Discursive essay format pdf

GOAL: They are convinced a point of view and statement thesis are required for both essex arguments and discursive. We can use analogy of a court case. Consider the thesis statement as the defense and the entity as the prosecution. There is no point in holding a trial without a verdict. In terms of speaking text, consider your discursive ession as a debate in which both sides are presented. Without a final adjustment, the debate has little reason. Remembering the purpose of a display (argument or discursive) is persuasive, if the writer has no clear input, then it is impossible to persuade the reader. Example: TITLE: 'There is no need to write letters anymore. Phone is a better way to interact with people.

STRUCTURE: 1. Introduction – A short paragraph that declares both point of view and a thesis statement. (Thesis indicates your point of view) It's certainly faster on phones than to write a letter but it may not always be the best way to communicate. The use depends, like many other things in life, in the circumstances. 2. Point To – one paragraph gives the reason in favor. These reasons must be supported by evidence and examples. (This will develop entities) Phone is ideal if you want immediate action. You would not want to write to the plumber if you had water poured into your ceiling, for instance. It's also the obvious choice if you need a quick answer to a question such as 'When the next train in Oxford?' or 'Did I leave my wallet in your shop?' Many issues can be solved easier with decisions taken faster if you can discuss them with someone on the phone rather than wait for a response to a letter. Finally, some would disagree that phone is a nice way to keep in touch with friends and family. 3. Point against – one paragraph gives reasons against. These reasons must be supported by evidence and examples. (That will develop thesis) On the other hand, there may be a number of drawbacks to phones. In the first place, some issues are too complicated to explain on the phone, especially if they involve reality and face, and it may be clearer if you put them out of a letter. Second, it might be important to have a record of what you say, especially if it's a booking or a complaint. Last but not least, phones, especially the long distance, can be terribly expensive. 4. More support and follow a logical argument. The beautiful thing about receiving letters is that you can keep them and re-read them. Who wouldn't rather have a six-page letter full of news from a friend abroad spending a two-minute phone call on a bad line? 5. Conclusion – A short paragraph that declares your point of view (thesis) based on the reasons and evidence you gave them. To sum up, writing letters is far from dead, in my view. Each form has its advantages and fiduciary: The important thing to recognize is that is much more suitable for what you mean, and who. Another ESSAY DISCURSIVE: 'The future is Bright' the future is a mystery to everyone. Some would argue that the future is unclear because modern technology will soon be able to solve most problems in our society. Others think that modern technology will bring about the destruction of the world. If we consider the latest negative trends the environmental and social media in today's world it is impossible to be optimistic about the future. It may have been argued that modern technology has solved many of the world's problems, and may continue to do so in the future. We have made rapid progress, especially in the fields of medicine, communication and transport. [Scientists are now able to cure or prevent many of the diseases that are already affecting millions of people. For example, polio can be eliminated simply by vaccine. [As well as this there was an explosion in the area of information technology and communications. This also makes it easier to do business in any part of the world. [Along with the progress made in communication, transport has also been improving all over the world. Even in developing countries, many people now own private transport or are able to travel quickly and easily using public transport. Therefore, it is sometimes claimed that technology will provide humanity with the universal panacea of the future. However, modern technology brings a lot of fronting. [Consumption is a result of increased technology and industrialization. The effects of this can be seen in the destruction of the ozone layer as well as global heating. [Improvements in technology have increased the efficiency of firearms, especially weapons of mass destruction. [As a direct result of modern technology, certainly in the future new diseases will appear. [Although transport improves, it brings and it's the danger of air polishing and traffic congestion. [Overpopulation and hunger will increase in the future because natural resources are limited and without doubt the amount of fertile land will decrease gradually. In conclusion, it is clear that for most people in the world the future is not bright because humanity will destroy the environment of unstable development. Modern technologies may solve some problems but without careful planning the future looks weak. NOTE TOPICS typical discussion topics include statements where asked to agree or disagree with (e.g. There's too much violence on television.) and invitations to discuss aspects of a topic approach generally, the