## Crush crush dlc characters

Community content is available within CC-BY-SA, unless otherwise stated. Edit Comments Share Several questions are frequently asked and can be placed in three groups: Questions about the game host (i.e. Steam, Nutaku, Kongregate, Google Play or AppStore) Some of these questions also have answers in discussions about Steam. There are also many other issues that are not listed here that are addressed in steam discussions. If your question is not addressed here and you can not find there, leave a comment and can be added to this list. You can also check out the official FAQ page. It seems to be focused on Crush Crush, but some of the answers apply to Blush Blush as well. Questions about wik[edit | edit source] Where are the NSFW images? [edit | edit source] This wiki has an SFW image policy. You won't find NSFW images here. You can find them in the game in your memory album (read more about Crush Crush Memory Album or Blush Blush Memory Album) if you have Uncensored Mode to unlock and check. You can unlock Uncensored mode by purchasing NSFW DLC on Steam or by playing on the nutaku.net. Why isn't there a XYZ page yet? [edit | edit source] If you're looking for a character who doesn't have a wiki page yet, it's very likely that the character is brand new. Many of our editors don't spend diamonds to get new bundles of characters once their event is released. Similarly, for phone flirts that are still in beta or have just been added to the main game. Have some patience. The site should exist by the time the character debut event is over, or within days of the phone fling being generally released. Why is information missing from the XYZ page? [edit | edit source] If there is a page for a new character, it is likely that our editors simply did not have the opportunity to play through all the interactions. If the page is on a subject that has been updated in the game, the update may have been overlooked. If you don't know how to edit a section that's been updated, you can leave a comment on the page to notify you. These comments are usually addressed fairly quickly. Can I add images to the wiki? [edit | edit source] Only if you are logged in. FANDOM blocks logged-out users from uploading images. Only if it is SFW. This wiki has SFW policy images. Only if it relates to games produced by Sad Panda Studios. You can decorate your profile with unrelated images, but anything for use in articles should be relevant. Only if it is possible to view the image from inside the game through the normal game. If you can pay diamonds now to get the painting early, it's within the ordinary game. If the image is data-benefited, obtained by one's hacking or decompilation of the game, etc., it is NOT within the normal game. If the image is posted Sad Panda Studios, but only for paywall (eg on Patreon), it is not within the ordinary game. This is not a complete list of what is/what is not considered normal gameplay. Use common sense. Questions about games[edit | edit source] Why is my reset boost going off? [edit | edit source] Crush Crush[edit | edit source] There are two characters that consume your reset boost: Shibuki and The Dark One. With each level you advance with them, they are consuming more and more of your reset boost. Shibuki will give you enough bonus to add in more than make up for it when you reset, and she will return everything she has taken when you get a lower level with her. It is possible to make progress with The Dark One, and have lower reset support if you reset before reaching lover level with it. However, she will max out your reset boost (x2048) once you get the lover level, whether you were on max reset support or not before reaching it. Blush Blush [edit source] When you progress through infinite levels, every 10th Lover+ level for each guy has to consume the Reset Boost request, so you lose a little reset support when you advance to Lover +11, Lover+21, etc. The amount of reset consumed is usually small compared to the bonus addition you get from progressing through infinite levels, so while it may slightly undo you in the current reset, you will usually be much better placed for the next reset when you progress through infinite levels. However, you may need to advance several levels in order to make a loss – stopping at Lover + 11 will give you a lower reset support in the next reset than stopping at Lover+ 10. I'm missing a pack of characters. Will it ever come back? [edit | edit source] Some characters in Crush Crush appear in time-limited events, followed by a brief stint in the store. Others will appear in the store for a limited time and return to sexy vault. Sad Panda cycles these characters back to the store every so often, sometimes with discounts. If you miss walrus that have only been available for a limited time, you can expect them to eventually return. Some have already made several returns and so far none of them have been available for more than a year. If you are asking about character packs and are wondering how to get those that are not currently in the game store, they will return in the future. Don't worry, you're missing out, they're just not currently available to buy to keep the available characters fresh, and they'll come back so players can purchase packages if they've lost the last time they were available. – SPS Team What happens when I finish LTE for character clothing but not for character? [edit | edit source] If you get clothes without getting a figure, nothing happens. When the character appears in the store, the