The energy of the person who made the object, sold it, and who previously owned it is impregnated with the spiritual fabric (spiritual body) of everything that exists. The spiritual body of an incarnation human being interacts with the surrounding spiritual energy field, both in terms of people and places. - Doraja Michaharak, Spiritual Cleansing: Handbook of Spiritual Protection We can fly from New York to Los Angeles in a few hours, but we are also strangers to us hundreds and thousands of people and our energy field can be mixed. Our physical senses report the flight of the plane to us in all its details, but we have not received such reports of results that have mixed our energy field with so many people. Only a small number of people with finely harmonious inspiration recognize the difficulties such a mix can bring. I used to live a quiet life. We rarely saw those outside the family structure. Many people spent their life on farms and in small towns. In 1900, many thought it was a great event to travel twice a year to a town 20 to 50 miles away to do seasonal shopping. People were familiar with their personal environment and kept clean. There were few strangers among us. Strangers arrived and we knew how to deal with the energy sector they brought. Every home had a protective appeal, and every family had a home ceremony. - Draja Michaharak, Spiritual Cleansing: Handbook of Spiritual Protection
