(Thanks Margaret H.) ♡ Well written and easy to use! (Thanks L.I.U.E.) VIDEO WORK BACKGROUND (modifiable) Not all video worksheets are equal! Too many poorly designed video worksheets contain questions that do not give students enough time to record their answers before the next question, or they have the opposite problem of having long periods of time between questions where students disengage. I designed my questions to occur at a reasonable pace to keep students constantly engaged, but without scrambling to record the information. To that end, I use a lot to fill blank questions to help students record data quickly and intersperse this with very brief short answer questions for further reflection.
