Lexus ct200h used near me

From the first moment I loved the shape of the vehicle. It's a sporty, coupe-like exterior that drew me in, and the logo just made me more confident about the value of my purchase. I've owned this car for two years, from 45,000 miles to 90,000. I drove across the states with him and in town. She never educted, she never made a funny sound, and she was never reliable. In the city, the car easily gets at least 40mpg. On the highway, usually closer to 35mpg. Either way, I generally get 375 miles of 8.5 gallons (from a 12-gallon tank) that has never cost me more than \$25 to replenish. I never worry about prices at a gas station with this vehicle: it's a luxury hybrid that doesn't require premium fuel class. The only thing I don't like about this car is size. It's very small - two people and their bags easily fill the car. However, small size is what makes it so economical and sporty. You're in charge of all the new, first hybrid customers: I was just like you before this car. I've never driven a hybrid car before. Take my word for it, driving a hybrid vehicle is completely different than driving a standard oil one. Hybrids have regenerative braking. Brake sounds... it's not unpleasant or extremely loud. But you can hear them! It almost sounds like a little whoosh. The regenerative brakes are amazing. My car is six years old and still has brakes comparable to those of a brand new vehicle. When I first got the car, I didn't know how quiet the electric motors were. So when I stopped in the garage, suddenly, my car started making a sound that you would expect to come from a UFO! It was almost like a little tune, if you will. Everyone was confused and we thought the car was malfunctioning, but we were wrong! When you drive slowly and use an electric motor, the car plays a foreign sound tune so people know the car is coming. In this way, people are ready and less likely to step in front of a moving vehicle. My favorite thing when it comes to the vehicle, in addition to the reliability that comes with the Toyota Brand, is the economical characteristics. With three modes you can switch the car to anytime (sporty, eco and normal), engine shifts to be more eco friendly or drive more sporty.. With sport mode, the car is definitely freer and accelerates faster. In eco mode, the car is toughest and accelerates more slowly. The interior of the car feels sporty, with a stitched leather steering wheel and leather seats all around. The color of my vehicle is metallic gray and the black leather seats complement the exterior of my vehicle. This vehicle does not accelerate at the speed of an oil vehicle. Should it, because the electric motor theoretically has more torque? Yes. But if you are not in sports mode, this is not the case. I suppose that's what keeps the car in a more economical state, but never less, it's Keep this in mind when accelerating on highways. This vehicle does not accelerate at the speed of an oil vehicle. Should it, because the electric motor theoretically has more torque? Yes. But if you are not in sports mode, this is not the case. I suppose that's what keeps the car in a more economical state, but never less, it's an adjustment. Keep this in mind when accelerating on highways. Our expert assessmentSuch what our expert review team says about this CarSafetyFeaturesReliabilityInteriabilityInteriorVenaZamation:Operating costsSafetyInteriorProformanceSafeiabilityInteriorProformanceIn the case of rivals you are looking at other premium hybrid cars such as the previous generation GolfUwer GTE or more conventional hatchbacks such as bmw 1 series or audi a3. Lexus is generally a fraction more buy than its traditionally-powered rivals, but significantly cheaper than the Golf, although it should be stressed the Golf has more power and can be plugged into recharging batteries, unlike the Lexus. The new Golf GTE will also be a plug-in. This would give Volkswagen significantly better fuel consumption, depending on how it's driven, although for the company's drivers the main savings will be in Benefit In Kind. Although the CT 200h benefits from good fuel consumption and low CO2 compared to the similarly priced A3 or 1 series, Lexus sales figures are not as strong as Audi or BMW. The cost of servicing is likely to be roughly similar to its competitors. Overall, don't expect massive savings on behalf of its hybrid

Carfax Vehicle History Report™ help you identify hidden faults and thus protect you from possible costly errors. CARFAX is the world leader in vehicle history. For more than 30 years, millions of used car buyers have relied on carfax's vehicle history report™ every year to protect themselves from fraudsters and make better purchasing decisions. If you are also interested in importing used cars from the USA, do not take any risks when buying! Always check your vehicle history before making a purchase with the original Carfax vehicle history ™. Millions of customers in America rely on the Carfax Vehicle History Report™ for relevant information from america's past. Since 2007, CARFAX Europe has also been helping buyers of importing vehicles from the USA in Europe to make better purchasing decisions. In addition, CARFAX encourages used car dealers and U.S. import specialists around the world to demonstrate transparency to their customers and to be able to buy and sell used cars from the US with greater certainty. With more than 20 billion records and the help of thousands of partners and resources such as ministries, car dealers, insurance companies, and