Teclast 98 air 3g windows 10

Hi guys, as we know, Teclast release tablets with Windows 10 in Chinese and Android International (but with bloatware), which is why I decided to format and reinstall all OSs.. You can apply this guide to all Teclast dual boot discs with xML redivision file in the ROM package. This is how we can get the original Windows 10 installation in your language: 1) Install a custom Android ROM made by Mirek190 (thank you very much to your businessman) using Intel MFT by selecting the entire XML redivision (it erases all partitions and leave space not dedicated to install Win10): - Teclast x8 Air II and Flight 3G KitKat by Mirek19; - Teclast x98 Air II & Air 3G Lollipop by Mirek190; 2) With pc, download microsoft media creation tool and create Pendrive to boot; 3) change the tablet to 100% (it's not a joke); 4) using a USB HUB plug to the tablet: - USB Pendrive with Windows 10; - Mouse; 5) Switch on your tablet and press esc to enter bios, go to the last tab and select pendrive as boot bypass; 6) Windows 10 will start installing in your local language; 7) When asked, select expert mode and install Windows 10 unallocated space by creating a basic section; 8) Well, you will start installing Windows 10 in your local language; 7) When asked, select expert mode and install Windows 10 unallocated space by creating a basic section; 8) Well, you will start installing Windows 10 in your local language; 7) When asked, select expert mode and install Windows 10 unallocated space by creating a basic section; 8) Well, you will start installing Windows 10 in your local language; 7) When asked Installation will take some minutes. In the end, you need to download drivers and install all the files *.inf available on double zip backup driver you can find here: - Driver pack by Maxximo88 Made a video (Italian language) about this procedure, it is a low quality video guys: click THANKS and have a nice day! Last edit: March 28, 2016 Teclast has been posted on Weibo today, that the X98 Air 3G can be updated to the official Windows 10 release today. (I updated mine now to test it out) according to Teclast, it works fine, only one problem with an unknown device in the device manager. But the X98 Air 3G C5JX 10 drivers pack to fix this: X98 Air 3G C5J6 Windows 10 Drivers Package (July 29, 2015) 111 MiB14252 other models such as Air Two to follow. This driver update here may work on other models if you are experiencing any unknown devices. Edit: Now running Windows 10 on my 3G Air X98, I had no driver problems or hardware management unknown hardware management. You can go directly to Windows 10 or by referring to the browser here: on your tablet you want to upgrade. Upgrade your X98 Air 3G? Please join us in the X98 Air 3G/Air II Windows 10 upgrade thread for more. Source: Weibo/Teclast Forums (Chinese) VANKYO MatrixPad S30 10 inch Octa-Core tablet, Android 9.0 Pie, 3GB RAM, 32GB ROM, 13MP rear camera, 1920x1200 IPS full HD display, Bluetooth 5.0, 5G Wi-Fi, type-C, screen glass, housing metal notice:This Android/Windows device is designed to operate specifically with android/Windows operating system installed. Any Such upgrades, modding with custom ROM, rooting or flashing an Android device with other firmware automatically causes device experience issues as well as void warranty for the device. Please think twice before running all these actions.9.7 inch Teclast X98 Air Win10 + Android 5.0 3G Phablet Intel Z3736F Quad-Core 2.16GHZ QXGA IPSS Retina Screen 2GB RAM 64GB ROM WI OTG OTG FUNCTIONS GPSMAIN FEATURES: CPU: INTEL Z3736F QUAD CORE 2.16GHz HAS BETTER PERFORMANCE, SIXTY PERCENT REDUCED POWER CONSUMPTION AND ALMOST HALF THE PACK AREAS OF THE 32-BIT PROCESSOR, PROVIDING A LOT OF ENERGY FOR MULTITASKING AND FEEDING GAMES AND CASUAL MOVIES. OTG function: can connect with keyboard, mouse, monitor and so on. GPS function: Free you from being lost on the street and the world is your oyster with screen.9.7 inch location: 2048 x 1536 QXGA IPS screen offers good experiences for watching videos and browsing the web. Android 5.0 + Win10 System: Dual operating system with more excellent interface, compatibility and operating effect. HDMI Output: You can use an HDMI cable to connect your tablet to take out your tablet screen on tv, screens or projectors, and create a personal home theater battery.8500mAh: Relying on intel OS operating system management system, Teclast X98 Air can manage current, power, temperature and dynamically increase performance. Dual cameras: A 5.0 MP rear camera with autofocus that makes high-resolution video recording and video calls clearer and more dynamic. You will be surprised at the 2.0MP front camera of the Cellovi. Notice: IPS is a screen material, retina is a technical display designed, portable and convenient to touch. Note: This phone will only work with GSM + WCDMA networks: GSM 850/900/1800/1900MHz WCDMA 2100MHz unlocked for worldwide use. Please make sure that your local network is compatible. Click here for your country's frequency network. Please check with the carrier/provider before purchasing the item. Product Notes:1. Download your favorite apps through the Google Play Store or The Installed Market.2 Note: This Android/Windows tablet is designed only to work with the current Android/Windows operating system installed in it. Any modifications such as upgrades or flashing newer version will void warranty.3. The rom amount provided for the ROM shows the maximum available with nothing installed. However, the Android/Windows operating system and pre-installed software from the manufacturer will occupy some of this ROM. ROM on the device so it will be a little less than the ROM listed. Yes (0) Color: SILVER+EU PLUG tablet comes with the original box that contains the tablet and an envelope with the charge description. A thick and very durable cardboard box, inside there is padded foam to prevent disk movement, mailto Europe we put 