Callaway strata review

Don't think about buying Callaway Strata golf clubs, but aren't you sure if it's right for you? In this Callaway Strata review we address everything you need to know to make your decision. Are Strata golf clubs really made by Callaway? Let's do this first. There is some debate about whether Strata was made by Callaway. And as far as we know, the answer is ... No, they're not. They're only distributed by Callaway. But, according to a positive record, Callaway is very protective of his own brand of golf, and associated with outstanding golf clubs. As a result, they would not have dispensed strata clubs if they were not satisfied with the quality. And as Strata is proudly displayed on the Callway website, it is announced as Maximum Performance Right Out of The Box.... It would be wrong to assume that Strata is a brand associated with Callaway's company. Even if you don't get the Callaway logo on your clubs, you're relieved that Callaway advertises, sells and distributes Strata. But if you really want a Callaway logo on a number of golf clubs suitable, then you might want to look instead of Callaway Edge. Who are Callaway's Strata Golf Clubs for? Let's take care of something else. Callaway Strata is fantastic golf clubs for the price, though, what you get paid for. And Callaway premium golf clubs (such as the latest Barge range) will have to accept that some of the price, quality will not be up to quite the same standard. That means it's usually best suited for novice golfers. And if you are starting to want

to upgrade the game, or an old second-hand set of a player from time to time, then you will not find a better series of golf clubs at this price point. On the other hand, if you are a more talented player, but you need an affordable array of golf clubs that can only serve better by looking at golf clubs used on eBay. Normally you will be able to get a number of old Ping irons (such as excellent G20s) for a couple of hundred dollars. Although there is undoubtedly time to add a driver, wedge, putter and bag, it will still probably be slightly above what strata clubs will pay for a whole new range. Long story short: we're not here to say they're the best golf clubs in the world. But if you're dipping your feet into golf, or looking to upgrade an old set of second-hand clubs, then it's an excellent choice. What's in the bag? Now let's take a closer look at the clubs. You have several different purchase options. Their sets are a bit odd, 12 pieces, 14 pieces are called and show that there is a number of clubs that you will get 16 pieces. But in any case ... Not. You get 12 pieces of Strata set: Driver, 3 wood, 5 6, 7, 8, 9 iron, pitching wedge and a shooter (9 clubs) you get a 14-piece Strata set: Driver, You get 3 wood, 5 hybrids, 6, 7, 8, 9 iron, pitching wedge, sand wedge, and a putter (10 clubs - if you are getting a sand wedge) and 16 pieces of Strata set: Driver, 3, 4 hybrid 6, hybrid 6 , 7, 8, 9 iron, pitching wedge, sand wedge , and a shooter (11 clubs - we get a sand wedge and 4 hybrids) which is good to be honest with. Whichever set you choose you will now get all the clubs you need (if you can really buy a separate wedge). So Callaway (or Strata?) feel they need to be a little more transparent in naming. In case you're wondering, extra menstrual clubs aren't, they're stand bags (in any case) and head covers (in varying numbers). Now let's take a closer look at the clubs. The first thing we recorded about the Callaway Strata driver is the big 1 plastered on the site. It's a bit old school (yes, we remember calling them 1 forest) and we kind of. But cosmetics aside, what do you get? First, we get a 460cc head, which is the size of the big driver's head that you will see in most modern clubs. Some still look oversized, but today 460cc is just standard. Sidenote: We made some other reviews giggle (we wouldn't point fingers) about the driver's head continued big or giant. It's neither. Standard drive size. It will be illegal to play a bigger tournament. Continues... The driver has a titanium head and a big sweet place to forgive extra. Titanium head is a good sign here, like what to do with the most expensive drivers and lighter than steel (read faster). The loft (non-adjustable) is set to 12 degrees. We are happy to see more lofts = more backspins (high launches) and fewer sidespins (tight distribution). So it will be perfect for the most novice golfers and high handicappers. Tip: If you're throwing too high at your drive, you may be hitting too many ground. Move the stand-up ball up and try to hit more. This will bring down the turnaround and give you a better throwing angle. Most professionals may hit on their drivers, but we mortals must be crashing. All, a beautiful big (but great) reassuringly inspiring driver, to maximize forgiveness that hits the center off a large sweetspot. Hit it good, you'll hit it too far. Callaway Strata Fairway Wooden Callaway Strata set, especially 3 wooden fairway wood you will get. Unlike drivers there are usually slightly more variations when it comes to the size of 3 wooden heads, and we would say that strata 3 is on the large side of wood. That gives you confidence that you can lift it up from short things. Loft 3 on wood 15 degrees. To be honest, we'd like to see this at maybe 16 degrees, but the big head and the forgiveness should balance the lower floor a little bit. Weighing 351 grams, Callaway Strata 3 wood is beautiful and light, slow swingers will help zip a little more. And if you plan to use 3 wood from the tee, again the big head should help with the tee box tension. As Callaway Strata Hybrids Callaway Strata is designed for beginners and high handicappers, it's no surprising that this set forgoes long irons and a hybrid (or two) swaps. You get it with all three sets (12, 14 and 16) with 5 hybrids (instead of 5 irons) and an additional set of 4 hybrids (instead of 4 irons) 16 pieces. On the loft 4 hybrids are set at 22 degrees, 5 hybrids have a 25 degree roof. Unsurprisingly Strata's hybrid is designed to be easy to hit, and for long approach shots (even tight fairways tee) they will serve well. Callaway Strata Irons move on the Irons, and again they are designed to get the ball in the air, at a high level of amnesty hitting