Code 96 a4v

VIN (Vehicle Identification Number) is a vehicle identification number consisting of a combination of digital and letter settings. This code is a mandatory labeling element and is an individual for each vehicle (for 30 years). It all began in 1977, when ISO 3779 standards were adopted in the United States and Canada, describing the VIN number format. Currently there are international standard ISO 3779:1983 (last edition - from 1996), the world manufacturer's index (WMI - part of the code) is determined by iso 3780:1983. Identification numbers are located on the body parts that cannot be removed in the least vulnerable places of destruction in an accident and tricked on a sign located at the front of the car. VIN modern cars are located on the front left shelf of the body and the top left torpedo. In the case of consistent manufacturing of vehicles by several enterprises, it is permissible to apply the main sign of the vehicle only by the manufacturer of the final product. The VIN number consists of 17 characters - latin letters and numbers. At the same time, the combination of code does not use me, O, and I'm characters because of the similarities with numbers 1 and 0. Each VIN number symbol contains information about certain characteristics of the car: country and manufacturer, release date, technical characteristics, and other VIN car numbers consisting of three parts: WMI VDS VIS WMI (World Manufacturer) - world manufacturer index (from 1 to 3 symbols of number); VDS (Vehicle Description Section) - descriptive parts (from 4 to 9th number character); VIS (Vehicle Identification Section) is a key feature (from number 10 to 7th VIN) WMI WMI is an international identification code of manufacturer. three characters (letters or numbers). The first symbol means geographic region, the second - the country in this zone, the third - a particular manufacturer (sometimes - type of vehicle). If the manufacturer emits less than 500 DTS a year, the third cod symbol is number 9. Some WIS may be given to manufacturers, but the same number is prohibited from being attached to other car manufacturers for at least 30 years from when it was first used by the manufacturer (first). Thus, the first WMI symbol is a letter or number representing the geographic region cod. Each zone has several characters: from A to H - African; J to R - Asian; From S to Z - Europe; 1 to 5 - North America; 6 to 7 - Oceania; 8 to 9 - South America; The second symbol (country combo) is a letter or number indicating a country. Ensuring flexibility and certainty in the identification of certain, Certain countries are determined by a combination of first and second cod figures: Africa AA-AH South Africa AJ-AN Ivory Ba-BE Angola BF-BK Kenya BL-BR Tanzania CA-CE Benin CF-CK Madagascar CL-CR Tunis DA-DE Egypt DF-DK Maghribi DL-DR zambia EA-EE Ethi-EK Mozambique FA-EK FE Ghana FF-FK Nigeria Asia JA-JT Japan KA-KE Sri Lanka KF-KK Israel KL-KR South Korea LA-LO China MA-ME India MF-MK ML Indonesia-MR Thailand NF-NK Pakistan NL-NR Turkey PA-PE Philippines PF-PK Singapore PL-PR Malaysia RA-RE UAE Taiwan RL-RR Vietnam RS-R0 Saudi Arabia Europe SA-SM UK SN-ST Germany SU-S Poland S1-S4 Latvia TA-TH Switzerland TJ-TP Czech Republic TR-TV Hungary TW-T1 Portugal UH-UM Denmark UN-UT Ireland Romania Law U5-U7 Slovakia VA-VE Austria VF-VR France VS-VW Spain VX-V2 Serbia V3-V5 Croatia V6-V0 Estonia WA-W0 Germany XA-XE XF-XK Греция XL-XR Нидерланды XS-XW СССР/CHГ XX-X2 Люксембург Х3-Х0 Россия YA-YE Бельгия YF-YK Финляндия YL-YR Мальта YS-YW Швеция YX-Y2 Норвегия YЗ-Y5 Беларусь Y6-Y0 Украина ZA-ZR Италия ZX-Z2 Словения Z3-Z5 Литва Северная Америка 1A-10 США 2A-20 Канада 3A-3W Мексика 3X-37 Коста Рика 38-30 Каймановы острова 4A-40 США 5A-50 США Океания 6A-6W Австралия 7A-7E Новая Зеландия Южная Америка 8A-8E Аргентина 8F-8K Чили 8L-8R Эквадор 8S-8W Перу 8X-82 Венесуэла 9A-9E Бразилия 9F-9K Колумбия 9L-9R Парагвай 9S-9W Уругвай 9X-92 Тринидад и Тобаго 93-99 Бразилия Несмотря на параметры, четко прописанные в стандарте, обозначение, закрепленное за страной-производителем используется не всегда. For example, European branch car General Motors, headquartered in Germany, is labelled a W0 regardless of the manufacturer's country (either Germany, Spain, Great Britain, Belgium or Poland). The third symbol is letters or numbers, assigned to manufacturers by national organizations. It can also mean the type of vehicle or production department. Number 9 as the third sign is used if the manufacturer produces less than 500 cars a year. As well as national identification, the definition of the plant requires the knowledge of all three WMI signage. For example, here's a WMI code that matches some plants located in CIS: WMI Enterprise XТААUТАVАЗ ХТVMoskwich ХТСКАMAS ХTD, Y6LЛуаз ХTEAZ, X96 Газ ХTJ SES ХTK 1zhAuto ХT Х7M Tagaz Х1C Kraz Х7D RosLada Х9L GM-Avtovaz Y6A