Coach usa crestwood phone number

Reader David writes with this excellent tip for phone anonymity: I needed to call someone from my cell, but I didn't want them to get my number from their caller ID. I know I use *67 at home when I want to do this, but cell dials are different - you don't get that double dial tone to let you know you're limiting your number now. In your cell, just start the number you're calling with *67, as if the phone number starts with three digits. The important thing is that if the cell doesn't usually need 1, you need to put 1 in front of the area code. On my phone, the caller ID uses this method to display a private call.
