It was released on March 20, 2008 in Japan, November 13, 2008 in Australia, and November 21, 2008 in Europe. It was released for the Wii U Virtual Console in Europe and Australia on June 9, 2016, in Japan on July 27, 2016, and in North America on August 4, 2016. The game is set in a new region called Almia where the main characters have just graduated. The selection of partner Pokémon has gone from Plusle and Minun to a choice of 17 different species, each representing the 17 types of Generation IV. In addition, there are several side quests and a card collection system used to upgrade the Capture Styler. Special missions were available from the Nintendo Wi-Fi Connection service, via Ranger Net, before the service was discontinued in 2014. Gameplay Takes place in the Almia region. In the story, the player's character begins as a student in a Pokémon Ranger School. After some homework, they graduate. The player can choose to play as a male or female protagonist. Players can choose the name of their protagonist, whose default settings are Kellyn (male) and Kate (female). The game features mainly Generation IV Pokémon, but features some Pokémon from other generations. The player will have a selectable Pokémon partner. After doing certain missions, the player can choose whether he wants the Pokémon to come with them. Selectable partners include Munchlax, Turtwig, Chimchar, Piplup, Kricketot, Mime Jr., Cranidos, Shieldon, Croagunk, Machop, Pachirisu, Starly, Hippopotas, Snover, Sneasel, and Gible. They can be changed by talking to them on the player's family farm south of the player's house. It should be noted that each Pokémon is one of 17 types of Pokémon and that each Pokémon has a different length of a partner energy bar. The partner's energy can also be filled faster when in good spirits, signaled by black or multicolored musical notes rising above it. The evil team is called Team Dim Sun. Team Dim Sun uses computers called Miniremo Units to hypnotize Pokémon and put them under their control. The game has sixty optional missions where the player helps the citizens of Almia. A player can only undertake one mission at a time. When a player completes each mission, he gains a power boost to his Capture Styler. Missions are divided into two types: friendship-making pokémon and missions that players receive a power boost for their Capture Styler. After capturing the first 266 Pokémon in the Browser, the player can go against Regigigas. The player must currently have Regirock, Regice and Registeel in his group. Regigigas is located in a sable pit, hidden in hippowdon temple. A collectible card system can boost the Capture Styler. The player is able to ride Pokémon in some environments, including lava, rivers, and icy waters. There are five Pokémon a player can ride on to progress to other locations: Doduo, Torkoal, Empoleon, Staraptor, and Floatzel. There were three Pokémon unlocked in this game by Special Missions in Ranger Net, in the vein of the Manaphy Egg mission in the prequel. These missions are no longer available. Available Pokémon were a Manaphy Egg, a Riolu with Aura Sphere, and Darkrai with Dark Void. In addition, there is another group of missions. The rare Pokémon encountered during these missions are Dialga, Palkia, and Shaymin (Land Forms). Unlike special missions, Pokémon captured in extra missions cannot be transferred to Pokémon Diamond, Pearl, and Platinum. The game was able to use the Nintendo Wi-Fi Connection to unlock both special and extra missions, but only for a limited period of time and before the interruption of service in favor of Nintendo which only supports the Nintendo Network of Wii you and Nintendo 3DS. They did not work for different regions; only the specific game version when holding the event would be able to use the feature. Special missions can be repeated, but pokémon can only be sent once. This is an improvement on the original, as the reproduction of the Manaphy mission has only played a video in which Lunick, Solana and the Professor's assistant discuss After the game, a capture arena is available for players to hone their skills. Pokémon Ranger while graduating from Ranger School and assaulting the duties of a ranger in all respects. The male character is named Kate. Missions advance through the story, focusing on Team Dim Sun antagonists and their unknown intentions involving Pokémon mind control machines called Gigaremos powered by dark crystals. Missions usually consist of the player traveling to the Almia region, performing different tasks required by citizens in exchange for rewards. The game begins at Ranger School, with the player signing up as a student after expertly capturing a Pikachu. The player quickly befriends two classmates, Rhythmi who dreams of being an operator, and Keith almost find out what Mr. Kincaid, a teacher, is doing in the basement, Mr. Kincaid seals him off from all the students. Both the player and Keith show as strong potential as Rangers, and graduate with full honor after defeating two Tangrowths, who escape from the