Mighty knight 3 armor games

9/10 - 950 votes Played 144 583 times Our world still needs your help to fight the evil power... Mighty Knight 2 is an excellent fighting game, beat'em up type where you lead an assassin, a barbarian or an archer and are supported by a team of three other champions controlled by the computer or a second player. Earn experience to improve your heroes' abilities and unlock new companions. All 5 levels will fight you mad bosses and also unlock challenge modes that speed up your progress. Who wouldn't like to be a knight and take over hordes of enemies with some loyal allies? Well, you can do that in the Beat 'Em Up flash game Mighty Knight. Mighty Knight is a 2D action game in the same vein as Castle Crashers and Scott Pilgrim vs. the World.Mighty Knight is a fun game with great graphics and solid gameplay. Like a typical beat 'Em Up, you spend your time moving and unleashing different types of attacks. In Mighty Knight, you have a simple sword attack, complemented by two special-colored attacks. Your two special attacks are a sword-wave attack that attacks enemies right in front of you and sword spin attack that attacks in 360 degrees. The game will also be more difficult as you progress, and the last few quests can be difficult, so don't expect a cake walk. After each time you complete a quest, you have the option to complete minor quests. These side quests have special requirements that include defeating all enemies without taking a hit to beat a level below a certain time limit. These side quests are quite challenging to add a decent amount of game time to your experience. The graphics and design for Mighty Knight are really well done, with details well above the average flash game. The designs for the enemies are really cool, and I really like how every time you update your character it makes slight adjustments as it looks. Along the way, you will receive three companions who will help you with your search. Each of these three companions specializes in a different skill. The barbarian is in high health, the villain is fast, and the archer does the most damage. The only complaint I have with Mighty Knight is that the AI controls your companions and they have a tendency to do some really stupid things in battle. For example, Allies will run around the map and randomly attack enemies or load them into a horde of enemies and let themselves be killed. For the most part, this isn't bad, but for the timed attack side quests, it becomes almost impossible to win because your allies aren't very efficient when it comes to fighting. It would be helpful if there were opportunities for the player to set the behavior for the companions. Related: Why every RPG fan should play the Bravelly Default DemoOverall this is a very fun game with a few slight improvements that I could see ending up on Steam as a full release, like with Kingdom Rush. If you want to fight a horde of evil, give Mighty Knight a chance. Flash Game of the Week is a weekly series that highlights the best browser-based games you can find in the 'net. Cody Heintz is a graduate of Hofstra University and is currently a freelance photographer. He is a fan of Ratchet and Clank, Kingdom Hearts and Final Fantasy. While his guilty pleasure is every mobile game made by Kariosoft. He is also a lifelong New York Yankees fan. Cody has been writing about games since 2010. This game has been removed upon request from Y8. You can play the original on Y8. The creatures that are different from each other have penetrated the world in which you live. Before these creatures destroy your world, you must destroy these creatures. If you think you can't succeed on this mission alone, don't worry! Call your friend now and take part in this super adventure with your friend through two player game mode. But before you start, there's something you should do now; You must complete the first two levels of the game to unlock the game mode for two players. Let's get started! Player Control: 1. Players: Move: W,A,S,D or Z,Q,S,D Attack: F,G,H Switch sign: SPACE 2. Player: Move: ARROW KEYS Attack: Comma, Dot and / Switch Characters: / Good luck! Luck!
