Show all the positive reviews that show more top positive reviews > The emily5.0 polishing cup design out of 5 stars allows for better stain removal than other brush heads Reviewed in the US on January 16, 2018 Rembrandt Toothbrush is my first Rembrandt product and I was very impressed. The Rembrandt whitening refill brush head is no different! The shape and design are similar to the Oral-B electric toothbrush head, but the Rembrandt refill brush head actually whitens my teeth while I brush. The design of the polishing cup allows for better stain removal than other brush heads. I can definitely see the difference in the whiteness of my teeth and this makes it a daily habit to make my teeth whiter! My teeth feel polished and I love the long-lasting clean feel! Rembrandt Whitening Refill Brush Head is compatible with my Oral-B handle, which is a huge bonus! The size and shape of the brush head is what I need to get a hard-to-reach place behind my mouth. I prefer this Rembrandt brush head due to its size and the fact that it covers more surface area than my previous brush head. The spare refill brush head is held in a small plastic container perfect for storage. This is also very convenient for travel!It will be from January 26 (Tue) - January 30 (Monday), Colorado Rembrandt Teeth Whitening Electric Toothbrush & Charger until January 30.