basement, at their graduation ceremony. The player stays at Almia, while Keith and Rhythmi go to Fiore as part of their training. The player's family moves to a nearby town known as Chicole Village, and the player goes to live with them. The next day, the player becomes an area Ranger in the local village of Vientown. After retrieving a partner Pokémon, Pachirisu, Munchlax, or Starly at the beach, the player begins his first major mission by patrolling a nearby cave. Pokémon inside the cave are unusually aggressive and resistant to capture by the Ranger's styler. At the back of the cave, the player finds a strange machine (later called Gigaremo) that seems to control the Pokémon. Rangers promptly destroy the device, freeing the Pokémon, and begin to search for its abilities. Later, the rangers discover that the Gigaremos were set up by Team Dim Sun, suggesting wider criminal activities. The player goes to Ranger Union, the headquarters of all ranger operations in Almia, to warn the Rangers of the Gigaremo. On the way, the player sees Altru Inc., a powerful oil company that is building a massive tower in the center of the Almia region. Shortly thereafter, the player is informed of a forest, north of Vientown. After entering the forest, the player will have to capture a Blastoise and use his Rain Dance move to tame the fire. Afterwards, the player congratulates himself on how well he has done and can progress in the city on the other side of the Vien Forest-Pueltown. days later, the player is sent on a mission to retrieve the missing team leader, Barlow. Barlow was last seen in Boyleland investigating a volcanic cave. The player will have to go to Pueltown and take a boat to Boyleland. Deep in the cave, the find Dim Sun Team members deploying new Miniremo devices to control all Pokémon on the island. The player dodges the guards and discovers that Barlow has been captured and is placed on a ship along with the Pokémon. The player sneaks on board, locates Barlow and the two launch an assault on the ship's deck. Although Barlow's Styler was destroyed in the ensuing attack, the player forces Team Dim Sun, including its leader, Mr. Kincaid, to abandon the ship, saving all of Boyleland's Pokémon. The ship crashes into the courtyard of Ranger School, never to sail again. Recognizing the threat posed by Team Dim Sun, the Ranger Union promptly promotes the player to the rank of Top Ranger. At the Union, the player discovers that Keith has also been promoted to Top Ranger, and that Rhythmi has fulfilled his dream of becoming a top operator, where he serves as the player's guide. During the player's first mission as Top Ranger, named Sven, investigate a Dim Sun mining operation in the Ruins of Chroma, east of ranger union. They discover that Dim Sun is looking for dark crystals to power Gigaremo devices. After defeating a Spiritomb, they also discover a huge hole, apparently left by the removal of the legendary Shadow Crystal whose current location is unknown. While studying the dark crystal recovered from a captured Gigaremo, several Union workers accidentally discover that the crystals can be neutralized by a series of red, blue, and yellow fragments. The player and Keith separately collect the sources of these fragments; the blue gem of Almia Castle, the red gem of boyle volcano and the yellow gem of hippowdon temple. Although the player takes both blue and red gems, Keith is captured by a member of team Dim Sun's Sinis Trio, who uses it to blackmail the player into surrendering to the yellow gem. Meanwhile, Sven raids Dim Sun's submarine base, stealing plans for an Incredible Machine. The plans reveal that the tower of Altru Inc. Realizing that the tower will become operational within a few hours (i.e. during the opening ceremony of the tower), the Ranger Union orders all its Rangers to attack the tower. Equipped with a specialized Styler designed to overcome the influence of the Gigaremo, the player manages to disable the tower's force fields and saves the vellow gem, allowing the other Rangers to launch an aerial assault on the Shadow Crystal at the top of the tower, the tower reaches operational capacity before the Rangers can reach the Shadow Crystal. Altru Inc.'s president, Blake Hall, takes the opportunity to destroy the Rangers' only hope of disabling the tower (the three colored gems) the crystal at its highest level of power and evoking its strongest Darkrai. Darkrai goes crazy for the intense power overload, attacks Blake and obscures the area, preventing rangers from approaching the Shadow Crystal. By upgrading their Styler with gems, the player stops Darkrai's anger, allowing the other Rangers to disable the tower by converting the Shadow Crystal into a Bright Crystal that undoes the mental torture inflicted on Almia's Pokémon. Eventually, peace returns to Almia and its inhabitants, and the characters enjoy a concert originally planned for Latru Inc. The game ends by showing Darkrai circling the Bright Crystal, signifying the return of peace. Blurb Only you and your Pokémon can protect Almia!
