Understanding how a modern search infrastructure works is a daunting task. Radu, Matt and Roy make it an engaging and practical experience. Sen Xu, Twitter Inc. Elasticsearch in Action teaches you how to build scalable search applications with Elasticsearch. It will increase rapidly, with an informative description and an attractive introductory example. Within the first few chapters, you'll pick up the basics you need to implement basic searches and efficient indexing. With the fundamentals right in hand, you'll get an organized view of how to optimize your design. Perfect for developers and administrators who build and manage search-oriented applications. Get Elasticsearch in action now with O'Reilly online learning. O'Reilly members experience live online training, as well as books, videos and digital content from more than 200 publishers. Elasticsearch in Action teaches you how to write applications that offer professional-quality searches. As you read, you'll learn how to add basic search features to any app, improve search results with predictive analytics and relevance ranking, and use saved data from past searches to provide users with a personalized experience. This handy book focuses on the Elasticsearch REST API over HTTP. Code snippets are mainly written in bash using cURL, so they are easily translated into other languages. Code snippets are mainly written in bash using cURL, so they are easily translated into other languages. See also Important Changes in 7.11. FIPS 140-2 complianceedit If you are not running Elasticsearch in FIPS 140-2 mode, skip this section. In some cases, such as when using Bouncy Castle's FIPS module in Elasticsearch can throw unexpected exceptions that prevent startup. In Elasticsearch 7.11.0, we added a new HASH algorithm that supports PBKDF2 to resolve this issue. For more information, see the Elasticsearch FIPS 140-2 documentation. Changing Breakedit Machine Learning Add new exclude_generated flag that removes the fields generated in the GET configuration APIs #63899 (problem: #63055) Mapping Distinguish between simple matches with and without the terms index #63945 The Deprecationsedit/CAT Deprecate APIs local parameter of /_cat/indexes #62198 (#62198 (problem: #60718) I unapprove the local parameter of /_cat/shards #62197 (problem: #60718) Deprecate API features/indexes_upgrade API (#47678) #50484 (problem: #47678) Security Deprecate certificate generation without CA, and add self-signed option #64037 (problem: #61884) New Features Audit Enter new audit log for security configuration changes via API FEATURES #62916 Features/Ingest URI parts processor #65150 (problem: #57481) Geo Add geo_line aggregation #41612 (problem issue : #41649) Search to Introduce Asynchronous Search State API #62947 (Problem: #57537) Implement the Latest #65304 Transformation Function : #65869) Enhancementsedit Aggregations Add hard_bounds support for histograms based on #64246 histogram fields (problem: #62124) Add support for histogram fields to qualify the #63289 aggregation (problem: #62124) Add support for histogram fields to qualify the #63289 aggregation (Issue: #62939) Add supports for higher and lower values in the worksheet based on the IQR #63617 value (problem: #60466) Add value_count mode to qualify agg #63687 (problem: #63575) Allow set-based and regexp-based mixing to include and exclude #63325 <4> (issue: #62246) Consider the query when optimizing date rounding #63403 Accelerate date_histogram without child #63643 (problem: #61467) Accelerate #63245 rounding of ranges to Use global ordinals in Cardinality aggregation when it makes #62560 sense to assign Add categories of data preference for the index of the snapshot blob cache system #64004 (problem problem : #63204) Audit log a warning when the current license level does not allow auditing #65498 AUTHENTICATION Adding APIs to generate SAML SP metadata #64517 (problem : #49018) Adds the realm name OIDC _security/oidc/prepare and _security/oidc/authenticate API responses #64966 (problem: #53161) Enter an additional hasher attribute (PBKDF2_STRETC)H) #65328 Returning tokenGroups as SID string instead of byte array #63509 (problem: #61173) Authorization Optimize set of role bits at document level #64673 CCR Clarify puts the non-existent settings on followers Client Add authentication information to access the token creation information #62490 (problem: #59685) EQL Add ?
