Published 2019 SkillFlix Description Program™ for Parents (SkillFlix) is an online video library of skills development designed for parents of young people with mild cognitive impairment. By modeling effective conversations, SkillFlix videos teach parents conversational skills and sexual health information that allow them to have more productive conversations with their children. SkillFlix for Parents is undergoing formative evaluations to improve the design and implementation of the program and increase the evidence base for teen pregnancy prevention. Formative evaluation will be followed by an evaluation of the effectiveness of the program. Population Snapshot Program: Parents of students with cognitive impairment (ages 10-26) Location: Kent, Ionia, and Montcalm Counties, MI Partners: Nine school districts in Kent, Ionia, and Montcalm Counties Goals Improve parents' knowledge of adolescent sexual health Teach parents conversational skills and improve their ability to have effective conversations about sexual health with their cognitively impaired teens Increasing the frequency of communication about sexual health between parents and their adolescents who experience cognitive impairment Strategies Skill-building video for parents SkillFlix for Parents is a library skill that teaches parents how to have a conversation about sexual health with their teens who are cognitively impaired. The SkillFlix video features actors depicting cognitively impaired teens and their parents having conversations about sexual health. Each sixty-second video features a micro-skill model™, a small action that parents can take to improve the quality of their conversations. Videos are organized by skillset; each skill contains three to five videos that teach separate Micro skills. For example, conversational tone skills include videos about Micro skills using casual and open body language and staying positive or neutral when surprised. The video also includes information on sexual health topics, including abstinence, pregnancy, and sexually transmitted infections (STI). By watching videos and practicing, parents learn skills that allow them to have effective conversations with their children and respond to unpredictable situations. SkillFlix for Parents is an extension of SkillFlix training technology, originally developed for health educators with dfusi with National Institutes of Health funding. Parallel school-based lessons for teenagers All participants in the SkillFlix for Parents intervention ask children to accept the Making a Difference curriculum at school. Funded by the HHS Administration on and Family and Youth Services Bureau and implemented by the Kent Intermediate School District, this evidence-based program has been adapted for students with mild cognitive impairment and provides them with the knowledge and skills to reduce risk and pregnancy. SkillFlix for Parents videos align with the Making a Difference curriculum and allow parents to have conversations with their children about what they learn in school as they learn. Teachers in these schools have been trained by facilitators and given students and their families an additional layer of support. Statistics on Montcalm County teen birth rate of 24.2 (per 1,000 women aged 15-19) in 20171 21.1 Ionia County teen birth rate (per 1,000 women aged 15-19) in 20171 18.4 Kent County teen birth rates (per 1.00 ages 1 5-19 years) in 20171 18.8 National teen birth rate (per 1,000 women aged 15-19 years) in 20172 42 SkillFlix for available Parent videos Sharing Knowledge to Improve Outcomes During focus groups, parents suggested gathering as a group to watch SkillFlix videos and discuss how to talk to their cognitively impaired children about sexual health. Parents asked the school's special education coordinator to set up a discussion group, which is being planned for the coming year. (Content is undergoing 508 reviews and will be updated pending a fix. For immediate assistance, please contact: opa@hhs.gov.) About the TPP Program The Office of Population Affairs Teen Pregnancy Prevention (TPP) program is a federal grant program that funds various organizations working to prevent teenage pregnancy throughout the United States. OAH invests in the implementation of evidence-based programs and the development and evaluation of new and innovative approaches to preventing teenage pregnancy. The TPP OAH program reaches teens aged 10-19, with a focus on the population with the greatest need to reduce the gap in teen pregnancy and birth rates. Hyattsville, MD: National Center for Health Statistics. Retrieved from - PDF Photo: shutterstock.comYou don't need children to understand that good public schools support home values in their districts. And while high-quality schools are usually accompanied by higher property taxes, homeowners in the district are eventually paid back through higher house sale prices. Getting paid back sounds great, but how much are we talking about? New research Realtor.com show that to get into the desired school district, 9% of buyers said they would pay 11% to 20% above budget. Separately, 17% report they will pay extra to be close enough that their children can walk to and from school. Related: 7 Renovation Tips to Increase Resess valueIn a show between facilities for adults and education for children, you guessed it: kids win. Realtor.com found that 62% of buyers would skip a home spa if that meant getting into the right school district. 50% will admit easy access to shopping, while 44% will hand over space in the form of bonus space. If the house you plan to sell is located in a highly coveted school district, do everything in your power to highlight that fact in all your real estate marketing materials. Many potential buyers are parents of children who are currently in the school system, so be sure to get a word among your neighbors and local friends. If you're buying a home, take advantage of a search tool that allows you to filter by school district, because district boundaries aren't always in line with city, village, and city lines. After all, you can't assume that your kids will be assigned to attend the same school as the kids on the block or even next door. Jonathan Kirn/Stone/Getty Images The best way to find out a person's school district is to consult an online search engine that uses geographic identifiers to determine school districts. The U.S. Department of Education's National Education Statistics Center provides one such tool, and the High School provides a similar one. Once someone determines the correct school district, sometimes it is still necessary to find out which school is assigned. This can be done by contacting the local school district. Many larger school districts, including the Los Angeles and New York districts, provide online search tools that use an applicant's home address to determine a designated school. School.
