Stained glass ceiling fan pulls

Go to the main contentThings designs will serve as an impressive accent while maintaining coolJune 13, 2017 Why do ceiling fans get such a bad rap? Perhaps the first thing that comes to mind is the faux-wood unit with slow-moving blades and a hanging pull chain typically found in low-ceilinged office buildings or school halls. But they do real wonders to circulate the air in a stuffy room or outdoor deck without the annoying sound or power of an air conditioning unit. And these days, they look good too! Ranging from stylish and modern to vintage-inspired and minimal, some ceiling fan designs will really enhance the look of your home or outdoor space. We shopped around for the best designed units out there to keep your space cool through the sweltering months ahead. Photo: istockphoto.comCeiling fans are a wonderful addition to any room, offering a cool breeze and providing a pleasant decorative accent. However, like any device, ceiling fans collect dust and dirt that can lead to noisy operation and, ultimately, engine damage. A pre-view approach to cleaning can help you keep your ceiling fan running quietly and smoothly. Here's how: Cleaning ceiling fan bladesThe first step is to turn off your ceiling fan, making sure the blades have come to a full stop. If the blades still move when you start, even a soft duster can do damage. Fan blades should be dusted weekly. You can buy a specialized polo duster that glides over the fan blades while cleaning both the top and bottom. For deeper cleaning, place a step ladder under the fan and carefully go over the blades with a water-moistened microfiber cloth or terry towel. Repeat with a dry cloth. Use a clean, dry cloth to go over the engine casing and wipe down any pull-chains. If you feel ambitious, spray the engine casing with compressed air to remove the internal dust. Avoid bending, breaking or warping blades with care not to press down too hard. Never use abrasive cleaners or toxic chemicals, as these products can scratch or discolor the fan blades and engine housing. Do not use alcohol, baby wipes or alkaline cleaners. these contain hard joints that can stain or destroy the finish on the blades. As soon as the your are clean, use a commercial antistatic, dust-repellent spray to help them stay that way (view example on Amazon). Spray the product on a clean microfiber cloth and wipe both sides of each blade. Make your own antistatic spray by mixing a part fabric softener into four parts water in a spray bottle. Photo: shutterstock.comCleaning ceiling fan fixtures Again, make sure the fan is turned off. After removing the lamps, remove the glass shades by carefully turning the fastening screws counterclockwise. Wash the glass tones in warm, soapy water and dry thoroughly. Inspect the rubberized flange around the base of each shade. If if you worn or torn, either swap in a new flange or use two or three heavy duty rubber bands instead. Replace the glass shades, being sure that the fastening screws are finger. This way, the glass will not rattle or shake when the fan is running. Replace the light bulbs. Sit back, relax, and drink a mint julep while your ceiling fan gently circulates the air! Source: Honeywell Best Ceiling Fans with More Lights 2021 While fans have a very functional role, ceiling fans with lights add a touch of modernity to your space. Having a fan and light installed as a unit will spruce up any room reducing the need to crank up your AC system. With several fan options on the market, our favorite ceiling fan with lights is the Hunter Fan Key Biscayne Fan Ceiling Collection. It has a 3-speed engine with reversible airflow. Source: Hunter Fans What makes this fan a great choice is the flexibility it offers. The blades are made from Barnwood and given a drifting oak finish. Combining such a rustic finish and a light lantern-like outfit brings a marine feel to any space. The fan material includes stainless steel, which makes it ideal for both indoor and outdoor use. It is a good choice for both traditional and modern décor concepts. It comes with a 3-speed ultra-quiet engine that moves air with power and maximum performance. The blades have a 13-degree step for ideal air movement. Since the engine is reversible, the blades can move clockwise during the winter for hot air circulation. The lighting kit comes with two longlasting 14W CFL lamps that add a nice glow to any room. The fan comes with three installation options - a narrow fitting for low ceilings, a downrod for high ceilings, and an option for corner ceilings. For fast ON/OFF operations, a traction switch is included. The fan doesn't come with a remote control, but it's compatible with hunter remote controls and wall controls sold separately. Whisper-quiet but powerful engine Optimized for both indoor and outdoor use The lights are pretty bright The design blends with most home décor preferences You should buy a remote separate liquid-rated Fan made oak finish makes it ideal for use in areas exposed to high humidity, such as terraces, patios, and sunrooms Source: Harbor Breeze The Harbor Breeze Mazon 44-inch fan features compact, unique, and elegant design. It detects three reversible blades with a