With over 800 levels and 40 packs, Word Whizzle is one of the deepest challenges you'll find in any game on iOS or Android. To topple each level, you need to fully understand how to play Word Whizzle. Below are the main aspects of playing Word Whizzle.First, let's go to the basics. In each mode or level of Word Whizzle, you'll see a letter block and an empty letter bank at the bottom. Depending on the number of responses in a level, each line in the letter bank represents a different word. A topic appears at the top of the layer. This topic is the key to your answer. For example, if you have the theme of winter clothing, you may find the word coat in your puzzle. To spell your answer correctly, simply click on the first letter of the answer and drag your finger over the next letter and so on. This becomes even easier because the letter bank at the bottom returns the number of letters in the answer. Once you have answered correctly, move to the next level. In the game on, things get much harder on you. Fortunately, the developers of Word Whizzle have given you in-game hints to get you through. If you are confused, click on the lower right corner to get a hint. From there, the game will help fill in some of the spaces with a letter. Be warned, however, as these hints are limited and after a time, you need to spend money on them. Instead of wasting your money, just use our Word Whizzle answers! it is important to realize that there are two modes in Word Whizzle.