important thing is to consider the various aspects of the topic before providing a balanced input. Occasionally, you may be asked directly for a personal opinion (e.g. The best way to bring up but even here you would need to consider some different opinions so that you can compass them with your own. The structure of a discursive composition should be clear and logical. In the first paragraph, present the topic with your argument. In the next, contract with an aspect of the topic. Provide support proof of these paragraphs if necessary. And consider the opposite point of view. In the final paragraph, sum up your argument and provide a balanced personal input. USEFUL LANGUAGE TITLE It is usually a statement or a question. Example: The mobile phone has made a positive contribution to our lives today Friends have become more important than computer family relationships have greatly improved our lives today Is electric vehicles a replacement for those with fossil fuel? Is money the most important thing in life? INTRODUCING THE SUBJECT Many believe/feel that.../It is often claimed that.../We often hear that... The opinion of the people on... different widely. DEVELOP YOUR ARGUMENTS One of the main advantages of... is this ... In the first place,/Firstly,/To start with,/To begin with,/First of all. Second,/Second./In the second place,/Third./Finally,/Recently,/Last, but not least, ... Additionally, / Apart from that, / Moreover, At first sight... but in fact, Aparly (al parecer), / the reality is that, / As a matter of fact, For example ... For example... A case in point is... (unso que loca east) Clearly, / obviously, / obviously says, / As everyone knows, AFTER A LOGICAL ARGUMENT THEREFORE, / Consequending, / As a result, /So, /Like this, / For this reason, For one reason or another, / Up to one point, In general, / As a rule, / Over the whole, / In a way, / In a sense, / In some sense, (example In some sense I agree with you, but not entirely) in particular, / specifically, let alone (aún menos) / Not to mention (nor por decision). In other words... (lt otras palabras). In any case... (between kaso cualquier) These things are ... INTRODUCING MORE INFORMATION BOTH... and/not only... but also ... Furthermore, / additionally, / besides this, / What's more, / Moreover, / Besides, / similarly, If that's not enough, / To make matters worse, above all, / On top of all of these things, In these circumstances, / With regard to, / For this issue, (respect an astounded process) For... (lt que refiere a). Another advantage/disadvantage is additionally this ultimately, EXPRESSING AN OPPOSITE POINT IN VIEW although, / However, / At the same time, After all, / In spite of our + sentence/-ing/the fact that... Despite +noun sentence/-ing/fact that... In contrast, EXPRESS BALANCE some people... while others ... On one hand ... on the other hand... While it is true that .../that maybe so, but surely... On the positive side... On the negative side EXPRESS In my view, / In my opinion, / It seems to me that... / As I see it, / In my mind, I think / I feel that.../I can honestly say that... As far as I am concerned, / As far as I know, / For all I know, / To the best of my knowledge, It is my firm belief that I would dispute the claim that it is probably true to say that it is true to some extent that It cannot be denied that It would be wrong to argue that there can be that no doubt it is simply the case that it is difficult to accept the idea that that that other people think It is widely believed that it is generally agreed that no one would a dispute that that Few would contest (kan 'test/oppose) the fact that few people would dispute (the fact) that Some people feel that Others argue that there are those who argue that it has beened that it is often claimed that Opponents/ Supporters/ Proponents of the bullfighting. Recent surveys proved that Judgment by comments made by interviews with (students) revealed that REACHING CONCLUSION/SUMMING UP to conclusion, / To conclude, / To sum up, / On balance, All in, / Everything considered, Take Everything in consideration, there is some good argument for... On Balance: After considering all the information. E.g. On Balance, the company had a successful year. Related Links: Here More examples: Students, not the state, should pay university tuition fees. That twenty years ago, if you went to university in the UK, all of your tuition fees were being paid for by the government. Now, however, you have to pay for them yourself. There is now a lot of debate about which of these two situations is much better. What's more, there's no straight answer. In an ideal world, all education would be free, including educational weaning. But the fact is that we are not living in an ideal world and there is no unlimited supply of money. Besides that, the more money the government spends, the more it taxes its citizens, and the less money they have. On the other hand, it could be argued that in a modern democratic society, citizens have some basic rights. For example, many people would agree that universal free health care is a basic right: nobody should go without medical attention because they can't afford it. Similarly, a significant number of people also think university fees should be free of charge. After all, they keep, if health care is free, why shouldn't universities be free, too? In my own view, university economics