Games are open for election! Social Media Image Sharing is now in beta! Tournament organizers can now enable the sharing of match results on your social media accounts. Challenge will generate an image for you. Social Media Image Sharing is now in beta! Tournament organizers can now enable the sharing of match results on your social media accounts. Challenge will generate an image for you. Make sure your viewers are aware of these guidelines as well. It is your responsibility to avoid chat spoilers. Sign up for Comment/RestreamIf you want to help with the comment team, there are a few guidelines to follow. Please read this document before you log in. To sign in, click the link above and select a match for which you are available. Alternatively, you can include yourself in the commentator's registration and you will be contacted if a match coverage is required. Comment is selected on a first-come-first-served basis with mandatory rotations based on availability. No one will comment on the entire tournament unless there is no other available option.InfoThe tournament will be a Randomizer race tournament! Up+A on the second controller during the break is allowed (and you are very encouraged to use it, otherwise it is possible to be locked softly in a room, like all other standard interferences (including, but not limited to, block clips and screen scrolls). All races end when Zelda (or Gannon when an enemy sprite is used) is saved. Tournament formatWelcome to the final stage of the Zelda Randomizer Random% tournament. This is the only elimination phase with each other in a best-of-three for the 3rd place. Players are expected to complete one round per week. Good luck, everyone! This is a Random% style tournament. All flags listed below create a filled square check box for the options that indicate that this particular flag may be enabled or disabled, but you won't be able to determine this until you have the match. Power amplifier (KO elimination) The first three rounds of the KO elimination bracket use the T7YYZ2LDI flags! TT3A7VDEN. These flags add the ability of 2nd Quest options and other fleeting flags such as Sprite Shuffle and Swordless. Players still need to do all 8 before entering Level-9. Players can optionally enable the following options: speed up text, enable article exchange with selection, disable music, link sprite, randomizer other tunic, and start tunic color. Final Four (Best 2 of 3)The last four of the SINGLE elimination bracket SINGLE elimination bracket 2 of 3 and will use the following flags: T84R35VOZG8MPLDDEN. These are not locked flags. The only option that is not potentially randomized is OHKO (One Hit Knock Out). Players can optionally enable the following options: Speed up text, enable article exchange with selection, disable music, link sprite, Randomizer other tunic and Starting Tunic Color.RulesAll SpeedRunsLive (SRL) racing rules apply. All participants must use approved emulators/consoles and stream their races. We recommend that you save your race stream file locally if your stream is disconnected and you are profoocalled at your time. If you are not registered with SRL, please do so now. If you don't know how to set up or use an SRL account, please contact a moderator for assistance. Once the race is complete, please contact a member of the admin team to update the standings and times. Races must be played blindly (both if they have not played the seed before and that they have no information from the other player). Players cannot get spoilers from their chats, nor can they watch the other racer. Please make sure to post in your channel that spoilers are not allowed. Players are not allowed to view the restream video or chat until their game is complete. Players are responsible for monitoring their own chat and using the most convenient method possibly to avoid reading spoilers. This can be achieved by closing chat, having mods that can monitor chat and quickly deleting it by putting your channel into subscriber mode only (even if you're not a twitching partner) to allow only appointed moderators to speak, etc. Scheduled games must be played before the specified date. Ideally, we will try to restream all games, so please submit the time of your games using the form (provided) so that a restream can be coordinated. We realize that a tournament of this magnitude has a lot of people with many schedules to work around. That being said, if you plan to play with someone and then apply for the scheduled time without prior notice, you may receive a loss or be removed from the tournament at the discretion of the Promoter. If neither opponent tries to schedule a game, both can receive a loss or be removed from the tournament at the Promoter's discretion. If you have problems contacting your opponent, please inform one of the moderators as soon as possible so that we can help you. All disputes are handled by the mod team, will have the last word on all matters. If a member of the moderator team is involved in the dispute, that member has no say in the final decision. Match ProcedureDiscuss and schedule a time to play your game against your opponent. We recommend the use of Discord or Challenge, but other communication methods are certainly Please contact an administrator for a link to the Discord server! All matches are due above the bracket by the specified date. If you are having trouble reaching your opponent, please let a tournament administrator know. You will be forfeited if you do not make an effort to contact your partner and set up a time to race. If you need extra time, make sure you send an administrator and we will try to consider your situation. Remember that your next game is due at the same time as everyone else will be so diligent. When both participants are ready, start a race in the #speedrunslive IRC channel on irc.speedrunslive.com or at with the command: .startrace tlozhacksOnce the race channel has been created, join this particular channel. fc bot will most likely join the channel once the room has been created. fc has the ability to automatically set the target with randomly generated start number and tournament flags. Within the channel, you can use the command: .tournamentUse the specified start number and flags to generate your Randomizer ROM. Once this is complete, both participants should enter the race. This can be done with the following command: .enterIf both participants are ready to start the race, have their stream available and wait for a file on the file selection screen, type the following command: .readyThe race bot then starts with the countdown in the race chat, and when they reach 0, both players start the race. The conclusion of these races is determined by the loss character control after touching Zelda. Then go to the race channel and type: .done(The winner is determined by the first person who enters and enters .done) Background Info Seeding for the elimination phase was determined by the performance in the Swiss phase:1. Players with the best records.2. The order of players competing in the Go to the Next Round tiebreaker race. For players with tied records or a draw in the tiebreaker race Go to the Next Round, the following criteria are used (in the ranking): Number of victories in the Swiss phase Number of victories of the opponents you have defeated in Switzerland, number of victories of all opponents in Swiss Average race time for your victories in Switzerland Random.org The metrics used can be found here.
