FunctionalityMargaritaville Bahamas Frozen Concoction Maker comes with predefined margarita programs and designed to make a range of truly restaurant-quality slushes. The margarita is just the tip of the iceberg; it scrapes ice so perfectly that with some applied creativity, you can prepare a variety of drinks and recipes:Pre-defined program Shave 'n Blend and brainless mixer ingredients measure allow automatically make full jug (3-4 servings) of perfect margaritas; Although the predefined program is designed specifically for a margarita, the brainless mixer also has the Pina Coladas and daiquiris measurements to prepare full pitcher (3-4 servings) of these drinks using the same functions as predefined margarita or Manual Shave and Blend; By experimenting with Blend and Shave modes, the user can make a variety of other types of slushes or alcoholic cocktails and get finer or thicker consistency of any beverage; Using Save and Blend manual functions, create non-alcoholic frozen beverages, including virgin frozen juices, mocktails, iced tea or coffee, lemonades; some recipes are provided in the cookbook that comes with the package, or you can try your favorite you know or from other sources, you can also follow the recipe in the brainless mixer, but leaving the alcoholic ingredients out; Make carbonated frozen drinks like Icee and Slurpee, but carbonated liquid should not be the main ingredient in the mixing bottle; otherwise, carbonation could shake the liquid overflow of the bottle; Smoothies with shaved ice, however, you can eliminate ice using mixing mode for longer; Snow cones, the machine makes ice so light and fluffy scraped that you can easily use it to produce delicious snow cones. Thus, Margaritaville Bahamas Frozen Concoction Maker will make a happy family and make delicious drinks for adults and beautiful snow cones and fruit ice for children. It is also possible to make smaller parts of margaritas, Pina Coladas and daiquiris by manually measuring ingredients using manual shaving and mixing modes. It may take a few tries to find the right consistency. You can master the recipes by starting with the recipe that comes with margaritaville books and gradually adjusting them to your liking, then changing the recipe to different consistency or manually scraping more ice into the drinks. It takes some trial and error as you learn the right proportions for the perfect drinks. Margaritaville Bahamas Frozen Concoction Maker blends all the ingredients well and achieves the perfect goodtaste so you can't taste the tequila in the margarita. How It worksThe Margaritaville Bahamas Frozen Concoction Maker sits the mixing process in two steps. First, it scrapes ice into the shaving tank with a special blade system and releases the snow product through a special parading into the mixing bottle with a dedicated blade system. Secondly, in the mixing pot, the snow and other ingredients are mixed to create a perfect blend. The machine also has a special ice melt tank on the back of the base unit where the melted ice drained directly from the ice reservoir. This ensures that slushies never get watery and always have perfect consistency. OperationFirst, fill the mixing bottle with ingredients using the Brainless Mixer or manually. If you want to make a full jug of margarita margarita margarita, Pina Coladas or daiquiris recipes, it is best to use the No-Brainer mixer — the plastic container with the measurements of the ingredients on the sides. Place the mixer on the lid of the jug, fill the mixer with ingredients, release them to the bottle, and then remove the mixer and fit the bottle into the base unit. Then you fill the ice reservoir with pure ice cubes. Now the machine is ready to operate. The mixing cup measurements and machine automation are all aimed at making a pitcher, not a single serving. If you want to try other recipes or prepare a single piece of margarita, Pina Coladas or daiquiris, you should measure the ingredients manually. The manufacturer's advice is to use only liquid ingredients when filling the mixing bottle; however, in my experience, it is ok to add some frozen or fresh fruits and fruits; the blender has enough power to process it. Speed and program settingsThe Margaritaville Bahamas Frozen Concoction Maker comes with a power button, a pre-programmed Shave 'n Blend setting, and a Blend/Shave manual alternator only. If necessary, the power button activates the machine or stops the Shaving 'n Blend cycle earlier. Pressing the machine automatically starts the Shave 'n Blend cycle, which takes approximately 35 seconds. The cycle begins with shaving ice in the ice tank for about 15 seconds. The machine sends the snow from the ice tank into the mixing bottle and activates the mixing process by finely mixing snow and other pre-filled ingredients into the mixing bottle. The mixing process will last again for about 15 seconds. The Shaving/Mixing switcher activates the functions of shaving or mixing only. By pressing the alternator in the Shaving position, it scrapes the ice into the reservoir until it holds the alternator. By pressing the alternator in the Blend position, it will activate the blender bottle for the mixing process until you hold the alternator. Simply put, the Shave 'n Blend cycle mixes the right proportion of ice and other ingredients to prepare the full pot of margaritas, Pina Coladas and daiquiris. The Manual Shaving/Blend function is used to prepare other recipes or customize drinks to the perfect texture for any personal flavor. Assembly/DisassemblyThe Margaritaville Bahamas Frozen Concoction Maker comes with many parts and can be challenging to assemble and disassemble. Each piece has to be assembled in the right way. The machine won't turn on unless the ice cap is locked the right way. The ice distribution stop must be lifted in the correct way to fit the blender to place. There are eight pieces in total that need to be assembled and disassembled. Cleaning In general, the Margaritaville Bahamas Frozen Concoction Maker is not very easy to clean. The disassembly process is quite tedious and complicated. Some parts of the gadget are safe for dishwashers, and other parts should be cleaned by hand only. The ice melting tank, mixing bottle with