FFxiv fishing power leveling guide

If you have been looking at how to achieve higher fishing levels in this popular MMO, then look no further than this FFXIV fishing guide. There are some factors to keep in mind, and you first need to unlock the Fisher Guild more than Lims Lomins. To smooth out quickly you will need to choose the best lures, the right fish, and the most useful places that will help you. In this guide, we're breaking it down into sections of smoothing, including: If you're interested in more fishing-related FFXIV, you're sure to enjoy our FFXIV Ocean Fishing Guide! FFXIV Fishing Leveling Guide So without further ado, let's start with this FFXIV fishing leveling guide! Fishing Leveling 1-15 In the first five levels, you will be looking for fish known as Lominsan Anchovy, and Harbor Herring. There are also levequests to complete, although at these lower levels you are best attended by the best grinding spots in the most effective experience. With this in mind, we are looking for two types of fish that we have just mentioned, which can be found just outside the guild itself. Use Lugworm bait in Anchovy and Pillburg for herring until you reach level 5, which requires five Lominsan Anchovy and three Harbor Herring. To reach level 10, we'll be looking for Princess Trout. Again, you can keep off worrying too much about levequests here because there's more to be gotten out of grinding places. Level 5 Levequests include Sea Cucumber, Harbor Herring, Ocean Cloud, and Coral Butterfly. Returning to Princess Trout, you can find them on most rivers in Middle La Noscea using a craych ball. More specifically, you should look for Nym, Rogue, Mourning Widow and West Agelyss. Your best way of hitting level 10 is to hit up Murmur Rills with a cray man ball to get there quickly. From there to level 15 we will give five Navigators dagger. Your best bet is to use Rat Tails over the Brewers Beacon. Swiftperch is very useful to get to 15, especially using Goby Ball to get you the fish needed to get to the goal. This is the best choice of fish at this level level to get grinding. 15-35 From 15 to 20, mostly shift your attention through Rat Tail aleport to give you the best chance of catching Levequest Fish, including Razor Clam, Helmet Crab, White Coral, and Rothlyt Oyster. We will need five Warmwater Trout fishing Quest Level 20, which can be easily found at Oakwood using crow fly. Grinding, Fallgourd Float with Midge Cart is effective just because their XP deals are. To reach 25 we go after shadow catfish. So far, you will have learned release skills that allow you to release the fish that you have caught. As for Shadow Catfish, you can help yourself by using a moth bean to catch them out into the swamps. You will need to be able to mooch complete this search, which you will not get until level 25. Your Levequest fish meanwhile are Dark Sleeper, Copperfish, Black Eel, and Faerie Bass. Your best places to grind are the Yugram River with Butterworm to get eels at night, or Oakwood to both Crow Fly and Brass Spoon Lore. Fishing Quest Level 30 is 10 Fullmoon Sardine. They can be found on the Umbra Islands, although they only spawn at night. So, take your Spoonworm and head north between 6 and 6 to get the catch. Once again, don't worry too much about Levequest Fish here, which includes Dark Bass, Five-Il Plecmo, Yugram Salmon and Black Ghost. Grinding spots are a way to make better use of your time, which here includes Ceruleum Field. Using Chocobo Fly Lure here is going to see you grinding for a long time because of how effective it is. On the 35 level fishing quest we need desert catfish. They are located in South Thanalan, using Sand Leech at two sand fishing areas found here. Stick with Ceruleum field with Chocobo Fly Lure to keep these levels growing. 35-50 Fishing Quest level 40 we need five Raincaller that you will need to catch rain. When the weather is on your side, head to Gridania City. Use Stem Borer bait to get the best results as much as possible. Your Levequest Fish from 35-40 includes Seema, Crimson Trout, Lamp Marimo and Giant Bass. You can grind Sagoli to get to level 37, then head to Nail to jump to 40. Moving to quest level 45, there's five Cloud Cutter found. They are just outside of Whitebrim, and you can unlock Cloudfishing when you hit 45 too. Focus on Nail your Levequest Fish, at least North Pike, Bronze Lake Trout and Abalathian Smelt. You don't need to really bother with Golden Loach. To grind take some Stem Borers to the Burning Wall, followed by the Exploratory Icehole coerthas in the Central Highlands with Topwater Frog Lure. Your next target is level 50, so we are looking for Mazlaya Marlin. It's hard for the fish to find, and you'll need to feature Double Mooching to really catch what's unlocked at level 40. Try to catch HQ Harbor Herring and HQ Ogre Barracuda with floating Minnow to help you with your role. Instead of focusing on grinding spots, here you want to spend more time with Levequest Fish, with Ignus Snail, Mud, IlSabardian Bass and Boltfish all being found at Ceruleum Field with Honeyworm bait. 50-65 The first couple of levels we have to find Glacier Core and Icepicks. The former is much easier to catch, although