The living last supper

Let's say Da Vinci put secret images into The Last Supper that were going to discover someone one day, as Slaviša Pesci did. Would a secret like that have any merit? What particular knowledge would Da Vinci have of Jesus 1,500 years after his death, and why would he hide it in a painting? Fans of the Da Vinci Code might say that the presence of paintings suggests that Dan Brown and other similar writers are on their way to something mysterious, fundamental and profound. Theories about Da Vinci's work are amplied in Brown's book, including many about the Mona Lisa. However, as our article On How the Da Vinci Code does not work shows, it is easy to dissuad many theories of the novel, which may not be surprising or important, except that Brown clearly represents his book, which is actually conceived. But the main non-fiction source for his book The Holy Blood, the Holy Grail, was called inaccurate by scientists. Skeptics continue to say that da Vinci's painting should be regarded as a fictional show of The Last Supp, not an authoritative record of who was there, where they sat and what they did. (Unless, of course, someone believes that da Vinci somehow had an important and very secret knowledge of Jesus' life.) If a process similar to the pesci process was done with other images, would people see hidden images or codes? Whether it's photos or ghost-haunted patterns, people often see what they want to see. But once again, da Vinci has a familiar taste for mathematics and mirroring techniques. A popular theory, potentially supported by computer analysis, sings that the Mona Lisa is a covert self-portrait of the painter himself. Then there are the theories of The Last Supper, which are quite easy to marry, like the ones surrounding the knife. First, the knife is almost certainly a dinner knife of some sort and no dagger or weapon, which would make sense, given the setting. Secondly, analysis of the picture shows that Peter -- and not a disabled hand or one of the other students -- is holding a knife, even though he's doing it in a strange position [Source: JayDax]. Da Vinci also created sketches in which he seemed to rehearse how to position Peter's hand. (For more information, see How Da Vinci Code doesn't work.) As for the Jewish image -- which, some say, is the only one that's been tuing Jesus in the picture -- it's clearly not. Several learners on the left and right of the picture are resting on Jesus, so Judas is not the only one. Is Mary Magdalene in the picture, perhaps like John, with her feminine appearance? Probably not -- unless da Vinci tries to express a certain message, it wouldn't make sense to let John out of the picture while showing the rest of Jesus' students. Secondly, scientists agree that Da Vinci has meticulously represented John, at least by 15th-century standards. Art from da Vinci's time often depicts John with long hair and feminine features. A copy of da Vinci's painting was created in the 16th century. It is commendable that the image could be used to further test Pesci's theory, but by the time the original version of The Last Evening was reproduced, it had already experienced some flaking and degradation. A copy of Tonglero Abbey is just that -- a copy that can differ in a subtle but important way. After all, there was only one da Vinci. For more information about hidden messages in Last Supper, Da Vinci Code, and other related topics, see the links below. Coronavirus shut down the restaurant and broke my heart. I left the house last spring,... This quote from the poet and essayist Ralph Waldo Emerson is a simple reminder that we often prepare endlessly, while never actually actively following what we want. The practice is certainly important, but without being used for real action, it is almost pointless. It's easy to get in the way of endless preparations. You want to be the best. You want to come through the door, that you're great. You don't want anyone to see an imperfect process full of failures that brings you to something great. While you don't want to move forward until you're ready, you're often ready before you get started. And value is in failure -- it's one of the best ways to learn. If you've been practicing for yourself for a while, think about moving on. You may not feel ready, but you'd better give him a chance than wait forever.