price includes clothing, and no discount is given if you have completed LTE for clothing. It is currently unclear whether the outfit event needs to be re-completed if the LTE character returns for the new LTE. What happens if I finish LTE for the character, but not for the character's clothes? [edit | edit source] The clothes will remain locked until you purchase the character at full price in the store or until the character has a recurring event for the outfit. If you buy a character at full price in the store, you will earn diamonds (and possibly achievements) for the level of relationships that you have already completed the next time you reach it. What happens to purchased and limited time when I reset a full reset? [edit | edit source] As with soft reset or prestige, your progress returns to the beginning. With a full reset (also called a hard reset), you'll also lose all your achievements. So you will have your purchased and limited time characters after performing a hard reset. If you have unlocked all clothes for purchased or limited character time, these clothes will also still be available after a hard reset. For more details on what happens during a full reset, see this Crush Crush Steam response: Any DLC you purchase survives a full reset. If you purchased or earned through an LTE phone fling that has become a full girl, you will need to play through the phone flirt again to unlock it as a full character, but you won't have to buy or play LTE to unlock it again. The work that are part of Charlotte and Suzu will remain unlocked as well. Pinups that you acquired through LTE events will also be available after a full reset. If you purchased a starter pack, your game will be covered after a full reset, so you run the game with 11 time slots (instead of 5), 130 diamonds and 2X Boost. Diamonds/time blocks that were part of Darya or purchase 18+ DLC from our website will be reset and will not survive a full reset. But if you are in this position, write to us and we will restore them to you. Darya will award all the level up success diamonds that gave the first time the player played it, it is only those that were included in her purchase that will not persist in full reset. All diamonds, raises and girl/work/hobby progress will reset. All achievements will be reset, but Steam achievements will remain unlocked. – QA Panda (October 20, 2020) If you notice a loss of purchased characters or LTE content with a full reset, you can contact Sad Panda Studios Support. If you include your SPS ID (on the More screen), they are usually very good at recovering lost things, even if it is due to a user error. Is the speed boost in the Store held after resetting? [edit | edit source] Teh depends on what kind of reset you mean - prestige (soft reset) or full reset (hard reset). If you make a soft reset (from the Statistics tab), yes. Gold plating, in-store shopping and clothing remain after a soft reset. If you get a hard reset (from the Next tab), no. Character packs stay, whether you've collected them in an event or purchased them in the Store, but all other purchases and diamonds will disappear. Does reset the game reset the tutorial, etc.? [edit | edit source] Soft reset will not bring back tutorial elements that you have already seen. If there are elements of the tutorial that you have not yet achieved when resetting, you will still see them if / when the requirements for this element of the tutorial are met. On the other hand, a hard reset brings you more or less back to the beginning: the first intro scene is repeated and the tutorial starts again. Why does my new job unlock when I've done a hobby time skip? [edit | edit source] This is a mistake. If you use time skipping to get your hobby levels high enough to unlock new jobs, these jobs are not immediately available. For now, this can be fixed by closing the game and reopening it, or by suspending any hobby and restarting it. This error has been reported for Blush Blush, but it also exists in Crush Crush. Why can't Crush Crush load characters around Q-Permiss at startup? [edit | edit source] When playing Crush Crush on Steam, when you close a game on a particular girl, the game has to start on that girl the next time you open the game. This feature was added in September 2019, but caused the game to be buggy when the last selected girl was off the main plot (i.e. under Q-Piddy on the list of girls). As a result, only the main girls of the story can be selected for loading at startup. As of February 1, 2020, there were no plans to fix bugs for DLCLTE/etc. characters, but these plans may change. Why are diamonds and event chips disappearing? [edit | edit source] There is a pinned Steam discussion on this. One of the main reasons this can happen is if you end the game before the game has a chance to finish saving your state. In the upper left corner of the game screen is the Save indicator, which appears when the game detects a significant change in status (gains in affection from speaking, pausing or starting work / hobby, collecting LTE rewards, etc.). Closing the game while saving the pointer is there causes the save to fail. If you have an LTE window open, it can be difficult to see the indicator because it is mostly below that window. If you have lost more than a day it is worth it at once that pinned Steam discussion suggests that you contact SPS support with a description of the problem and your SPS ID (on the More tab in the game), and can restore the state of the game from the most advanced cloud to save and place it in one