Icepicks will prove useful later. The latter can be found in South Banepool as well as Unfrozen Pond. You will need a clear sky to get glacier core, but you can hit level 52 pretty well with farming them. Otherwise, go to South Banepool on Lake Urchins and Fanged Clams. On Level 53 Quest you need Getting to level 55 you are going to want to go to one hundred throes to get yourself some Whilom Catfish and Blueclaw Shrimp, as well as three HQ Shadowwhisker on a level 55 quest. Forget the Levequest fish level of 56 because you mostly need a lure that is not unlocked until you hit level 58. Check out the Smoldering waste of Warmwater Bichir, as well as Whilom Catfish and Blueclaw Shrimp. Then you can get the Noontide Oscar from Eli Tohm churning the fog. At level 58 we will need a letter puffer, often found in the sky at the landlord Colony. For this set of levels, just focus on comfortable grinding areas. From 58 you will be looking at Weston Bowfin with Curring Mists, and Illuminati Perch in the Hinterlands and Thaliak River. You can use Goblin Jig for both of these fish in any weather. There's also a Bullwhip that you definitely focus on to get yourself to the next level, although you'll need Fiendworms on it. There is also Fountish, which is from level 59, and Yalm Lobsters at level 60. The good thing about hitting 58 is that it opens up a lot of new paths for you in terms of catching new fish. Focus on bullwhip and illuminati perch by Goblin Jig, the Cat Killer of quest fish in the 60's, which is found in Eddies. From 61, explore Rapids Jumper to get you above. They are available from mooches too, which are going to save us a lot of time, although you can also choose Highlands perch. At 62, grab the Muudhorn Fishing Rod and 99 Live Shrimp before grinding common Whelk yanxia. At 63 you have Deep Velodyna Carp as a quest fish that can be caught in the Velodyna River. Meanwhile, 64 brings you Calm Waters too, which can be a useful skill for spearfishing. As for what you are going to be catching, you should stick with Common Whelks now, and armored crayfish, because this is a faster way to go forward. 65-80 – Home Stretch on FFXIV Fishing Leveling 66 we have the truth of the ocean, as well as stealth XII to help us with spearfishing. Meanwhile, to move to the next level, you should explore kobayashi maru marine lamps, and Doman Bubble Eye from Sunken Junk. This is where you can catch HQ Dafangshi, which is level 68 in search of fish. If you don't want to use spearfishing by the way, Zekki Island is a good place to grind collectible fish like Daio Squid, or Levequest Koromo Octopus, both of which can be caught using Bream Lure. We also need to catch Giant Lesiosaur on a level 70's quest to head to Onokor with Live Shrimp. Once you're past deadzone at level 70, the fishing type kicks up gear in the sense that you have a Surface Slap as well as gear updates. Once you have the gear you need, you can grab some Fruit Worm and farm eighteyes eels over at Lakeland. This should be sufficient You get level 72 and you can speed it up with Albino Caiman too. You shouldn't focus too much on Levequest fish here, but if you want, then check out Xanthic Bass Lakeland, and use Fruit Worm again. Going up to 74, check out Blood Cloud and Weedy Seadragon for Levequests and Collectibles respectively. From there to 76 explore Lemonfish and Cherry Herring, although Lemonfish is probably your best bet because it has the best XP ratio. Next we will become a crab with Gourmand Krabi. It can be found in Rak's Greatwood to find the North Lake Tusi Mekta hole for your fishing needs. Crab is better than any of your options at this point arguably, so be near them as much as possible. At 77 you will get a quest in which you will need to get yourself a Calico trout, which you can use a fruit worm to catch them at Longmirror Lake. Finally, we are at home in the stretch. An aspect of the quest for this level is Amber Angler, which may not be too hard for you to find. You can get it in the Amber Mountains by sucking in the Dessert Dessert Frog. To get to the coveted level of 80, then you can just keep going after Gourmet Crab, literally trying to catch each of you coming across. Honestly, spearing crabs is your best way to go, but you can also go with some collectibles here and there with Golden Lobster and Albino Caiman. Any of them you can spearfish will also be useful if you want to go down a collectible route, but yes you should be able to hit level 80 courtesy of crabs. FFXIV Fishing Equalization Manual conclusion So if you have managed to reach level 80 of this FFXIV Fishing Equalization Guide, then congratulations. It's definitely a pretty old hike to get to dizzying heights in the 80's, but these methods should get you there within a reasonable time. The main thing is to know what lures and bait to be with you, but also where to make the most of where you go to grindspots. There are also some tactics to adopt, and whether you choose to focus on Levequests or Collectibles and so on will determine how quickly you make your way to the 80's. Regardless of the tactics that you use, you will be a pro FFXIV fisherman in no time and will master the fishing rod among your peers. Peers.
