How I Use This Product: I Use Use From these worksheets, after formally teaching my students about ionic and covalent binding through my PPT chemical bonds. Then I teach the following lesson, showing specific slides on covalent ties, and then the students complete the second sheet on drawing covalent ties. During each lesson, I circulate through class to give students instructions when drawing these diagrams. After completing these two activities, I give a second review of the sheet that challenges students to draw both ionic and covalent bond diagrams in a mixed manner. Links to related resources:PPT - Chemical ConnectionsWorksheet - Drawing ionic and blacksmith communication schemes, Part 2Product Content:Worksheet 1 - Drawing Ionic Connections:Introduction to Ionic Bonding, which includes the nature of exchanging valence electrons, forming this and ionicity, the strength of ionic connections, and a step-by-step guide to drawing diagrams of ionic connections.2 sample questions showing how to draw diagrams of ionic connections correctly.5 questions , which will help students build the skills to draw diagrams of ionic connectionsWorksheet 2 - Drawing Covalent Bonds:Introduction to blacksmith bonding , which includes the nature of the exchange of valence electrons, single, double and triple covalent connections, as well as a step-by-step guide to drawing blacksmith bond diagrams.2 samples of questions showing how to draw covalent bond diagrams 5 to help students build blacksmith bond diagrams Off Answer Key Included for each worksheet: The last page of each worksheet has a full, colored answer key for all questions. Downloadable in 2 formats: This sheet comes in 2 formats: a static PDF document and a fully edited WORD document. Download the full PDF preview to see exactly what you're getting!