the center off. They will never be forgiving like premium clubs (such as Callaway's Mavrik), but you will notice the difference that old clubs have been in the game (or heavenly forbidden knives). And as I mentioned knives, I must confirm that Callaway's Strata Irons have really bruised backs. The bruise looks a little shallower than the one we've seen at other novice golf clubs from Wilson's likes. This multi-game development is designed to minimize irons and curve. So don't expect any major workability. But let's be honest, most of us would take a straight ball flight every day of the week. You may not be able to hook around the tree easily, but you should make sure you have to hit this shot less often already in the flat flight! Callaway's Strata irons are made of stainless steel, lofts are 28 degrees on 6 iron, running up to 40 degrees on 9 iron. Wedges (PW and sand) are really a follow-up to the irons here (same cavity background design) so they won't cover them separately. But we were surprised to see that the sand wedge is a 60 degree roof which honestly does not make a sand wedge (we would expect a 52 or 54 degree loft there). And this leaves a fairly large gap between PW (44 degrees) and SW (60 degrees). You'll probably want to practice your half-wedges. But on the positive side, you go there will be more shooting options around the green in the set of 14 or 16 pieces (with sand wedge). So we're guessing horses for courses. Putter including Callaway Strata Putter is plausible no-frills, but has a visual alignment help to be the gavele style (we prefer) and help you align It will be good to play golf, but the novice golfer may be the club to think about the first trade as a middle movement. After all, if you're shooting somewhere around 90, you're using your pitcher for at least a third of your pitches. Short story: the shooter is good for novice golfers, but you may want to try different putters in the future to find out that it is best for you (every golfer is different) unless you love him. Being a better pitcher is the fastest way to lower your scores. What else is included? With all the sets, you'll get a stand bag. It's on the cheap side, so don't expect fantastic waterproofing, and if you're valuable storage in this bag (like your phone) then you might want to invest in a separate dry bag to keep them. The good news is that there is plenty of storage space on the bag with 2 zip pockets for balls and tees and large compartments on both sides. Basically, it's not the best golf bag in the world. But you can easily set back a golf bag for \$100 or on its own, around the quality we expected (basically taking into account free). You also covers for the driver, 3 wood and hybrids (s). Do you have any negatives? So, if you are a novice golfer, the Callaway Strata set will be a great choice. But let's take a look at its potential drawbacks. First, a number of golf clubs that you can develop as quickly as you can grow. Either you want more workability with irons, or you're looking for a little bit of extra distance whether it's more expensive clubs. But we can really balance that with the fact that this is a ridiculously affordable golf club. You will also be able to trade (or sell) them when it upgrades/upgrades them. So it's not biggy. Secondly, as we mentioned earlier, I don't like naming here. It's not a 12-piece set, it's a 9-piece set. It's not a set of 16 pieces, it's a set of 12 pieces. We believe this may lead to confusion/frustration for some buyers. And to clarify, this problem (get plentiful) is not just the lack of marketed way clubs. But the more you read this review, the more you know exactly what you're taking, so it won't come as a surprise when you open the box. Finally, let's consider the potential deal breaker (and why not). We noticed several criticisms stating that the driver broke after not being used too much. The first thing we should pay attention to is that there are only a small number of these reports in thousands of purchases. But secondly, and you have to say something more important it can be with any driver. I personally plucked the head off the \$600 Ping G400. How'd it go? Bad swing, I came down steeply and hit clubhead into it And let's be honest (if a little harsh). As callaway Strata is aimed at novice golfers, there is probably a higher number than the average of bad swings put on the golf ball. Basically if you hit a drive between 70-120 mph, there's a chance it'll break. No matter how expensive it is. So while we're being careful, we're not too worried here either. Now let's answer the big question. Should you buy Callaway Strata golf clubs? With potential downsides off the road, let it be a turning point: Is Callaway Strata right for you? Our view: if you are a novice golfer, even a higher handicap who wants an upgrade, then yes, Callaway Strata will be a solid choice. They're not the best golf clubs in the world. But for money, they are a solid array of golf clubs that will either start, or help improve your game. And the last thing to say here is that you seriously searched for a Callaway Strata review (or similar) as I was thinking about buying them. In fact, I've probably already read a few reviews. So if the golfer above sounds like you (beginner, or high handicap) and Callaway Strata is on your budget, then you should just go here now and buy them. Why are we saying this? Because we're golf crazy, just like you. And when looking for equipment, we will tend to read every criticism under the sun. But in this case, as Callaway Strata is very popular, we have found a lot of reviews that tend to go overboarding their quality. We didn't do that. We've been honest about good and bad, so you know what to expect. So we don't waste another half hour of research. You know what you need to know. And we highly recommend either going here and buying them, or having a reading in our Callaway Edge review (quality, a level up to a slightly higher price point, but still in the affordable category. Either way, enjoy the new clubs and see them on the course! Launch for money Ease of Distance Summary Callaway Strata is right for you? If you are a novice golfer, or even a higher handicap looking for an upgrade, then yes, Callaway Strata will be a solid choice. Selection.
