Pego is a youtube video free downloader. You can search for or paste video links, and you can download any type of video in audio or video format. Here you don't need to do any more searching for this app now because we share with you all versions of this Pego Apk app. You can download sound cloud music using this app. This app is very easy to use that doesn't require any type of logic for you to use it. What is Pego? Basically, it is YouTube and Sound cloud digital video and audio recorder. You can record your favorite videos on YouTube and download them in any format. You can record a sound or a track in the sound cloud. You need to copy a link to any YouTube video or Sound cloud music, and then paste it into the Pego app. When you go with a link, the entire video or sound plays when the page opens. At the bottom, you'll see a button to record video or audio. Play the video or sound and tap the record you finished the video or sound will be recorded and you can download it in any format. It has so many features to it. You can remove unwanted noise from the track, just as you can control the volume of any track. You can also perform metadata descriptions, integrated searches, and titles and tags for all tracks. The default is mp3 recording in this app is of the highest quality. You can change the quality of the recording features: there are many of the important features of this app that we are trying to discuss here. Sound quality: Basically, every song or audio is recorded in the highest quality. If the quality of the audio is 256 Kbps, it is recorded at 256 Kbps by default. If the audio already has a quality of 128Kbps, it is recorded in 128Kbps.Records audio and video: record all video songs as audio and download any format. Similarly, you can record the entire video in format Mp4, 144p quality in Full HD 1080p and download immediately. You don't have to wait. Silence Removal: As you have pointed out the silence of the audio at the beginning or end of it. This feature allows you to remove silence from audio. Metadata discovery: Retrieves and fills the correct metadata for Mp3. What is the album name or art, just as it was when the album was released? Sub-recording: A lot of software that can make small clips of any video. But if someone in this app wants to cut a video clip, he/she can. It's as easy as you want to cut some of the video from 10 seconds to 40 seconds. No, all ads: Videos on YouTube have ads. However, in peggo apps, you won't get ad types like pop-ups, pop-up under ads, etc. Live recording and downloading: You don't have to wait for recording and downloading. Record videos with one click and download them instantly. Quick Search: You can perform a search. Your favorite videos according to your interests. You can get search results on the screen. Tap once in the video you want to record. And the record page will get a similar opening to the YouTube page How to install:First download the app settings from the button above. After that, follow the method steps below as a step to install it. Go to the file manager where you downloaded the Pego app. If you haven't downloaded it, download the Peggo file package first. Now tap the file and the pop-up window will open as shown in the screenshot below. You will get an open tab to display unknown sources and then check for new pop-up messages. It will now automatically return to the installation window. Now just install the application.version.versions2.0.78.7MB4.1 or up12/07/2019 page 2 1. To download a query from YouTube or SoundCloud, users can enter the query in the search bar on the Peggo page. It then displays a list of items based on the query. 2. The user can then choose from the selections displayed on the page. When the user presses input, the user reaches the page mentioned as the result of the search. This page displays different albums, video ages, titles, artists, and video durations. Users can then choose the video or mp3 they want based on their query. 3. When the user selects a specific video, they are taken to the next page, which is the digital video recorder page. All you have to do is convert it to mp3 or mp4, and then tap the record. 4. It takes a few seconds for Pego to convert the file to mp3/mp4.
