Metabo angle grinder parts

Copyright © 2021 eReplacementParts.com Inc. All services from the previous all-in service will now be transferred to a free full service. And best of all, the scope of the service is expanded by name change to include free theft protection. True partnerships always start with listening to us. That's why we have developed and expanded our service concepts with professional retail partners and industrial companies. In addition to repairing at a proven fair fixed price, we now also offer full-service packages with all-round tranquility protection – for more planning and cost security. Repairs are performed without a simple estimate. Save time and processing effort with a fair fixed price or service batch sum. With a 3-year XXL warranty on Safe mains and battery machines and a 3-year warranty on battery packs, Metabo already provides above-average service for free. After repairing from smart service, we offer a 6 month new warranty on the entire machine with additional safety commitments. FairThe fixed repair price and full service package are scarce and fairly calculated. Metabo trusts its own quality and offers a free 3-year XXL warranty instead of the usual 1-2 years - a simple registration is enough. Whether metabo's LiHD or lithium-ion battery packs: Free 3-year warranty without limiting charging cycles. Larger investments are now easier to fund through fair insane payments. If you have questions about ordering replacement parts, repairing tools, using or following up repairs, please call Metabo's U.S. Corporate Services Department in Westchester, Pennsylvania at (610) 436-5900. Provides a full line of spare parts, metabo power tools. Sending tools for repair has never been so easy! Select a tool from the list, process your order, and use the shipping label provided to process the tool quickly and handle the rest! The tool is sent back in time. In addition to resolving the reported issues, the tool is completely repaired and maintained. Buying Metabo Parts Spares and Accessories Metabo is a german power tool manufacturer who is well aware of the highest quality tools for trade and industry. These machines are generally well made and designed to last longer. Our business relationship started with them about 12 years ago and we found the pleasure they could deal with. Metabo has a long-standing reputation for making great percussion drills [sbe 750], angle grinders [wp 8-115], grinders, random orbital Sanders [sxe 450]], rotating demolition hammer, wireless drill. In fact, precision keyless chucks mounted on training set industry standards. Using lithium iron battery technology, we have developed a family of outstanding new wireless power tools. The voltages of the machine range from 10.8v, 12v, 14.4v, 18v, 24v and 36v. Other features include wireless switches, ESCP electronic single-cell battery protection, marathon motors and cord security systems for wired tools. Over the past few years, Metabo has acquired Elektra Beckum, a German manufacturer of wood processing machines. This was a logical move to bring elektra Beckum's tried and tested machine model to broaden the metabo product range. Electra Vecum has existed in the UK for many years and was particularly famous for its BAS 315 bandtop, KGS 300 slide mittar top, HC260 planner thickness, TKHS 315 site saw, TF100 spindle molder, SPA1000 dust extractor and PK 200 top bench. Initially their machine was sold by Record Power and their BAS315 record dmb65 drill master bandtop was renamed. Eventually Elektra Vecum was branded by Metabo in favor of the latter name. Metabo tools are made to a very high standard and are generally well worth repairing. We order most of our work from our UK headquarters in Southampton. Not all spare parts are held in this country, so allow at least two weeks to deliver from Germany to the UK. The most popularly requested parts for power tools are carbon brushes[316033670], drive belts, Velcro sandring bases [31 224, 31 219, 31 158 or 33916040], switches, high-star, field and gearbox and motors for wireless drills. We sell a lot of specific spares for this machine because of the large number of BAS 315 and BAS 316 band saws. These include the 1009018022 top roller guide, 7232055833 wheel tires, 1009009570 bottom blade guide, and 7233190017 drive belt. There is some dexterity to attach the tires to the bandtop wheels. The size of the tires is small to stay on the wheel. Tires should be soaked in hot water to stretch over bandtop wheels. When they are singing they contract to fit firmly. Band saw days for this machine are also very popular. The band size is 88[2235mm] and the blade can skip teeth in sizes 1/4, 3/8, 1/2 and 5/8. For other popular spare M8 x 20mm left hand thread blade bolt 1395207098 KGS 300 mitre saw, Table Design 1381406667 TKHSSSS315M Site Saw and Disposable Planner 0911030713 Blade HC260 For Planner Thickness. The drawings displayed on the website are currently the best to use, and unfortunately not all drawings are easy to follow. There may be no price next to some parts, which may indicate a numeric change later or a longer available status. Please contact us. Enter your model number here: Don't know the model number?
