Digivolve guide digimon world 3

October 04, 2012 Unknown Visitor Ian-Multimedia...! Previously I shared DMW3 PSX Tips and Tutorial, This time I will share Digivolution Guide Digimon World 3 (PSX). For those who want to play the game, but not yet there, you can download ISO DMW 3 PSX and emulatornya. Well, who wants to know, keep read it. Before, you should know that each Digimon can be Digivolve at each different Digimon. The requirements vary for each Digimon novice, i.e. level and statistics/data, which means that when your digimon novice reaches a certain level and has some data, then you can do Digivolution. Digimon can only bring 3 Digivolution. You organized Digivolution by going to Digi-Lab (Dr. Kadomatsu in Asuka City, Piximon in other cities). You can replace Digivolution by selecting it from digivolution. To digivolve you can choose DV command during battle. If you want to start a battle with digimons that have digivolve, go to the menu and select Status. Then choose Digivolution and Equip/Install the Digivolution you want. Here's an example to do Digivolution: _____ AgumonGreymon - Agumon LV 20 _____ Artinya, if you try to get Greymon from Agumon, you need aAgumon who has a level of 20 to be able to do Digivolution. To start, Digimon made Digivolution when it reached the level of 5, 20, 40 with Digivolution being the champion, last and mega levels. _____ AgumonSkullGreymon - Greymon LV 50, Dark Tolerance 130+ _____ Untuk get SkullGreymon from Agumon, Agumon had to digivolve in Greymon and reach level 50. If you find the Dark Tolerance condition (or tolerance what appears as a condition) it means that the original resilience is possessed from

birth by a certain Digimon novice. To view it, check the data of the novice Digimon. Agumon membutuhkan paling sedikit 130 Dark Tolerance jika ingin melakukan Digivolution.Jika sudah mengerti, Berikut Daftar Digivolution para Digimon/Partner DMW 3

ExVeemon and Stingmon can make Digivolve DNA. In Battle, select the Label command. You will see a round icon in the Digimon name that Digivolve DNA can perform. Choose, select Digivolution, and select DNA DV. Both Digimon will lose several % MP and then make Digivolve DNA. They will not remain in the digimon DNA digivolve figure, they will only unleash 1 devastating attack and then the two Digimon will be changed. What I mean changed is that if the first time you were ExVeemon and you decided to make Digivolve DNA, after Digivolve's DNA is over you'll become Stingmon. Tidak semua Digimon bisa DNA Digivolve, berikut DNA Digivolution dengan syarat MP yg diperlukan:=====Agunimon = Greymon + HookmonAgunimon = Kyubimon + Dinohumon 80 MP=====BladeGarurumon = Growlmon + Grizzmon 80 MP=====Paildramon = ExVeemon + Stingmon 100 MP=====MegaGargomon = WarGrowlmon + Digitamamon ???