silver or espresso finish, a perfect complement to modern décor. Measuring 44 inches, it is a good fit for inside small rooms and offices up to 100 square feet. Alongside the fan, you can get a light kit. The kit includes a dimmable LED 18-watt light tab and a matte opal glass lens. In the brightest light setting, you get 600 lumens and 3,000k at color temperature. The fan blades are thrown at 16 degrees for perfect airflow up to about 2,800 CFM. Using a remote control, it is easy to control the speeds of 3 blades maintains a comfortable degree of airflow. Unfortunately, it comes with a hugger/flush mount option only, which is the ideal choice for low ceilings. Ideal for both cold and hot seasons It comes with a remote control and a wall cradle Flawless design to complement the modern décor It has a powerful but quiet engine Suitable for small to medium sized rooms For indoor use only Perpetual The reverse flow feature allows you to use the fan all year round. Source: Honeywell What better way to have a blast from the past than by using the Honeywell Sabal Palm Ceiling Fan? Each of the four blades is handmade from basswood and given a beautiful brass finish. Each blade emphasizes the unique design of a sheet and the surface polished into a wooden grain texture. This is an extremely beautiful ceiling fan, both in color and design. The lighting kit features a tuscan sand glass light bowl and two E26/A15 lamps. For additional customization, you can change the glass bowl to a better one. The fan comes with traditional chains pulled for quick ON/OFF functions. But then, it's compatible with Honeywell ceiling fan remote controls sold separately. The fan function is an extremely quiet reversible engine with three air circulation speeds. During winter, you can reverse the blades spins for a warmer atmosphere. It comes with three mounting options, a narrow mount, angled mount, and hangs from a downrod. The fan is a perfect fit for medium to long rooms and offices measuring 350 - 450 sq.m. The blades are carefully handmade The overall design is detailed and elegant. It has three mounting options The engine is whisper-enough and reversible The lighting kit is a little dim You should buy a remote separate Tropical vibes With warm bronze finish of the ceiling fan and vintage wooden blades, you will enjoy a cool breeze and stunning tropical atmosphere. Source: Modern Amazon Ceiling Fans feature sleek and clean designs that combine with contemporary décor. Modern Revenge Ceiling Fan shows a stunning clean-cut metal design with striped blades. The fan's engine and blades feature an elegant chrome and silver finish that complements modern interior design. The built-in light kit comes with three adjustable 6 watt LED lamps. Their maximum color temperature is 3,000k, and the brightness stands at 1300 lumens. A six-inch installation is included. For higher ceilings, you can buy longer downrod so as to set the fan to a comfortable height. Also, the fan comes with a remote control to control the reverse airflow and speed of the blade. Adjustable LED lights state-of-the-art modern design Variable downrod height ideal for large spaces. The lights can't be released without the remote control. Highlight a modern and stylish fan ideal for large spaces and high ceilings. A perfect fit for modern or transitional interior décor. Source: Honeywell You'll Love This Rio ceiling fan with matte black blades and a lightweight kit. The kit includes two 13 watt CFL lamps and an iced glass bowl. Some people find bulbs a little believe, you can replace them with a brighter one or use the fan in the bedroom. The blades have a decent 15 degree tar and span from a 3-speed reversible engine. A remote control is included for easy control of fan speed and light level. With the help of smart synchronization, you can turn on the 'foot off dimmer light. The fan comes with three mounting options; A narrow base, a bottom bar, and an angled placement option. Even better, you can buy a bond center so that the fan works with Alexa for voice control. Ideal for medium and large rooms With a Bond center, fans use voice controls Multiple mounting options Reversible engine The lightweight kit is not the brightest Absolute Bazaar A functional ceiling fan with additional smart features at such a price? It's an absolute deal. For convenience, modern ceiling fans feature reversible airflow mode. There is cold air during the summer and warm air during the winter. Depending on how bright the light kit, these fans can be used as the only light source or to support existing light fixtures. Even more importantly, always know your ceiling height, mounting options, and the basic feature you could want from a fan with lights before buying. Ceiling fan Hunter Fan Key Biscayne remains the best ceiling fan with lights. It has a textured oak finish that allows the fan to withstand moisture and moisture. The 3-speed engine works in reverse during the winter to circulate warm air. Also, the lightweight kit design looks more like a lantern, which creates a rural feel. The lightweight kit is bright enough to be used as the only light source. Credits – The team that worked on this Guide Grace Monene is an avid Tech Writer.