of your save slots, can I prevent them from disappearing in the future? [edit | edit source] A technique that seems to do a very good job of avoiding lost event rewards is to wait for the Save indicator to disappear, then do something else in the game (e.g. pause and restart work that is already at the maximum level) that will bring the indicator again. Wait for it to disappear, then manually save to one of your saved slots and close the game. If your progress is lost (e.g. if you switched devices or changed users on the same device), loading a manual save should restore it. If not, you can contact SPS support. Why can't I reset some phone flings? [edit | edit source] Once you get to the end of a phone flirt conversation, you can usually reset the conversation and replay it. An exception are phone flirt characters that have been promoted to full characters. Your text-based adventure is a prerequisite for face-to-face meetings, so you can't erase that history once you've finished a Phone Fling conversation without doing a hard reset that erases the entire history. When will Kitty Catsanova be released on Steam? [edit | edit source] Sad Panda is a small studio, and their attention is currently divided into their other three games. Probably won't be in 2020. Kitty Catsanova is currently out of development. We are rewriting/designing this game and will release it again some time in the next few years. We don't have it on our to-do list at the moment when we focus all our resources on Crush Crush/Blush Blush/Hush Hush. - SPS Team (20 February 2020) a newer response on the Steam Forum for Crush Crush: A short version of the story is that during our Alpha/Beta, we have a lot of feedback on things that were and didn't work. Once we realized that the game needed more than just tuning in, we were forced to briefly shelf it. KC smolders in the background. We're whipping up a big batch of Hush Hush at the moment, and of course keep Crush Crush and Blush blush rolling. Thanks for your patience! – Oj Panda (May 26, 2020) How long will it take to create a character (whether it's Crush Crush or Blush Blush)? [edit | edit source] It depends on how fast or how slow progress it makes (remember, Sad Panda Studios is just a small team). Usually it takes 2-5 months to make a character (from writing to art to audio). This is perhaps faster or slower than usual depending on the current situation. FYI: It can take anywhere from 2-5 months to get a new character ready, depending on everything from writing to art to audio. This is partly due to the fact that we are working on so many games at once and we are a small team! / .&t; &t; / - SPS Team (24 April 2020) Questions about game hosts [edit | edit source] Can I transfer my game progress from one host to another? [edit | edit source] Unfortunately, you can't. hosts are operated by companies, and each of them wants to have their share in game microtransactions. In particular, currently there is no way to switch between PC and Mobile version of the game without losing your progress. If you are writing to us to ask if you can transfer the game from Steam / Nutaku to your mobile, the answer is no. Sorry, none of the hosting companies will allow us to transfer saved games between companies. - SPS Team How do I switch between NSFW mode and SFW mode on Nutaku? [edit | edit source] If you play Crush Crush on Nutaku.net, you will play the Moist &uncensored version. The SFW version of Crush Crush is available on Nutaku.com. Your credentials will work on both sites. This is less convenient than a simple checkbox in the settings, but hey. It's a free way to get the NSFW version. You get what you pay for. If you're playing Blush Blush Nutaku.net, you're currently stuck with the uncnt version because the SFW version isn't yet available on Nutaku.com. Sad Panda can release Blush Blush on Nutaku.com at some point in the future, at which point you will be able to do the same .net / .com switchroo switch NSFW mode. Can I turn on NSFW mode in the mobile version? [edit | edit source] Not at the moment. Eventually there will be a mobile version of Crush Crush via Nutaku, which will have NSFW content. If you're asking about the NSFW version of CC Mobile, we won't be able to release it on Google Play because Google has strict rules for its content. NSFW CC Mobile will be available on Nutaku Mobile Client – but we're not yet sure when it will be released. - SPS Team Which host is best to play? [edit | edit source] Ultimately, you have to make this decision for yourself. Steam has the best quality - larger images, expressed lines in Crush Crush, the ability to play beta versions, etc., but you have to pay for nsfw content. That's not a bad compromise. The mobile version (Google Play Store/AppStore) provides a full model image instead of half-cropping (and the ability to use ads to increase speed: either a 30-minute skip or 2x game promotion). However, art is limited to more family friendly due to T&M;C asked for all distributors/App Devs who are going to release the app there. Nutaku gives you free NSFW content, but the game window is smaller than Steam and there are no voice lines in Crush Crush on Nutaku, except for phone calls. But Nutaku.net has a background image for Crush Crush that changes when new events begin. Kongregate is currently the only place to play Kitty Catsanova. Eventually Kitty Catsanova will be released on Steam, but this probably won't happen in 2020 (Shelfd until further notice). Community content is available within CC-BY-SA, unless otherwise stated.