many others, CARFAX has built the largest database of historical vehicle data worldwide. CARFAX's mission is to make the used car market more transparent for all parties. As an independent source of how used car buyers and sellers benefit from the CARFAX CarFax Car History Report™ and no used car from the US should be purchased without looking at its vehicle history. Before buying, I learned from CARFAX that my car had 2 accidental damages, 1 of which was total damage with an airbag and side airbag. So saved a lot of trouble for 60 €. Bernd Meyer Morning Decision I had a great idea to try to get the CARFAX report. Immediately on the Internet, with Creditcard paid and in 10 minutes I had a message. Warning! Problem found: Total reported loss, issued title/certificate. vehicles imported from California to Lithuania. Peter Stoll CARFAX helped us in 2017 not to throw us into misfortune and in 2018 CARFAX helped us become happy owners of our car. Babs has been with us for several weeks and we will have a lot of fun with the car. Without carfax's request, we'd be somewhere with a lawyer right now, arguing. Anonymous Previous Next Do not even think about buying a car anywhere else! 5 5 5 5 4.4 (16 reviews) Searched for two weeks for a specific subie. What's running out steam and ended up chatting online with a rep to see if SoL had the trim package I was looking for. It wasn't in their inventory, but 15 minutes later I got a call from TODD, the sales rep, he tracked one down that just arrived on their truck! He got it in inventory, ready to drive, and our paper work practically overnight!!! Let's not forget that we contacted them at 5pm... He came, Len passed us all the functions (SUBIES ARE LOADED NOWADAYS), ran through finance with Zach and took our new baby home!!! Its PERFECT, they're the perfect car was exactly what I needed. Small, well powered, up to date, beautiful interior and exterior. I am very satisfied with the purchase of this car. 5 5 5 5 4.9 (388 reviews) I had the transfer go out & was at a loss of what to do My husband and I went to Dellenbach on a Saturday to see if they had anything I liked in our price range. That's when Ben Fitch welcomed us. He took us to a few cars that were in my price range, but not quite what I was looking for. He said he'd call us if something came up that we might like. 3 days later they called me to say that a car had arrived which was all I wanted & within my price range. I told him I'd come after work and check it out... I really didn't expect it to be all I wanted, but it really was! I still had a car loan that transfer went on, but they helped me take care of this loan & got me approved for another loan in no time. Ben was a gem, Steve & Mike were also very helpful in the process. I've never bought from a dealer before, but as long as I live in Fort Collins, Ben & Dellenbach are my people! I'm almost looking forward to buying my 15-year-old car next year... And I never thought I'd say it! The style of the car from the exterior has a lot of appeal, the interior is fine. The appearance of a modern car is missing. Overall, the car is comfortable to ride, smooth suspension and get a great MPG. You can expect a lot from the Prius hybrid engine in this luxury car hatchback. 5 5 5 5 4.1 (114 reviews) Stopped on Saturday (3 September) on a whim to look at cts-v after not coming to an agreement on a car at another dealership. Shaun the salesman approached me right away and it was easy to talk to, and looking at the car brought to my attention another one that just got with a few other options. One of the things I hate the most is the hour-long back and the fourth during the price negotiations (which I just dealt with at the previous retailer). They gave me the asking price, I made a counter offer that I thought was fair for both parties and a deal was made. The salesman and Rod's financial manager were easy to work with and after I noticed a few things I missed during the paperwork, they had no problem running through it again and fixing the problems I had. Will recommend them to anyone who is in the market for a fun car Best car I've ever driven! I rented a CT200h FSport for 3 years, and had the biggest driving time of that car. It was small so I could find parking virtually anywhere. My MPG was always over 42, which was a big factor because I drive a lot. For the times when I needed to speed up, Sport mode got me where I needed to go in no time! The sound system was great; had a USB, AUX and CD player (which unfortunately cars don't often have anymore). In the 3 years I've been driving it, I've never run into a single problem with my car: I only took it a few times to change the oil and turn the tires. All in all, I would definitely rent or buy this car again, in no time if they decide to produce it again... Vehicle available to send to your home. Laugh at the dealership for details. Hybrid for enthusiasts Look like a car guy, I swore I'd never own a hybrid because most seem boring, awkward looking, slow, and just not fun to drive at all. That being said, recently our commute has increased to 80-100 miles per day, so gas mileage and practicality has become a priority. We drove a Hyundai Ioniq, Ford Fusion Hybrid, Kia Niro and Honda Insight, and each of them had victims. Then we came across this used CT200h, and took it for a ride. A day later, we came back and signed the papers. This car has already taken me into the hybrid world. Yes, it's still slow. It's still a Prius power unit, after all, with a CVT. But the feeling of steering