Download whatever you want from the repository, quickly. With MarioCube fully hosted on Google Drive, it's easy to get what you want. Деякъ зункъ Word въдобраътъ Google. змъни зункъй, змъни Докладнъзе what can you find here? WiiWare Game Channels WiiWare Virtual Console Game Channels WiiWare DPC and Games Released on Disk Utility Channels (Time Channel, News Channel, Netflix Channel, etc.) Controls on the different emulated consoles Custom channels created by the INJECT Games community in Virtual Console to play without the need for external emulator Something else you add over time to complete this collection How to install WADs on your Wii 1- Have an SD card formatted in FAT32. 2- Download the .wad files (s) you want to install and put them in a folder on the SD called wads. 3- Download WAD management from this link (if you don't already have it). 4- Extract the file and copy it to the root of the SD (it has come in the necessary folders). 5- Launch the app from homebrew channel just like any other channel. 6- You accept the disclaimer that appears in the first place. 7- In the selection of equipment, it is left on the SD card and followed. 8- Here we move to the wads folder and enter. 9- Select wad and give it to install. How to install and activate a DLC To use a corresponding wad installation DLC by following the steps above. Once installed, open the DLC problem game and go to the in-game store (you'll need an internet connection). From there you'll see purchased content, ready to download or activated. Utility card in name: Region: (Europe) - PAL (USA) - NTSC-U (Japan) - NTSC-J (Korea) - NTSC-K (World) - Free Zone You can also find several specific countries (Spain), (Italy), etc. Gaming machines console: (C64) - Commodore 64 (NES) - Nintendo Entertainment System (SNES) - Super Nintendo Entertainment System (N64) - Nintendo 64 (SMD) - Sega Mega Drive (SMS) - Sega Mega Drive (SMS) MasterGa System (Arcade) ? Arcade (NG) ? NeoGeo (TGX) ? TurboGrafx-16/PC Engine DLC: If the DLC is from a Wii game the game name will appear followed by (DLC). MORE DEDICATED DLL If it is a WiiWare DLC, wad channels and DLC will be on top of each other in the list. Tap the letter to go to the content that begins with that letter To search for a specific WAD, you can use the CTRL + F browser search engine and enter the title of the file you're looking for. It should be noted that all names are in English. For example, if you want to search for a Time Channel, you should search for a Forecast Channel that is the original name in English. Download and install the Nintendo Wii use Wii WADs. Roms, Virtual Console and WiiWARE in wii WADs Torrent before installing Wii Homebrew Apps and wad files you need to unlock your Wii » Nintendo Wii WAD files like a zip file or cab on the computer containing a full set of files to install a .app (apps, programs, games). The main purpose of WAD Wii files is to install custom made channels and cIOS, but they are also considered an equivalent to ROMs and ISO files the majority of which are warez. Wii Homebrew Browser or WAD Manager can be used to easily install WiiWare roms and Virtual Console roms that can be downloaded from torrents without paying for them in the WiSTORE. Wii ISO Torrents | ModChips to run ISOs and Homeberw | Wii Model Page 2 Welcome to 5 Arcade Gems, a collection of five eccentric arcade games. You can play alone or together with your friends - you will surely find something for your taste, be it a middle-aged knight game or an extremely modern space shooter. Compete with other knights to defeat evil wizard's challenge in Templar Bashing. No danger is in the way of dutiful jungle pizza delivery companies, not even fierce barbarians who won't tip! Outsmart your competitors in RC Buggy Madness. Prove your skills and reflexes in Lumberjack Trials. And of course, no adventure is complete without some deep space boom action in Whirling Rangers. More Info Less Information 5 Arcade Gems has no rating on the World of wii. Write a review Please log in or join so you can write a review. Tagline (a short sentence or question): Full review: Gameplay (1/10) Graphics (1/10) Sound (1/10) Longevity (1/10) 10% ^ Move slider to give your rating Hey, just so you know ... This post is now about 8 years and 8 months old. Please note that as it may very well contain broken links and/or outdated information. [I'm sorry for using the term rabbit hole three posts in a row! -windracer] Apparently I have one thing to do homebrew stuff in April: almost exactly two years after softmodding my Wii so I can download my games from a USB hard drive instead of a disc, I find myself wondering if I can do the same for Virtual Console and WiiWare content. Well, of course you can! The road can be confusing and frustrating, but the destination ... yes, it's a cool destination. I was very pleased with my USBLoader GX setup, but it occurred to me that since my Wii always launches directly into the loader (thanks to Priiloader), I've skipped my VC and wiware games! A quick Google search then and I found to create the ISO delivery to run the content as a disc-based game. While the tutorial itself is very clear and detailed, it still takes me a few hours to wrap my head and get every function. Since it'd been a while since I last touched my homebrew setting, I first: Then I follow the steps in the tutorial to make a one of my Wii NAND, extract it, and put it on a separate partition of my USB hard drive. Next I created ISO deliveries for my virtual console and WiiWare games, and added them to the loader. The snags I ran into were: In addition to the WBFS partition on my USB hard drive that contains all my games, I had an exFAT partition created by Windows 7 that I used to store more. I had to re-format it as FAT32 (using EASEUS Partition Manager) so that the extracted NAND folders could access the Wii. I also had to put the NandGames folder on the root of my SD card (instead of the hard drive), otherwise I keep getting loader.dol errors not found when trying to launch a VC/WW title. I also ran into the problem of switching SD card keys again. With all the back-and-forth I did the SD card move between the Wii and my computer, switching the moving lock should ever be slightly down. It's not enough to make the SD card read only on my PC (that's why I didn't notice at first) but it's enough to cause strange problems with some homebrew apps like the cIOS d2x installer to freeze. I think I was really screwed something up until I happened to notice the switch lock and solve the problem. After all that, though, check it out! (I had to create that 3D box art for Magician Lord on the right side of myself... others were automatically downloaded by USBLoader GX) Just having the game icons in the loader doesn't mean they'll actually run, however, so next I had to check each one. Only two of my games didn't work right away: Magician Lord and Target Toss Pro: Handbags. Magician Lord, my only neo-Geo VC game, will load but not show any video. The game is still running, I can listen to the soundtrack and even start and play the game, I just can't see anything. If I press the Home button on my Wii remote, the video will appear behind the Wii system buttons. The problem turned out to be the need for . Following the instructions, I pressed Z + A + 2 while in the Activity Guide for the game and fixed it! But getting bags to work is when rabbit holes appear... And I fell. After hours of messing around with different IOS base versions and combining slots, installing loaders, and reading forum themes, I couldn't (and still can't) get this game to run from NAND extracted through the loader. I want to get health and screen safe, and then the Incredible technology and N-Space loading screen, and then just a black screen and Wii will hang. I even tried Mighty Channels and, but the game won't work through those either. It didn't help the bag doesn't seem to be a very popular WiiWare title: I just have found a mention it involves running through a loader with no details. In the end I just quit before I screwed up another 99.9% of my games that worked. If anyone Get this game to work through a loader with an ISO forwarder, please drop me a line in the comments! Update: I got it working! This post is for all NTSC & PAL Virtual Console Games area, only genuine game releases are here not injectable.