fees would not be totally free. If they are, a lot of people will go to college just because they don't know what to do after high school. Obviously, this isn't the goal of going to college. At the same time, the brothers shouldn't be so expensive to put people out poor families from carrying on with their studies. Consequently, the best solution would be for the government to subsidessive brawl fees, but not to pay for them entirely. Is electric vehicles a replacement for fossil fuel? Electric cars are now being developed by many well-known automotive companies. Many people are still questioning whether electric cars are a possible replacement for petroleum and diesel-sprained cars. In this essuit, I will explore the views for and against the use of electric vehicles and the replacement of petroleum and diesel-fun cars. On one hand, electric cars are the friendly environment. Not only are they walking by renewable energy sources, but they are clean to run and keep on the road. To support this opinion, recent studies have shown that the use of electric vehicles helps minimize pollution in urban and rural areas. Clearly, electric cars are a way to attack ecological concerns and support a 'green environment'. On the other hand, electric cars are inconvenient to catch and discard. The driver of an electric car must recharge his car approximately every 100 miles. In addition, the plutonium battery of an electric car is toxic to the environment and be safe from expensive means. In short, scientists are still exploring ways to produce these kinds of machinery so that they are more easily manufactured, maintained and used safely. To sum up, it is obvious that there are both advantages and development of electric vehicles. Despite the cost of development and the inconvenience of recharging electric vehicles, I strongly believe that continuing with the research and production of these vehicles is well worth the investment and that we should remain supported for the use of electric vehicles and their development in the future. Is money the most important thing in life? Money is certainly something that is often discussed in today's world. Hardly a day goes by without the subject of money being raised in most people's lives. However, it is extremely debatable if it is more important than other considerations, such as health and happiness, which some consider to be of greater meaning. To begin with, it is often argued that there is money allowing people to exercise influence on others. Wealthy businesses, for example, are often the highly respected members of society, and business tycoons are often consulted by global leaders, who then make policies that affect the entire population. As a consequence, money can be seen as the single most important factor in our daily lives. Second, from the point of view of the person, money is vital to survival. Our society is structured in such a way that, without money, people are private of means of finding good nutrition and healthcare. Also, in some cases where state benefits inability to pay heating bills may in fact become a matter of life and death. This is clearly illustrated by the fact that, according to Social Services, the majority of deaths due to the hypothermia each onwards occur among low-income groups. On the other hand, many people claim that health health is of greater importance than money. Isaac Walton said health is a blessing this money can't buy. What's more, money is in consolation little to people suffering from health problems. Despite the fact that money can pay for better medical treatment and care available, this is no guarantee of a longer lifetime. Additionally, most people would agree that this personal happiness easily exceeds money importance. Even if a person is very wealthy, that doesn't necessarily lead to happiness. In some cases, the contrary is true and vast wealth brings with it a whole range of problems and insecurity. Genuine happiness can't be bought and don't usually have anything to do with financial status. On the whole, although there are people who would rank the single most important thing in life, the vast majority would agree. Money, they argued, has an important part to play but perhaps the world would be a more harmonious place to live in whether this remained in proportion and society to put more accents on moral issues. EXERCISE 1. Delete the correct alternative of each sentence. 1- He pays his own fees. For this reason / However / Consequences, he wants to complete his degree as much as possible.2- Jane's family has a lot of money. However/so/but they don't give it much.3- Everyone failed the exam. Obviously / Besides this / Obviously, it was too difficult.4- Health care is very expensive in united States. On the contrary / For this reason / Consequences, it's subscribing to ideas to have health insurance.5- He lives a long way in the university. In addition/Consequences/What's more, the area's public transport is very poor.6- is his studying mathematics at university. So/However/In contrast, he studied French. KEY 6 Thus Choosing one of these options: 1. They said that youth is the happiest time in one's life. Do you agree? 2. What do you think of the idea, expressed in some countries that women should pay a wage for the job they do in the home? 3. 'The most important quality of a partner is a sense of humour'. Do you agree? sure thing?
