## Electric potential energy worksheet answers

1. An electron accelerates from rest in a potential difference 12 V. What is the change in electrical potential energy in the electron? Known: The Charge on an Electron ( $\Delta PE$ ) Solution:  $\Delta PE = Q V = (-1.60 \times 10-19 C)(12 V) = -19.2 \times 10-19 The minus sign indicates that their energy potential is decreased.
