# Minecraft fps booster mod 1.16.1

Home » Minecraft Mods » Dynamic FPS Mode 1.16.4/1.15.2 (Improve Performance in the Background) Author: Juliand665 │ November 29, 2020 │ 57,757 times dynamic FPS Mode 1.16.4/1.15.2 automatically reduces render speed when not minecraft-oriented (1S FP) or hidden (no rendering). At the same time vanilla Minecraft corrects an error that makes it get much more performance in the background than it should, as well as making it not to process the game while reins of resources. Requires Screenshots: Fabric Modloader Fabric API Mode Menu (Optional) How to install: Download and Install Installyminecraft Launcher Vanilla Download and Install Fabricer Vanilla Launcher Run recently downloaded file .jar, select the version you want and press Install. Run Minecraft, select the profile with Fabric installed, and on the Desktop, press the Play Key Press Start, press Run % appdata%, and then press Enter. Go Roaming/.minecraft/mods Put the jar. Run Files and Minecraft to the Mode folder. Dynamic FPS Mode 1.16.4/1.15.2 Download Links: For Minecraft 1.14.4 Fabric version: Download from Server 1 – Download for Minecraft 1.15.2 Fabric version: Download from Server 2 For Minecraft 1.16.1 Fabric version: Download from Server 1 – Download from Server 1.16.2 Fabric version: Download from Server 1 – Download from Server 2 for Minecraft 1.16.3 Fabric version: Download from Server 1.16.4 For fabric version 1.16.4 Download from Server 1 – Download from Server 2 Sort: Mod NoFog eliminates the effect of fog from Minecraft and allows you to significantly improve visibility. In the game, it is used to hide the free space behind ... A small NoFog mode is useful for weak PCs players.
