Diary of a wimpy kid the getaway read online

Why can't we give our own children the freedom we had growing up? Katie and I were riding bikes to Oak Park. We rocked on the swings and then we went to the prom. And I saw a snake! - me, age 9 I went cycling all the way through Swathmore... I went to Spring Field Park! - my friend, age 6 1/2 I went to Kerry on my bike alone! - me, also age 9 These are records from my and my friend's childhood diaries. Like many children growing up in the 1980s, we could ride our bikes unsupervised for hours at a time. She lived on the East Coast. I grew up in the Midwest. But the national parenting mo of the time was, let the children be children. Let them find their own adventures and deal with the challenges that come with them. In my case, Kerry's house was a mile from my house. The oak park playground was also a mile away. There were no sidewalks, and to get to both places I had to cross several streets, some of them quite busy as they connected different neighborhoods to each other. I'm sure there were no parents in that park. Just kids. Children ride bikes, play on swings, stick sticks in snakes. Itself. There's no adult in sight. I can't imagine those scenes taking place today. Can? If you are a frequent reader of this blog or parents magazine you know that we have been talking about the issue of children's freedom a lot lately. In the March issue, we launched a huge feature on how our culture has trained parents to keep their children close despite our instincts to give them more freedom. And in April, we showed frightening results when you give them more independence: Some busybody calls to the police undermine your judgment. Then this weekend it happened to my friend, the one whose diary entry talks about cycling around the city as a child. She let her seven-year-old daughter walk four blocks - across exactly one street - to a neighboring grocery store. Fifteen minutes later, two police officers and her terrified daughter were on her doorstep. They followed her home because they got an anonymous call that the baby was walking alone. Why was her daughter scared? Not from her little trip to the store. In fact, it was exciting! She was proud of herself for asking the salesman where the Easter egg was and for paying for it with her own money. What scared her was that the cops followed her in their car. She thought she was in trouble! Luckily the cops were understanding and didn't take the problem any further (although they did fill out the report). But still! When did a child walking alone in a safe, family neighborhood become a criminal? (I'm not even going to get into how low this city ranks on the national crime index. Besides, does it matter?) But even worse, I think of my boyfriend's daughter and my own children and how one day they will remember their childhood. Will Diaries are full of adventures like ours? Exploring their cities? Does he ride bikes for miles? Play in parks with other children and create your own fun without the hovering presence of an adult? I'm afraid the speed we're going won't. How sad is that? Do you have a diary or diary entry of your own childhood adventure to share? Post this in our Facebook comments! Chandra Turner is executive editor of Parents magazine. Bestselling children's author Jeff Kinney reflects on how he learned to enjoy reading and offers some advice for parents on increasing readers. If you have kids in elementary school, chances are you've seen Jeff Kinney's diary series The Wimpy Kid recently. These funny, thoughtful comic novels are everywhere: bookstores, classrooms, backpacks, and I even find them tucked under my son's pillow, because he often falls asleep when he reads them! Kinney just published the eleventh book in the series, Double Down, and to celebrate this, we caught up with him to talk about how he became a reader, how he raised his own children to love reading, and see what advice he might have for other parents. RELATED: 7 ways to encourage a love of reading How did you get into reading? I read a lot when I was a kid. I'd say I spent at least an hour a night reading. I grew up in a house full of books. My mother was an early childhood teacher so we had shelves full of award winning picture books. My sister had a whole Judy Blume canon, so I took one of them out of her room so often. But my father was most influential in creating a love of reading in me. He had heaps of comics from the 1950s and 1960s, and I liked to read and read them. What is your favorite children's book ever, and why? My favorite writer was Judy Blume. Her talent was in telling ordinary stories that were extraordinary. And my favorite book was Stories of fourth grade nothing because I could see myself in Peter Hatcher. How do you help your own children enjoy reading? We have a lot of books lying around, and hopefully mine being an author has some influence. We try to find books that are in line with the interests of children, so there are a lot of books about sports on my children's shelves. How are your Wimpy Kid books helping other kids learn to love reading? I think my books are entry books. They're halfway between picture books and picture chapters. They help with the transition. RELATED: 10 Best Children's Books of 2016 Any more tips for raising kids who love reading? Feel free to give your children books on topics they love, even if you don't share the same interest. Helping kids see that reading is fun is more than half the battle! Jamie Pacton writes middle class and young adult fiction, drinks lots of coffee, dreams of sailing, and enjoys every day with her husband and two sons. Find it in www.jamiepacton.com, on and on [Twitter@jamiepacton](https://twitter.com/jamiepacton). Diary series Wimpy Kid is a big hit with both boys and girls, aged 8 to 12 years. Billed as a novel in cartoons, Book One is the diary of protagonist Greg Heffley. (Greg is upfront in that he wants readers to know: This is a diary, not a diary and ... it was mom's idea, not mine.) The Diary of the