CES 2019 and was also released in January. You may be wondering what the difference is and why you should buy a Ticwatch E2. Well, there are new accessories that make the E2 worth buying a watch. It looks more decent, it's smarter, and activity tracking is more accurate. Ticwatch ExpressTicwatch E2 EDITOR'S RATINGDesign: (4.0 / 5) Battery: (3.0 / 5) Fitness tracking: (4.0 / 5) Features: (4.0 / 5) Features: (4.0 / 5) Average: (3 Battery: (3.5 / 5) Medium: (3.7 / 5) Battery: (3.5 / 5) Mediu 5)Battery: (3.5 / 5).9 / 5) Fitness tracking: (4.1 / 5)Features: (4.0 / 5)Price: (3.7 / 5)Average: (4.0 / 5) BUY Check out amazon check @ GearBest Check at Amazon Called DeviceTicwatch ETicwatch ETicwatch E2 Device Type Sport / Fitness smartwatchSport / Fitness smartwatch Predessesor Ticwatch E SuccessorTicwatch E2 E2 2017January, 2019 Ideal forUnisexUnisex DISPLAY Display typeOLEDAMOLED Display resolution400 x 400 pixel Pixel density287 ppi407 ppi Input typeTouchscreen 1 Physical buttonTouchscreen 1 Physical button AlwaysonYesYes BODY ShapeCircularCircular Dimension44 x 44 x 13.5 mm46.9 x 52.2 x 12.9 mm Weight41.5 grams Casing materialPolycarbonate Strap/band materialPolycarbonatePolycarbonatePolycarbonate Strap size22mm22mm Screen protectionHardened glassCorning Gorilla glass 3 Water resistant/ProtectionYes, IP67Yes, 5ATM Swim-proofNot recommendedRecommended Color(s)White Lemon BlackBlack MEMORY RAM0.5GB0.5GB Internal storage4GB4GB Memory card slotNoNo CONNECTIVITY Bluetooth smart v4.1 LEBluetooth smart v4.2 LE Bluetooth callingYesNo Wi-FiYesYes NFCYes (China)No GPSGPS/GLONASS/BeidouGPS/GLONASS/Beidou CELLULAR TECHNOLOGY TechnologyNoNo SIMNoNo BandNoNo NOTIFICATIONS Email alertYesYes SMS alertYesYes Calls alertYesYes Event reminderYesYes WeatherYesYes Thirdparty appsYesYes FITNESS TRACKING Sleep apneaNoNo Sleep trackingYesYes StepsYesYes Floors climbedNoNo Heart rate monitoringYesYes DistanceYesYes StressYesYes VO2 Max. Ticwatch E vs E2 Features versus The main difference between Ticwatch e vs e2 is in sizes plus additional features. The new Ticwatch E2 has more premium than the E, its rated 5ATM instead of the IP67 E has a longer battery life, and health tracking accuracy and automatic action recognition are much better thanks to the E2. The design of the new Ticwatch E2 is slightly larger, retaining almost the same screen size and now slimmer, which makes it more elegant. Perhaps women with a medium wrist will loosen this watch. The E2 has a nicer design and as such the look is more stylish and decent than the E. Ticwatch E is powered by Mediatek, but Mobyoi has abandoned that as the Ticwatch E2 is powered by the Ticwatch E2 is not powered by the newer Snapdragon 3100 despite its release and availability from November 2018. The Snapdragon 2100 is over two years old and obsolete. Mobvoi's battery life worked on the E2 battery life, which saw it come with a higher battery capacity of 415mAh compared to 300mAh of the E. Ticwatch E2 has a longer battery life than the E, with the E2 you should get up to 2 days or more of battery life for regular use of a single charge, while the E is just over a day. Without a doubt, E2 is a better choice for extreme training sessions and a better companion for short holidays. The Ticwatch E's waterproof rating has been rated ip67, but now it's even better because the new Ticwatch E2 has a 5ATM rating, making it waterproof up to 50 meters. It doesn't just stay there, the E2 is a great choice for tracking swimming activity because it comes with state-of-the-art machine learning algorithms that is able to distinguish the type of jump and count knees and strokes smoothly while swimming. All KPIs such as lap time, speed, Swim Golf (SWOLF) will be recorded and generated as soon as the swim is complete. Fitness Tracking and automatic activity recognition. I think that's exactly what a smartwatch should be, because fitness tracking is a major contributor to the smartwatch boom. With Ticwatch E, you can track your daily activities, but with a more accurate fitness tracker and highly sensitive sensors that automatically recognize your activities. The smarter Ticwatch E2 features invisible TicMotion technology that actively tracks your actions without having to activate anything. This goes beyond just counting steps or calculating calories. With innovative AI algorithms, Mobvoi maximizes the capabilities of intelligent integrates seamlessly into your life. What's better? There is no doubt that these two two there are fantastic choices, but the difference is very clear. The Ticwatch E2 is \$30 more expensive, but it's totally worth it. The Ticwatch E2 is much more stylish and finely finished giving it a better design. It's more elegant and looks more graceworthy than the Ticwatch E. In addition, the Ticwatch E2 is a much better fitness tracker, wherever life takes you, whether on land or on water, ready to go. Its fitness tracking capabilities are more accurate and you couldn't be better off knowing that your smartwatch recognizes your activity. The good news is that more updates are on the way through OTA upgrades. Mobyoi has stated that it will soon release more activity tracking features. Updating the battery life is something smartwatch fans miss out on, the Ticwatch E2 has a longer battery life than the Ticwatch E and I think that's one of the main reasons you should switch to the Ticwatch E2. Here's a summary; TICWATCH E2 Provides the best value for money, is a versatile fitness tracker in the highest quality design and has a longer battery life. TICWATCH E Undoubtedly a great choice, thousands of users have confirmed this claim. Our Pick We will choose the Ticwatch E2, it is a comprehensive and smarter activity monitor and has a longer battery life. It gives you the best value for money. Money.
