Always make a backup of files that are overwritten by the file archive, because the original files are usually required to update the game to a newer version or play online!. Some no-CD/ Fixed EXE files work well in single player mode, but are detected to be changed when you try to play online. When this happens, use the original EXE to play online, otherwise you might find yourself banned from the game!. When using fixed files, make sure that you are using a firewall that controls outbound traffic, as some games are calling back to report the use of these modified files!. Some original games don't work when an app like DAEMON Tools has been installed. In most cases, you can resolve this issue by using a NO-CD or Fixed EXE!. Some game trainers are sometimes reported to be Virus or Trojan, the most common is a keylogger named HotKeysHook or the file has been packaged/protected with VMProtect or Themida and is recognized as Win32/Packed.VMProtect or Win32/Packed.Themida. In all cases, this is a false alarm, because none of the game trainers @ GCW contains known malicious code! More information in!. If you're having trouble using the trainer in combination with Windows Vista, 7, 8, or 10, make sure you're running an administrator rights trainer and, if necessary, in compatibility mode with Windows XP or Windows 98!. All available coaches are single player/offline use only! Don't try to use them online otherwise your account may/will be disabled/closed! There is indeed a solution. But you need the original CD and cd key (although not after you've done with it) First, install the game, with expansion packs (it's not necessary, but it will save you a little trouble). Now download and. What these two programs do is they make a virtual ISO image of your discs, and then allow you to mount them on a virtual CD drive, so you don't actually have to insert the game (don't worry, it's not illegal because the terms of use allow you to make one backup copy of the discs, plus i remember one of the ES employees saying he uses it). So now all you have to do is take the drive you want to play, insert it into the drive, and create an ISO image with MagicISO. Place it in a place where you can easily find it as your desktop. Then use MagicDisc to attach this ISO image. And you're done! Now you can take your real disc off the disc and play the game. Note: You don't have to buy make it work.
