, Ethernet port and SPDIF port behind. The box does not weigh much 0.180 Kg when the dimensions are 7.70 x 7.70 x 1.70 cm / 3.03 x 303 x 0.67 inches. Hardware Hardware is one of the strong points of the Tanix TX6. It's got an AllWinner H6 SoC, quad-core with SoC ARM Cortex-A53 processor clocked at 1.5GHz and paired with ARM Mali T720 GPU graphics unit capable of processing video up to 6k at 30 frames per second and 4K at 60 frames per second thanks to the Allwinner Phoenix 3.0 video accelerator. The GPU comes with two Core Shader dyes that allow it to keep up with demanding 3D games. It also supports HDR10 and HLG DHR Smart color 3.0 display system technology that gives you a clearer video output. (HEVC H.265) decoding is a support, resulting in detailed and improved images for considerable clarity. TV Box includes 4GB of DDR3 RAM and 32GB of eMMC storage, which can still be extended up to 128GB microSD card slot. The combination makes big games come true without delay and provides a smooth experience of other activities while providing security benefits. It also supports the 5.1 surrounding audio output, providing an improved surrounding and realistic audio experience. By default, the device works on Android 7.0 Nougat, which allows you to install numerous apps for an incredible viewing experience as well as multimedia games and games on your TV. Since Tanix is a well-known brand, we can expect firmware updates from time to time. The Tanix TX6 comes with a new user interface, alice UX, which comes with many new features. There is App Express Manager, main function bar, favorite apps, and you can check the weather data for up to 7 days. OTA updates are completely independent of the operating system and are automatically updated to the next version automatically. Update: Tanix delivered the update as early as December. But this update needs to be installed manually. Here's Update Download Post and Installation Instruction Post.Update 2: Tanix has promised to offer Android 9 Pie TX6 in Very Soon.In the wireless section, it is compatible with 5G Wi-Fi, also known as Wi-Fi 802.11ac, which is the best stand for downloading movies, series and games. It comes with multilingual Bluetooth 4.1. For connection, it has a USB 3.0 port, USB 2.0 port, microSD card reader, SPDIF digital audio, HDMI 2.0 port, and 10/100 network connector. In the Hands-OnTanix TX6 TV Box, we installed Android games such as Amazon Music, Kindle, Prime Video, Gaana, Norton App Lock, as well as some common games. All went smoothly without interference. The user interface is smooth, and it is very easy to get around. However, setting the pin code or password did not work. We tried some app locks, but they no longer worked properly like the Norton app. The Norton app seems more reliable than everyone else. You can also use the cast screen from your smartphone. Prime Video and Music works perfectly and I couldn't find any problem in the multimedia department. The button on the box needed the help of a needle to restart to recover. When we tried to encrypt the phone, it got caught in the boot loop. These minor problems other than Tanix TX6 TV Box worked well. Update: After checking, we found out that the device is already rooted, which can cause conflicts during encryption. In the meantime, that's good news. Here are some of the best Android apps, not in the Google Play Store.Compared to other TV boxes like EACHLINK H6 Mini and Beelink GS1 6K TV Box, Tanix TX6 packs better hardware configuration and better price. The above boxes have a configuration of 3+ 32GB and 2+ 16GB, while the TX6 is at the top of them with a 4+ 32GB configuration. Accessories &amp; packaging The retail box is quite similar to what we usually see in other TV boxes.
