Critical chance: Damage Point StrikeCritical: Vital SenseCritic Damage on Zoom: Bladed RoundsStatus effect for Eidolons.Eidolons is said to be best affected by radiation damage. Electricity: StormHellfire: Heatthese two can change out depending on your goals. Build is discussed in the video below. The overwhelming over that construction will focus on the rock-bottom of any boss at Eidolon in plain in Eidolon. Building requirements because of low speed reload and fire-rate, is a fire-rate mode: Vile acceleration is required. Arcane Momentum Arcane Momentum40 Odds Increases the Reload Speed on Gun Type Sniper by 100% to 8 Circle Criteria: On Critical Hitting Is Rubicos Best Friend, The recall carries it. Rubico Gun First Rubico the First Rubico First Award is the Variant of Gun-style Rubico Sniper Rifls, doing higher damage, critical chances, status odds, fire rates, and speed reloads . but with a reduction in zoom. Here are the strategies: Shooting at the bedtime when the shield of Eidolon goes down when the cry of Eidolon goes in and keep shooting increasing Sniper Combo. The more drafted combo, the higher the multiplier's damage and higher chance for you to consistently shoot the Eidolon Synovia or 1 shooter Eidolon in his head. Note: Remember to have a hotkey for Ammo Pads. You'll waste a lot of ammo during strategy number 2 (read above). If you have no Riven Mode, then use Vigilante Amethy. RivenN Status Recommendation Required: +Critical Status, + Multishot Recommended: + Damage, +Electricity, +Heat, +Reload Speed, + Firerate, -Zoom, -Status Duration, +Weapon Recoil, -Damage of an action. Rubico Prime's weakness is a very slow weapon (slow firefighter or reload speed), the damage doesn't work well without buffs, low ammunition. You have to practice getting used to the 7x Zoom Whether you want maximum damage critical damage other things it would be hard to look at close range, which always happens to Tridolons running. ALL flurry shooting postsWhich is best for hunting eidolon? I've heard that the first rubico + chroma is one of the best eidolon set up, but I've also heard people say that Lanka + chroma is better which one should go for before I waste flat on format?and the lanka you have to hit a setin part of the members (the blue lines on the members) side and rubico you just hit the first limbRubico is far easier , no travel time, no charge time. Also there was a combo counter of 1, so you multiply damage going up immediately after first shot. I have a damn good river botched, give mililshot, warmth and cry damage, my friend uses a first rubico without streams, it generally takes out the synovas before I get the chance1The hit on the Rubico and Vectis is nice to make flesier for new players to hit bimbis. That being said, better Chromas prepare their membership and a Lanka can be a one to do. Rubico is typically 2 or 3 meves with no combo counter. The first 0Rubico is more noob-friendly. It's hitting, it's pulling is much more subtle and it's combo multiplier isn't depending on headshots. He also has the best stats Crit. Lanka on the other hand requires some getting used to. He had a load time and a ridiculous pull. You lose your load if you knock down. But it's pure electric damage, so it can be built into pure radiation. So she asked for investment time in your hand if you are totally new to the gun. With convenient enough and a good build, you can out-damage a rubico. If you don't have time for that, plain right jump in a rubicoYou doesn't need to pull through all the way, pulling through all the way just means you can find orange mg, crawling through either the 1st or 2nd you get yellow criticism. In my experience it's very easy to outdamage a rubico at first, it's time you get to compete with people with streams on rubicos that make it harder. The question of Lankas that can be changed by the player is that you have to charge him shortly before fires, making yourself afford it before pulling in with tireRubico and lanka are the most efficient tactical metaa a available (edited by DarkWolf147)0Ok guys resemble the rubico is my choice to just finish my journey to chroma first!0I know I have everything I need to use lanka for a while, then transition to the first rubico. Lanka is higher damage per shot, but he has a load time and travel time that can make it difficult in certain situations. Rubico has less damage per shot but can be more flexible in a hunt. I prefer the rubico but Lanka can still do the work if necessary. youtube.com/attrib... 2youtube.com/attrib... 2youtube.com/attrib...
