Microsoft Check: Enter the characters to finish with a check and click Next. Finally, you've already set up your account and Microsoft will ask you the next question you want to save in?, Click Yes, only if you are on a secure connection, your home. Hacking and security breaches have become more common as criminal sophistication improves. Users should make sure their Hotmail account is as secure as possible when using it. There are several ways to do this: use a strong password that is hard to guess and very diverse to make it as secure as possible. Always connect to your Hotmail account with HTTPS, making sure you're on a secure server connection and that any communication with the data sent between you and the server will not be intercepted by hackers. You need to make sure that password reset information in your Hotmail account is always up to date, so in any case, if you forget your password, you can always reset it with recovery information. Include a two-step check of your Microsoft account to improve security, either through Hotmail or through You suspect that your Hotmail account has been hacked, you should change your password as soon as possible. Microsoft has a recovery page that you can use to restore access to your Hotmail account. Along the way, you may be asked to enter answers to security questions that you have previously created or provide account details to prove your identity. You can expand the information here: Restore Hotmail account. On the first screen of the recovery page, select a script that applies to you, which in this case will have forgotten my password. Click the next button. On the second screen, enter the Hotmail account address you're trying to recover, and then follow the instructions to enter the characters that appear on the screen; they are there to thwart the software of the robots that are hacking the web. Click the next button. The screen below offers a few ways to verify your identity to regain control of your Hotmail account. You can send the security code to a backup email address that you may have provided in the Hotmail settings at some point when you set up a two-step check to protect your account. A text message on a smartphone or a voice call to a mobile or landline phone in your account settings. Or you can get a security code from an authentication app like Google Authenticator or Microsoft Authenticator for Android, iOS or Windows Phone.Si none of the listed ways will work to verify your identity, select a button next to I don't have any of them and click next. The next screen invites you to enter an alternative email address (or create a new Outlook.com account) for microsoft to send a security code and eventually unlock your account with a new password. How to set up an IMAP POP3 and SMTP for Outlook.com/Hotmail.com How to Get Out of Hotmail How to Change Your Password in Hotmail How to Restore Hotmail Account How to Delete Hotmail Account Create an Account in Outlook.com (Hotmail) Five Days news Xataka News Five Days Computer News Today News Today News 20 Minutes CNET News in Spanish News Computer Today News Computer Today Computer Today News News AS News Spectator News Sends Your Comments to MSN Points Global Ranking for site: Opens in a new window Opens an external website in the new Mail window Hotmail is still valid, and although Microsoft renamed Hotmail outlook in 2013, the truth is that you can still log into Hotmail through a new website. Form to enter hotmail email/Outlook.comWrite password to access your account and then click the Login button. Continue reading the article, or go to our article, which will help you step by step to restore outlook account. InboxTo enter directly into your Outlook or Hotmail inbox just to log into the service; After that you will be delivered directly to the list of received emails, a sector also known as inbox or mailbox. Enter the to enter your Outlook or Hotmail account. Enter your email address and click Next. Enter the password and click in. You will then be directed directly to your email inbox Outlook.Si you logged into your account and were not sent to that sector, you can open your inbox directly with or by clicking inbox on the left. The Hotmail app celularOutlook.com app that can be installed on your device, whether it's Android or iOS. Then steps to log in from the official Outlook.Download app from the relevant store. Once installed, access it and click the Introduction button. In add an account, enter your Registered Outlook email address and then click Continue. This app also supports email from other providers such as Yahoo or Gmail.Enter password for your email account and then click Login. If you don't want to add another account, click Skip.Ready! You'll see your Outlook inbox from the app. After adding a Outlook or Hotmail account to the official app, we recommend you turn on notifications to stay on top of all emails that reach your inbox. You can also open email directly from your mobile browser, address outlook.com your preferred browser. You may run into login problems when you log in, but don't worry, it's a very normal thing. Normally, if you don't remember your password or email address, there's a way to restore access to it as long as you've assigned recovery information when you create your account. Here are the most common questions: Forgotten password or email: When you try to access your inbox, you may see the wrong password error, making it impossible for you to access your account. Reset your password, access the link, and you'll need active recovery information in your account. Forgetting everything: If you forget everything and can no longer open your account, you can contact Microsoft at the following link: you can get a security code: if you have no way to verify your identity, go to enter your email address, and then click on the link I don't have any of these tests. Then follow steps to restore your account. Locked account for 30 days: If Microsoft discovers that your account has been compromised, it will likely ask you to change your security information and restore your account, after which you will need to go through a 30-day security period before you can log in again. It's an extreme case, but it can happen. Active