Sane Trilogy guide provides information to help you complete all three games that are part of the collection. On the early pages of the guide there is a trophy guide that explains exactly how to win all the trophies in each game. Trophy descriptions provide tips on how to unlock them and how to achieve them. More advanced trophies are described in detail on separate pages of the guide. The next big chapter of the guide focuses on describing all available levels. The level walkthroughs provide information about potential threats, important treasures that can be found, and alternative paths that become available when certain requirements are met. In the last part of the guide there is a chapter on fighting all bosses. In this chapter you will find information about where the player will meet bosses, what attacks they have, the conditions of battles and the best way to defeat them without losing their lives. The guide ends with pages about controls and system requirements. Crash Bandicoot N. Sane Trilogy is a collection containing three classic platform games - Crash Bandicoot, Crash Bandicoot 2: Cortex Strikes Back and Crash Bandicoot 3: Warped. Each game has been played from scratch, but the gameplay rules and level layout are no different from the classic versions of these titles. In these games, the player travels through levels placed in different environments and filled with many traps, enemies and chests of fruits and other treasures. Each level is rather short, but the player is encouraged to repeat it to beat the high scores in the time trial and find previously unavailable treasures. Gems are obtained from destroying all fields in one level. Sometimes this can be done without access to any secret areas, but most levels will require you to collect special colored gems to reach the secret areas. Below is a list of each level you need and some useful tips for finding these secret areas or performing tasks destroying all the fields. Levels with special colored gems require you to destroy each box without dying once during the entire run to get it. With this in mind, dying in premium areas does not take life and therefore does not count against the requirement to die. ■■■ ■Sanity Beach N/A White 49 1 Jungle Rollers Green White 43 1 The Great Gate Yellow White 38 1 Upstream Orange White 36 1 Rolling Stones Blue White 87 1 Native Fortress Red White 48 Island Name No. Stage Gem Color Required Gem Unlocked Box Total 2 Up The Creek N/A White 48 2 The Lost City N/A Green 82 2 Temple Ruins N/A White 67 2 Road to Nowhere Red White 42 2 Boulder Dash Purple White 35 2 Sunset Vista N / A White / Key 1 90 Island stage name number Gem Color Required gem unlocked box Total 3 heavy machines N / A White 86 3 Cortex Power Blue White 42 3 Generator Room N/A Orange . 52 3 Toxic Waste N/A Blue 39 3 High Road N/A White 45 3 Slippery Climb N/ Red 51 3 Lights Out Yellow Purple 15 3 Heating in the Dark N/A White 18 3 Jaws Dark Blue White/Key 2 112 3 Castle Machinery N/A White 27 3 The Great Hall N/A N/A N/A N/A How to fully unlock everything in every game. Crash Bandicoot is back! The N Sane Trilogy includes remakes of three original PlayStation adventures, with a glossy facelift that keeps the level and incredible challenge intact, and is now available on Switch, PC and Xbox, as well as on PS4. Completing each stage is one thing, completing them 100% is a different matter. Not only that, but the way you find all the gem locations and key locations is slightly different in each game, so knowing how it works will save you a lot of time and hassle. If you are looking for more general tips and explanations of what's new in the meantime, you'll want to take a look at our Crash Bandicoot N. Sane Trilogy Guide and Tips. Each stage has one gem to unlock, which is done by smashing each chest at one level in a level. On white gem scenes Lose your life while trying this, but colorful gems require you to complete it in one attempt without losing your life. In both cases, you also need to clear their special stages, but fortunately you can die at least as many times as you want in those who do not risk losing their lives or the Gem. There is also an additional layer of complexity in how to obtain colorful gems. Instead of just clearing the level without dying, you now have to do different things - like finishing a level without destroying any chests. Finally, the Death Trails were introduced. These are special platforms that ask you to participate in bonus rounds, but are only available if they reach them without dying at that level. Throw in the fact that you have to double back on one or two of them, and they're a pretty nefarious mechanic. Good luck!
