AirPods - View other user manuals for Apple brand Apple Watch – wristwatch with additional functionality (smart watch), created by Apple and introduced on September 9, 2014. For your complete work requires a family of iPhone 5 or later smartphones. Original Apple Watch watches are divided into three types: Apple Watch Sport Sapphire Glass (grey or silver anodized aluminum body, with Ion-X glass) Apple Watch Edition (gold body design) The second generation apple watch series 2 was introduced in September 2016. Apple Smartwatch PDF Manual File Size Download Apple Watch PDF Link User Manual.pdf 4.8Mb Download Apple Watch Schematics 2.jpg 90.2kb Download Apple Watch Schematics link.jpg 86.4kb Download Specifications The watch screen (two options: 1.32 inches on 38 mm (272 x 340 pixels) 340 pixels, 340 pixels, 326 ppi) or 1.5 inches in 42 mm (312 x 390 , 326 ppi)) OLED type, protected sapphire crystal, is able to distinguish between pressing and touching. Sensitive to pressing force (Force Touch technology). Controls: The watch is equipped with a Digital Crown circular wheel on the side side and an elongated rocker button under it. The wheel is used to move or zoom in; Clicking on it allows you to return to the home screen. The lighter is used to call 12 selected subscribers, who can call or send a message (if the right person is not there, you can go to the second search method - in the phone book, rotating Digital Crown). On the left side – speaker and microphone slots. Photodiodes for pulse measurement can be located at the bottom of the watch. For vibration is the linear movement of responsible drive of the Taptic motor, its impact (on receiving warnings, etc.) is similar to an easy tap on the wrist. The watch has no connectors, the battery recharges (capacity 205 mAh) using an inductive adapter with magnetic clamps. It is recommended to charge the watch every day, the full charge lasts about two hours; The battery will not lose more than 20% of the original capacity for every 1000 recharge cycles. In one of the slots is a technological port, covered with a plug purpose not yet known – this connector is supposed to be for accelerated loading, which can be used later). On the Apple Watch there is no usual pcb, instead of using the so-called (SiP, system in package) Apple S1 (all the elements needed for watch work are packed in a small metal box, processor, chip RAM, chip NAND flash memory, sensors). On the built-in storage capacity clock of 8 GB, of which the user is available a little more than 6 GB. There are no cameras, but the device can be used as an iPhone remote viewfinder. Own GPS receiver for the original series of watches is not (added in series 2), they use the phone's navigation resources, communicating with it via Bluetooth 4.0 and Wi-Fi 802.11b/g. Watches have an NFC interface and allow you to make contactless payments using the Apple Pay system. There's a gyroscope and an accelerometer. According to specifications, the watch complies with IPX7 and is capable of withstanding a 30-minute immersion in water up to a depth of one meter. The watchOS operating system has an interface reminiscent of iOS, but with round icons. Functionality The Apple Watch screen is turned off while you're not looking at it. As soon as you turn your hand in the eye, the screen is activated (unlike some Android-based models, your Apple device will immediately return to standby mode as soon as you turn off your watch hand). If you want to immediately turn off the screen, simply cover it with the palm of your hand. Dial-up SMS – using voice dictation (Russian is recognized), the normal keyboard does not fit on a small screen. You can use an already made template. Built-in Fitness Tracker (Analog Adjustment): Pulse measurement, counting steps and calories. Taptic Engine lets you send other time owners from Apple a set of taps or beats. Siri Assistant (called by pressing and holding the wheel). Mail client with limited functionality (the text of some letters is fully displayed, and when you try to read others it advises opening the iPhone and running the corresponding application there). You can't reply to a message with a watch, you can only delete it, mark it as unread, or check the box. No browser on Apple Watch, bookmark as well. On your Apple Watch, you can pour up to 2GB of music. Apple Watch is not designed for game use. In January 2015, several companies, including TapSense and InMarket, announced plans to launch hyper-local advertising watches on screens. When you turn on your watch immediately you're asked to close its relative, you're asked your phone's iPhone to bring your camera's smartphone to the picture on your Apple Watch screen. Then all apps installed on the iPhone and adapted for the watch are transferred to the device. Two devices are connected via Bluetooth. In addition, the Apple Watch communicate over Wi-Fi if both devices are connected to the same wireless network. Apple Mac iPad iPhone Watch TV Music Support Set up Apple Watch for a family member Accessibility and Settings Restart, Reset, Restore, and Update Apple - Apple Watch Series 2 42mm Space Gray Aluminum Case Black Sport Band Apple Watch Series 2 is a superior sports watch that measures your workouts with detailed customizable metrics.