the blade cover and assembly (blades, gasket and base collar) — could be cleaned in the top rack of a dishwasher. The part that is involved in the ice cutting process – ice reservoir with lid, shaving shovel, ice funnel, ice deflector blade assembly, razor blade – should be hand washed and dried because they are designed not to be exposed to hot temperatures. The ice razor blade and blender blades are super sharp and should be handled with extreme care. Base Unit and Motor PowerO Margaritaville Bahamas Frozen Concoction Maker is equipped with 450 watt engine to scrape ice and mix all the ingredients of the blender. The machine operates using a power cord, so it requires an AC electrical supply of 110 to 120 volts. Margaritaville no longer produces battery-operated Bahamas machines. However, it could be used through a lighter for tailgating. The whole base unit is made of plastic material, but looks nice and sturdy. The Margaritaville Bahamas Frozen Concoction Maker also has a cable storage compartment that hides the unused part of the stowed cable on the back of the appliance. ContainersThe Margaritaville Bahamas Frozen Concoction Maker comes with four containers and 2 lids. All of them are made of a very heavy breakproof plastic material of 1/4 inch thick: 36 oz. mixing bottle with Easy-Pour hatch cap for a quick dose of mixing. Serves 3 to 4 drinks per jug. However, the mixing bottle was not designed to handle hot liquids or sudden change in food temperature, which could cause the mixing bottle to crack; Brainless mixer with side marks up measurements that show how much of what to add to Pina Coladas, daiquiris and margaritas. It does all the guessing work for you with measuring ingredients; Ice tank with a secure locking cap containing enough ice to fill a full jug 1; Rear ice melting reservoir that channels ice melting so that drinks don't get watery while standing. Margaritaville Bahamas Frozen Concoction Maker, via AmazonBladesThe Margaritaville Bahamas are equipped with two sets of high-quality stainless steel blades — razorblades for the ice-cutting reservoir and the blade assembly for the mixing bottle. The blades are of good quality and very sharp; however, they don't get dull over time. Special FeaturesColor: This model is only available in a color decision with a metal base and a lime jug. Refurbished Certificate: There is no refurbished certified version available for this model. Use in countries outside the U.S./Canada: The Margaritaville Bahamas Frozen Concoction Maker is designed only for a 110-120 voltage system. The user can operate it on the voltage transformer. However, the manufacturer does not recommend this as it may compromise the functionality of the machine. Margaritaville Bahamas Set of frozen mixing manufacturers includes reservoir and lid; Shaving shovel; Ice funnel, ice razor with deflector, blade mounting nut; Mixing base with control panel and ice breakers, ice melt reservoir and cable storage door;36 oz. (1.07 L) Mixing bottle with lid; Set of blades with sealing ring and base/jar collar; Brainless mixer; Measuring cup; Quick departure guide; User manual; Margaritaville Manufacturer Legacy Story; A simple guide for pitchers; Changes to the Latitude party guide with recipes. Warranty and Customer ServiceThe Frozen Concoction Manufacturer of Bahamas comes with a limited term of 1 year without transmissible Just. Customer service is polite and helpful. They will replace or repair the unit or parts free of charge within one year of purchase. If you have a problem with the machine or need spare parts that are not available through the usual retailers, you should contact Margaritaville Customer Service directly the warranty period is passed, the customer would require paying some fee for the service of the unit. However, the machine is well made and durable and easily lasts more than 3 to 4 years. NoiseThis is the ice processing gadget, and it's no way it's too loud. It produces well over 100 decibels when operating. Optional accessories And accessoriesThere are extra accessories available for this model: The bottles and most other unit parts are interchangeable between margaritaville models. All replacement parts are also available through the online retailer's website or manufacturer. Margaritaville Replacement JarDimensionsThe Margaritaville Bahamas Frozen Concoction Maker is quite large and has a footprint of 14 inches X 8 inches with a height of 18 inches when fully assembled. It is not designed for easy storage because its components are not nested perfectly. However, this machine is not for daily use to sit on your counter, so it will require some storage space in your kitchen. Margaritaville Bahamas Concoction Maker Pros and ConsPros:The Margaritaville Bahamas Frozen Concoction Maker is the best machine on the market that has been designed to make a truly quality restaurant mix in the comfort of your home; It does just make perfect frozen drinks, but also able to quickly make them which is very important if you organize a party; The Margaritaville Bahamas Frozen Concoction Maker not only makes frozen mixture, but can also be used for ice and snow cones; The gadget is durable and will last easily for more than 4 years. Cons: Requires a lot of storage space; It can be tricky to assemble/disassemble and clean. Margaritaville Bahamas Concoction Maker Consumer ReviewsThe Margaritaville Bahamas Frozen Concoction Maker is a piece of heaven in your home. It looks beautiful and makes frozen drinks of perfect quality. No for nothing, it has mostly excellent customer reviews. PriceThe Margaritaville Bahamas Frozen Concoction Maker is the cheapest model from blendmaker Margaritaville. Margaritaville Bahamas Frozen Concoction Maker, via AmazonSummaryThe Margaritaville Bahamas Frozen Concoction Maker is a chic ice cleaner. Although it is very tall, difficult to clean, and has a massive size, it beautiful frozen drinks. It's a little-needed appliance in the kitchen. However, this piece of heaven will be nice to have a gadget for those who like slushies and like to host parties. In addition, it comes in a very nice and colorful package that includes everything to make quality drinks from bar, no doubt; it will also be a great gift option. Option.