two-step check: If you've included a two-step check, you'll need to use the app's password to register. Blocked Profile: Outlook blocks accounts that have broken usage rules or been compromised. To restore access, you will need to follow the steps of sms verification. When you're traveling or subscribing to another device: Outlook may find that entry activity is suspicious if you're trying to do so from another device or somewhere else; In order to enter these conditions, you will need to verify your identity using the SMS method or email recovery. Privacy tips for credential theft are usually caused by surveillance when you log in to Outlook or any other service that requires you to enter a password through the keyboard. That's why we'll give you some tips to make the login in your account as secure as possible by preventing the loss of your account and ending it in the hands of intruders. Make sure the address of the page on which you enter your data is official: postal service You can only access Microsoft at these official addresses: live.com, outlook.com, hotmail.com, microsoft.com, msn.com, as well as login, account or mail.x.com subdomain (with x is one of the addresses mentioned above). Make sure the address in your browser is one of them, if you see something 1-outlook.com, stop! This could be a possible phishing attempt. Keep your antivirus active and up to date. Antiviruses and antiviruses are extremely important for detecting malware that collects sensitive information, such as passwords, to keep them informed! If it's not your computer, come out at the end. Don't make the mistake of leaving the session active on devices that don't belong to you, other people can check your email! Update your password regularly. If you need help with this, check out our article on how to change your Hotmail.Enjoy service provided by Microsoft for free without any hassle following the tips we just gave you. Your account will be completely secure with them and you won't have any problems. Everything about Outlook.comOutlook is one of the most used email services on the web as we discussed at the beginning of the article. Creating an account on this service provides access to a variety of services offered by Microsoft, including Skype, OneDrive, Office 360, and more. If your email, hotmail.com, you'll surely find it rare to log into Outlook Mail, however, you should know that Microsoft changed the name of the service from Hotmail to Outlook in 2012, although the transition was only effective in 2013. This Microsoft email service has gone through several names in the past: Hotmail, MSN Hotmail, Windows Live Hotmail and Outlook.com, so Hotmail can appear in a variety of areas: Mail.Live.com: Live.com is owned by Microsoft, and there are several Outlook emails registered with Microsoft live.com or live.es.MSN.com: When you access microsoft MSN.com site, you will have a direct link to the email services. MSN means Microsoft Network. In MSN.com you can find hotmail news, video, entertainment, prodigy, sports, horoscope and other very useful sections that keep up with what is happening in the world. Hotmail.com: A classic address that was launched in a year 1996.Outlook.com: A new address that is maintained to this day. This domain is redirected directly outlook.live.com.Microsoft.com: This is Microsoft's primary domain. Sometimes a Microsoft page can request your Hotmail data Outlook.Skype: This is the Microsoft IM service that replaced MSN Messenger. You can download it and access the service using the Hotmail account. Find out more about Skype.Hotmail Normal: Classic or old VersionDick to the previous design I Hotmail.com I want to use it again? Recall that in 2013 Microsoft reinvented the hotmail brand, which will be renamed Outlook.com. Many users want to go back to the previous version of Hotmail, but we regret to inform you that this is not possible because Microsoft has discontinued the previous Hotmail design and is no longer available to its users. The previous design looked like this: the image above is an old version of Hotmail when it was called Windows Live Hotmail. In 2013, Microsoft began switching the old mailbox to a new one, making it impossible to go back to the old one. You'll notice that now, when hotmail.com, you will be automatically redirected Outlook.com; this is not a problem as you can also check hotmail mail through Outlook.However, one thing we have noticed in world accounts is that many users are not happy with the mailbox that is divided into Others and Priority, something that is in many cases annoying since you tend to overlook important emails. Fortunately, there is the ability to combine the mailbox (so that it was similar to the old Hotmail). To leave your inbox similar to Hotmail before, you need to go to the settings icon in the top right corner (gear icon) and then turn off the Priority Inbox option. You'll see all your emails displayed in the same tray. Regional domainsMicrosoft has also acquired regional domains for its postal service, such as the ones mentioned below: Mexico: in this country, Hotmail mail service offers a domain hotmail.com.mx to access mail, many registered addresses have hotmail.com.mx; However, these addresses no longer appear to be available. Colombia: The Colombian hotmail domain is that hotmail.com.co you can access email from that address. Venezuela: The Caribbean country does not have its own domain, which redirects directly to the Microsoft mail service.Peru: from Peru you can access Hotmail through the domain hotmail.com.pe.Argentina: this country is also widely used service, which is available through hotmail.com.ar. We noticed that outlook.com.ar address is also available for access to mail. Spain: in the country hotmail.es is a regional domain used by the service. In addition, the outlook.es suffix is also available when creating a new email. The site www.hotmail.es is available and sent directly to the mailbox. Among other domains available are some users who want to create an account from specific countries. It is important that you know all this information to avoid confusion or doubt when accessing the Microsoft.See email service in other languages: Hotmail enter direto (Portuguese - Brazil), Brazil).