Wimpy Kid, with its combination of words and caricatures, is particularly appealing to reluctant readers. Greg is one of three children. According to Greg, his younger brother, Manny, never gets in trouble, even if he really deserves it, and his older brother Rodrick is always getting the best out of Greg. In his diary, Greg details his daily activities, starting with his first day of high school and his warning to readers about choosing where to sit in class. What does Greg think of high school? They think it's silly because you have kids like me who haven't hit their growth spurt yet mixed with these gorillas who need to shave twice a day. Whether it's bullying, his friend Rowley, homework, or family life, Greg is always busy trying to figure out the angle that will make things work best for him. Author Jeff Kinney does a great job, words and pictures, illustrating the general goofiness that comes with being a self-centered teen, and the hilarious things that happen as a result. The Wimpy Kid's diary is Jeff Kinney's first book. While a student at the University of Maryland, Kinney had his own comic book, Igdoof, in the school newspaper. After college, he began writing the Wimpy Kid Diary and putting it online in daily installments on FunBrain.com. Then, publisher Harry N. Abrams signed Kinney to a multi-book deal to create a diary series of The Wimpy Kid for the Amulet Books imprint. Despite the success of his books, Kinney still has his day job working for an internet publishing company. As for how much the series is based on his life, Kinney said in an interview. that books are a mixture of his own family stories growing up, but with his own comedic spin on them. The book is lined with pages, plus Greg's writing and his pen and ink sketches and cartoons make it look like an authentic diary that adds pretty much to the reader's pleasure and relatability. If you are looking for a book with a main character that is the perfect role model for your child, this is not it. But if you are looking for a funny book your kids will like and identify with, grab a copy. The Wimpy Kid diary is best suited for tweens and younger teens. (Amulet Books, imprint by Harry N. Abrams, Inc. 2007. ISBN: 9780810993136) Since February 2017, there have been eleven books in the Wimpy Kid series, including titles such as Wimpy Kids: Rodrick Rules and Diary of a Wimpy Kid: The Last Straw. In addition, if Greg's diary inspired your children to try to write and draw, they will have the Wimpy Kid Diary: A book that involves writing and drawing challenges, with lots of space for kids to fill. ComicMix, Interview: Jeff KinneyWimpyKid.com, About the author of The Diary of a Wimpy Kid: Dog Days is the fourth book in Jeff Kinney's humorous series of books about high school student Greg Heffley and his trials and tribulations, most of which are from his own making. Again, as he did in The Diary of a Wimpy Kid, Diary of a Wimpy Kid: Rodrick Rules, and Diary of a Wimpy Kid: The Last Straw, Jeff Kinney created, in words and pictures, a funny novel in cartoons, even if the summer setting doesn't allow for the range of humor that the high school school setting does. As in other books in the series, the emphasis in Diary of a Wimpy Kid: Dog Days is on the general goofiness that comes with being a self-centered teen and often unexpected (at least to Greg) results. The Wimpy Kid Diary format has remained consistent throughout the series. Lined pages and Greg pen and ink sketches and cartoons work together to make the book look like a real diary, or as Greg would emphasize a diary. The fact that Greg has a somewhat goofy outlook on life and always tries to figure out everything to his advantage and justify his actions makes the diary format particularly effective. Each of the previous books in the series focuses on Greg's daily life at home and school. Each book also tends to focus on a specific family member and Greg's problems with them. In the first book, it's Greg's younger brother Manny who never gets in trouble, even if he really deserves it. While Greg also complains about Rodrick, his older brother, Rodrick won't be in the spotlight until his second book, The Wimpy Kid: Rodrick Rules. The third book in the series highlights the conflict between Greg's father's expectations and Greg's wishes. So it's no surprise to find Greg and his mother at odds in The Diary of a Wimpy Kid: Dog Days, but there are also some big conflicts with his father. What a surprise it is to find all the events set in the summer, rather than during the school year. According to Jeff Kinney, I'm very excited about 'Dog Days' because it takes Greg out of school setting for the first time. It was a lot of fun to write about heffley's summer vacation. (7/23/09 media release) However, the book loses something by not being fixed during the school year and not including the usual interaction between Rodrick and his brother. It's summer and Greg is looking forward to what he wants, with an emphasis on staying at home and playing video games. Unfortunately, it is not at all his mother's idea of summer fun. The difference between Greg's vision of a perfect summer and reality is the focus of The Wimpy Kid's Diary: Dog Days. Diary of a Wimpy Kid: Dog Days Will Be To middle-class readers, but probably under the age of 8 to 11. While Wimpy Kid: Dog Days is not the strongest book in the Wimpy Kid series, I think it will appeal to fans of the series. Kids reading the series know that Greg is over-the-top when it comes to being self-centered. They understand the relationship between cause and effect when it comes to what's going on as a result of Greg's poor judgment and find it amusing. At the same time, Greg's thought processes, while exaggerated, mirror those of many additions, which is also part of the appeal of the Wimpy Kid series. (Amulet Books, imprint by Harry N. Abrams, Inc. 2009. ISBN: 9780810983915) For an overview of all the books in the series, see my article [Diary of Wimpy Kid: Summary and new book](#). Book.