and suspension is great, the throttle response is good in sport (you also love the hidden tachometer), the brakes are a bit of a change, but you adapt pretty quickly... It looks good, has the practicality of a hatchback, has a soft, luxurious feel to the interior of a Lexus, considered about toyota reliability. It's not fast by any standard, not even for a hybrid these days, but it's still fun. It's got a bit harder ride than you'd expect from a Lexus, but I attribute it to the fun of driving aspects of suspension. That's a fair deal for me. The interior is quite comfortable, albeit tight in the back seat, especially if you have a passenger or driver over 6 feet tall, and the trunk is not very large, but there are folding seats, and we don't have rear passenger seats often. Overall, this car is great. It gets around 41 mpg on our typical commute, it's fun enough to drive, convenient and practical. I'm happy with it, and when I come from a gas head, it's worth something! Stapp Interstae Toyota Scion is a five star dealer 5 5 5 5 4.8 (323 reviews) Please note that this survey covers my response to service data: 06/25/2014, 10/29/2014, 03/25/2015, 09/04/2015, 01/26/2016 and yesterday 07/14/2015. (1) Always in ask about receiving a vehicle for service appt. (2) Always below or on their estimate of the time to complete the service. (3) The staff are so polite, considerate and go an extra mile to ensure that all communication regarding my requirements and the condition of my vehicle. (4) They always offer a car wash that goes a long way again an extra mile in my mind. (5) I love the parts department. I always browse and chat with counter people there, and find things that are great accessories for my vehicle, and will prolong the quality of life of my vehicle. Fast delivery of goods. (6) From the sales staff, to the purchasing process, to the items offered during the sale to maintenance, the entire staff of Stapp Toyota ensured that I would be a lifelong customer of this dealership and service center. (7) Amenities available while my service is finished: Separate workspace with computer access, coffee and snack counter, nice clean bathrooms. It was worth buying. I was looking for a hybrid to replace my ES 350, and decided on a CT 200 h. I was afraid I would feel comfortable in a small hatchback, but once I adjusted the seats and steering wheel, it was comfortable. He went from Philadelphia to Berlin NJ, to Dover De and back to Philadelphia and burned only 4.3 gallons of gas. Amazing all that driving and just 4 gallons of gas, I drove over 200 miles!!! Plus, I like sports mode, great car. The only thing is the noise in the cabin is loud, but turning on the sound system negates this problem. Glad I brought it, will recommend this Lexus to anyone who has to drive long distances to work like me... Stevinson Lexus from Frederick is excellent! 5 5 5 5 4.7 (876 reviews) I had the pleasure of meeting Chris Rogers approximately 5 years ago. At the time, the lexus I was looking for wasn't very specific in Stevinson's inventory. However, Chris took the time to review a similar car, and that information proved invaluable to me eventually finding the very complex-to-find car I was looking for. Fast forward 5 years and finding our family for our next car... there was no doubt that I wanted to check on Stevinson again, and i will specifically see to it that Chris was involved. I'm so glad I did! When I reconnected with Chris, he remembered who I was, despite the fact that we couldn't make a deal five years ago. Phenomena!!! My experience working with Chris this time was more exceptional than I expected and more excellent than the Lexus vehicles he shares with his customers. I am a very specific buyer and I knew exactly what I could or could not agree to in order to complete the transaction. Chris was equally transparent and this made the car buying experience a real pleasure. While Chris deserves many awards, the same can be said of his sales manager, Dave Alengi. With the used vehicle I chose, Dave was involved in solving some of the detailed requests I had, and he was very patient and understanding in that. I am extremely grateful for Dave's involvement in this transaction. I'll also mention Anthony Munoz. Even though we only spent about 20 minutes He was finishing the deal, he was fantastic. I have never completed a car transaction so quickly and easily. Thank you, Anthony! Thanks also to detailer Tony, who helped make my used car look like new, and the people in the parts department who are helping me in my quest for a sneaky piece for my next Lexus. Again, this is an excellent representative of Stevinson Lexus who work very hard for the customer... and it shows. To be clear, Stevinson Lexus has a full number of team members who are making customer experience what they should be. From the people I've dealt with over the years in the garage and the parts, and now... with the sales team... I know there's a clear commitment to a customer from Steveinson Lexus of Frederick. I am extremely grateful for this and look forward to buying more cars in the future. Everyone on the team... my very honest thanks! Rick W. Reliable hybrid car that should not be considered a luxury car. It's a Prius with the Lexus logo on it. I've driven several Toyota & Hyundais in the last few years that have a better drive and feel more luxurious than a LexusCT 200h. 10 On page 20 of Page 50 On page 100 per page * Name, additional fees and incentives are not included in this calculation, which is only an estimate.