LA in other geographical areas, The manufacturer has the following indicators: 1 - Chevrolet A - Mitsubishi (USA) G - General Motors N - Infinity 2, 5 - Pontiac B - BMW H - Acura N - 3 - Oldsmobile B - Dodge H - Honda O - Opel 4 - Buick B - VW (Brazil) J - Jeep P - Plymouth 6 - Cadillac C - Chrysler J - Mercedes Benz (USA) S - GM Canada D - Mercedes Benz L - Lincoln S - Suzuki 8 - Ferrari M - Hyundai T - Lexus A - Audi F - Fiat M - Mercury T - Toyota A - Jaguar F - Ford M - Mitsubishi U - BMW (USA) A - Land Rover F - Subaru M - Skoda V - VolkswagenV - Volvo VDS Second part VIN code - description - car , 5th, 6th, 7th, 8th symbol, 8th symbol is used to determine the type of vehicle and describe the characteristics of the vehicle: the model line, body type, engine type, steering wheel position, power system and transmission type, driving, etc. each manufacturer has its own parameter set, own sequences and unique design. The 8th symbol is used in most cases to determine the type of engine. Unused positions are filled with signs at the manufacturer's discretion. The 9th symbol - from U.S. manufacturers and China (as well as those exporting cars to the United States) - control figures, which are one way of protection against number disruption. European, Japanese and Korean companies do not always follow the standards, and use this symbol for additional information about cars. VIS The third part of VIN - the identification number pointer (VIS) - consists of eight characters, and the last four marks of this section must be the number. At the same time, information about model years and manufacturers is set by non-rigid standards, but only recommendations. The 10th VIN symbol usually refers to the year of the car model. At the same time, it is worth noting that the year the model can overcome the calendar significantly and calculated not from January 1st, but, to From August (Audl) or from July (Vaz) previous calendar year Some manufacturers such as Renault, Mercedes-Benz, Toyota model of the year in the VIN code did not specify at all. Years of release are listed on the mark on the body. However, cars produced for the American market are all strictly marked according to the standards. Year of Liberation of the Year. 89 K 2004 4 19755 1990 L 2005 5 1976 6 1991 M 2006 6 1977 7 1992 N 2007 7 1978 8 199 3P 2008 8 1979 99 1994R 2009 9 1980 A 1995S 2010 A 1981 B 1996T 2011 B 1982 C 1997V 201 Other than three letters (I, O and Y) were not used to encryption model years in addition to those prohibited in VIN, letters that you also don't use to enccod model years, It was 0. Ford's European branch in the VIN code has the most complete release date: the 11th position is the year of release, and the 12th - months. Ford production date: The 11th symbol most often points to the vehicle assembly plant (for each manufacturer - its own setting system - its letters). The 12th, 13th, 14th, 15th, 16th, 17th characters are assigned to the car's serial number. They showed a sequence of vehicle production. Examples of Audi VIN code (from carinfo.kiev.ua website) No n p/p Description WMI 1 LFV - produced in China TRU - in Hungary WA1, WAU, WAV, WUA - in Germany 2 3 VDS 4 z - fill in empty seats. In the VIN code for the American market in the 4th position is the model line-up, on the 5th engine type, and at the 6th - security system. 5 6 Range:43 - 100/200 (...-1982)43 - 5000/5000S, Turbo (1983)44 - 100/200 (1982-1991)44 - 5000S, 5000S Turbo, 5000CS Turbo Quattro (1983-1988)44 - V8 Quattro (1989-1991)4A - 100/S4 (1990-1994)/A6 (1994-1997)4 (1997-2004) S6 (1995)4C - V8 Quattro (1992-1994)4D - A8 (1994-2002)4E - A8 - A6 (2004-)4H - A8 (2010...) 4L - Q7 (2005-)81 - 400082 - 80 (1972-1978)85 - 80/90/Coupe/Quattro86 -50 (1974-1978)89 - 80/90 (1990-1992)8A - 808B - Coupe Quattro8C - 80 (B4 (1991-1996)/90 (1993-1994)8D - A4 (1995-2000/11) A4 Avant (1996-2001)8E - A4 (2000/12... 2008)8G - 90 Cabriolet (1994)8J - TT (2006...) 8K - A4 (2008...) 8L - A3 (1996-2002)8N - TT (1999-2006)8P - A3 (2003...) 8R - Q5 (2008...) 8T - A5 (2007...) 8Z - A2 (2000-2003)9L - A3 (2003...) 8 9 Свододынак Z. Such methods are sufficient: remove and replace some or all of the tagging panels (there are different ways and options); add elements to signs similar to those that have the same as that. 1 switch to 4, 6 or 3 in 8); - dilute additional elements, turn on, for example, 4 in 1, 8 to 3 or 6. Signs of VIN-code burst detect surface processing and putty omissions in the tagging area; increased thickness of the coriander or panel; welding seam on the tagging panel; a sign with its display behind the panel; blurry signs, and blurred signs, and the depth signs of different signs; Foreign strokes and differences in performance of the same score; differences in paint dyssticks and adjacent areas; , universal, the principles of deciding on the VIN code - see above.
