This moisture-curing rubber coating creates a chemical bond to the roof surface that provides exceptional adhesion and permanent waterproof seals to almost every roof type. Black Jack® ETERNA-KOTE® is a permanent solution on flat roofs and/or in areas that may be guardrails. The elastic surface will not crack and will last where the other coatings will fail. Ideal for hot or cool environments, the Black Jack® ETERNA-KOTE® dyes into a bright white finish that reflects UV rays and keeps roof surfaces cooler to reduce cooling costs. In addition, the formula with a high content of solids is a quick setting, low odor and can be applied in a wide range of temperatures in order to get more opportunities for use. The Black Jack 905 is an effective full-size coating for general roof use. Brushing asphalt contains added fibers, resulting in a long-lasting reinforcement mixture that can help repair, seal and waterproof roofing. Black Jack can also be used as a party barrier on the walls and non-plastic eaves. Here we will show you how to apply the roof cover black jack. What you need: Step 1 - Get ready Black Jack can't fix a structurally unhealthy roof. So before applying, make sure that the roof structure has been checked. Slate, tiles, leaves and other coverings that are cracked or damaged should be fixed or filled. You should also make sure that the area is clean and free of loose dirt, dirt, dust, grease and fungi. Step 2 - Apply Black Jack roof paint below we have detailed the different ways to apply Black Jack roof paint, depending on the type of roof or surface you are working with. Use on asphalt roofs If you are fixing blisters on asphalt roofs, first soften with a washer. Apply 2 black jack roof coatings with a brown are working with. Use on built-up felt roofs First remove loose chippings. If defects wider than 0.75 mm appear, fill the Bitumen putty first and allow to dry. All blisters should be opened and cleaned. Apply Black Jack and glass membrane, if necessary. Use on reinforced concrete Prep concrete and allow all new decks to heal first. These can be primed using bitumen flashing primer. Use on light concrete If you are carrying out preparatory work on light concrete, let the deck and screed first heal. When applying a felt base made of glass fibers, make sure that it is partially connected with the help of black jack roof felt glue. Make sure that the felt is trapped, sealed and that there is enough ventilation under it. If necessary, you can then use black jack roofing and glass membrane. Use on asbestos cement film Ensure that asbestos cement film Ensure that the first coat is dry before applying the second layer. Applying to metal surfaces First remove loose rust or signs of corrosion. Then apply a phosphate primer to prevent rust from re-emergence. Apply two layers of 1.5 m2 black jack 905 roof coating per litre per varnish. Use on slate and tile make sure that there are no loose or damaged slates and that the sheets are firmly in place. If necessary, apply a Black Jack 905 and then a glass membrane. Using as a roof coating in all weathers and/or scrim treatments, apply the first 905 coating to a clean and receptive surface and then apply the glass membrane immediately after it is still wet. Make sure that no air is trapped under it and that the glass is trapped by 50 mm to 75 mm. Paint the inside of each wheel with 905. Bridge small gaps and make sure that the membrane is not too tight. Continue to jam the glass and roof coating until it measures 150 mm vertically. Secure with self-edging and at the same time allow the 75 mm flashing to be in contact with the zmachine. Apply the second layer 905 and leave to dry. Use as the final surface Recommended the third and last coating 905. Apply until the film is still sticky and blinded by 1 to 2 mm of stone chips or sand. As an alternative, you can wait 3 days or up to 2 weeks and use Black Jack Solar Reflective Paint. Application as a party barrier Apply two layers of 905 to the warm side of the wall. Be sure to avoid the pinhole. After drying, apply the insulation to its upper part. Note - Black Jack is not suitable for roof lighting, windows or other glass surfaces. Do not use in places where contact with the solvent is likely. Avoid inhalation. For more information on roof paint, talk to one of our teams who will be happy to advise you on the use of one of our products. Or you can check out our next line of Black Jack Bitumen Paint and Roofline products. Warning: (All orders will be shipped week beginning January 4) Refuse to skip to 100% SATISFACTION Guaranteed discounts in all combined shipping lines Available Home/Sundries/Bitumen SKU: 90505 Description Everbuild Black Jack All Weather Roof Coating is a solvent based, full body black brushable compound with added fibers for reinforcement. It is specially designed for rewinding leaking roofs, as a repair of roof felt and other general weather inspections on roofs. Dries on a hard black coating. Pros: Black Jack is a quick-drying blend. Allow to dry completely for up to 24 hours. Not affected by water immediately after application – it can be applied when there is a risk of rain. It can also be used to glue felt. Easy to apply with brush area for use: Everbuild Black Jack All Weather Roof Coating is an effective, versatile roof coating. It is resistant to retaliation from the rain almost immediately after its application, and therefore is ideal for winter use. Waterproofing non-plastic gutters Can be used with a brush to waterproof and re-seal many different types of roofing material, including asphalt roofs, concrete roof decks and built felt roofs. Working as a shed roof felt repair black jack is also great for asbestos-cement sheets and sheets including iron, steel, zinc, lead, slate and tile can be used in conjunction with rot-proof hessian reinforcement scrim or asphalt coated glass fiber scrim, such as glass membrane. Everbuild Black Jack All Weather Roof Paint can also be used as a vapor barrier on walls and roofs. Application: Read our instructions on how to apply Black Jack roof paint. Specifications Weight 6.5 kg GTIN 5056364701799 Brand Everbuild Colour Black Coverage 6.25 m2 Drying time 24 hours Size 5L All weather roofing material is solvent based, full black brushable asphalt mixture with added fibers for reinforcement. It is an effective universal roof applications, gutters (without plastic) and structurel steel structures. Tools should be cleaned with paraffin or white spirit. Please note that this is an alternative to the fast-drying Aquaseal roof waterproof. Application Black Jack all weather roof coating is an effective, versatile roof coating. It is rain-resistant almost immediately after its application and is therefore ideal for winter use. Black Jack all weather roof coating can be applied with a brush to waterproof and re-seal many different types of roofing material, including: asphalt roofing. felt roofs. Concrete roof decks. Asbestos-cement film. Sheets, including iron, steel, zinc and lead. Slate and tiles. Coverage of 1.25 m2 per liter per shell depending on the porosity of the substrate. Two layers give dried film approximately 0.9 mm. Surface preparation The product cannot be expected to be repaired on the roof surface by an existing roof that is not structurally sound and stable. Before applying the finish, the roof structure should be replaced or re-fixed and cracks in felt or asphalt filled. Safety recommendations: do not cover roof lights, windows, glass or translucent sheets. These will pose a hidden danger if disguised. Surface preparation is of great importance and will affect the degree of adhesion and durability of the renovation. All roof surfaces to be coated should be healthy, stable, clean, i.e. clean. All traces of growth of eyelashes and fungi should be removed with the help of a rigid bristin brush. Where algae and fungi were present, remove them completely and treat the surface with everbuild sponge wash to kill all remaining spores, thereby discouraging the return of growths. Storage Black Jack all weather roofing material contains flammable solvent, and all common fire control measures must be taken during storage and use. Store in the original container in cold dry conditions. Keep away from sources of ignition. Ignition.
