Product #: 110037 Manufacturer #: SI SS-BOLT-CTCH-SCRW Email to Friend The SI Defense Wire Bolt Hauler is made of stainless steel. Designed for use with SI Defense AR-15 and LR-308 lower receivers. It's an improvement over the roll pins in standard lower receivers, and is easier to install. It won't work with other lower receiver brands unless the bolt catcher roll pin tunnel is tapped with a 6-32 wire pitch. NOTE: Prices, specifications and availability are subject to change without notice. We reserve the right to correct typographical, photographic and/or descriptive errors. This stainless steel bolt capture propeller is the same length as the OEM black oxide piece, but was five you. larger in dia. at the smooth unread section. The very nice feature of this is the thread portion is twice the length of the OEM set propeller that came with another manufacturers billet Lower. The longer wire section allows for full engagement with the threads in the lower. Also, zero rust vs the OEM black oxide propeller despite always keeping a layer of oil on the wires. Only way it can be better than the smooth portion dia. greater to take even more obliquely from the bolt catcher while being retired to the standard dia. to cut the relief in the receiver that catches the tip of the set screw. Fast Shipping! Thanks Sharp! Posted: 9/10/2010 5:37:54 AM EST [Last Edit: 9/10/2010 5:39:48 AM EST by cmechal] well after my first lower build thought of using screws instead of roller pins. Like this. - I spoke to them and they said that it was the same size as the standard bolt catching pi only with wire, but the sales girl couldn't give me the wire size and pitch and wonder if someone had used it before.