9giorni, inside the box I would say I find tablet, charger and Europe otg cable version, good quality accessories. The Teclast X98 3G Air has a screen in 4:3 screen with resolution 2048 × 1536 pixels, the brightness adjustment is not automatic, because it lacks a light sensor, the retina display is exceptional, multi-touch and 10-point touch, our little sensitivity 'capture the habit.' The 5 megapixel rear camera captures the images with sufficient accuracy of 2560 × 1920 pixels has no flash images in low light and then slightly lost, settings that are in the camera application are very limited but you can install third-party applications to expand the additional features, you can choose some scenarios, set the white balance automatically or manually set, make a digital zoom, take panoramic images, set the resolution of the images and a little more. You can shoot video in hd resolution of 1280 × 720pixels, Wi-Fi, Bluetooth great. Battery consumption: On Windows with average usage 5-6 hours, with average use of Android 6.7 (Android is lighter, if the main use is to see videos or surf the internet is recommended to use Android) the program supplier is the standard version of Windows 32bit home, you can use all Microsoft software and third parties without problems. (operating system is alr suggestion pros: high quality materials, excellent internal devices, suitable for both the normal user and especially is the user's cons. : I did not find specific flaws, but some software errors definitely solved with some future update October 19,2015 Swiss army knife of tablets I am very happy with the equipment. Using Android is an intuitive thing in Windows sometimes harder to hit your finger with small options, but it's not bad. Less standard resolutions in games of course are not scaled correctly to full screen, but this charm intel HD graphics ... In the use of available 3G has no problem, just buy yourself a suitable package or internet on the card, we have access to the network from anywhere with cellular coverage. GPS will soon find out in the field, but in the shade, because the shiny screen reflects everything mercilessly. Teclast X98 Air 3G is also neat, relatively light (although I admit, it may be a lighter boy), and not the screen is already called retina. All the lines are beautifully smooth. If we cling to the power of it under the surface of the screen floating spots appear if a lot of it presses, and in terms of a specific grid can seen from reading a touch. In addition, it is wonderful to suggest not January 20,2016 yes (0) color: silver + EU PLUG Врини. Поэтому сравнивать не с чем. Но я от него в восторге! Стильный, алюминиевый корпус, тонкий. Экран - просто бомба! в лууууразгляд - тончайшай а толщину а Минимальная яркость комфортна для полной темноты. 2 системы - это то, ради чего брал. The government has also been able to make a series of developments in the country, including the development of a new system of government and a new government. Он заряд экономно расходует. С обновлениями и русским языком никаких проблем. И продавец отличный, пришло всё, как и обещано. The proposal of The Netherlands, which is the first to be adopted by the United States, is to make a state of disrething the right to a state of war. December 19, 2015 Yes (0) Color: Silver + EU PLUG ++ Windows 10 and Android. Very happy item. Battery quality is very good! The tablet screen is very very good. Dualboot system is a good dam. Android was 4.4 but the update that 5.0 has its very large windows then it is very smooth! Oct 17,2015 a very nice tablet that runs android and came with Windows 8. You are able to update your tablet to Windows 10 with the free upgrade offered by Microsoft. The quality of the device is very good, it seems to have the same specs as the iPad from the sharp screen. Windows works very well on 2GB of memory and the file storage space is divided with an Android image. Compatible with Google Play. The suggestion most of the applications that came installed were in Chinese. I was able to change the language on a tablet to English but some applications did not change their language. I had no problems with installing apps from Google Play that correspond to the Android version installed. I wasn't able to update the version of Android though, as I think one of the Chinese software uses for this purpose. I need instructions on how to update Android to the latest version as there are some apps that no longer work - such as Netflix. Jun 12,2018 in 5 aspects, we'll tell you how to choose a suitable tablet: To choose a suitable tablet? 1. It may be because the battery is empty, we advise you to charge it with the original charger more than 10 minutes; Press the power button for 30 seconds to force it to boot; For the Android operating system there may be a problem with the software, so you need to press the power button and size + simultaneously to reset the factory. For windows operating system, you must flash. In the usual dual system tablet, there is an Android logo on board the mission, located at the bottom of the Windows interface. You can easily switch from Android to Windows by clicking on the logo. If you're using Android, just scroll down the screen from the top right side, you'll see a code to change to Windows. Click on it to switch OS. 1. You need to check whether the keyboard is compatible with your tablet; Make sure the cable is connected to the docking slot correctly; You need to restart your tablet after connecting it to the keyboard. Now all systems are active, so there is no need to request the activation code. Your device can be used immediately after it's connected to a WiFi network. This may be caused by viruses, please try again after scanning and removing viruses by some antivirus software. It may be because it has not been turned off after checking and running out of power during charging. Press the power button for 30 seconds to turn it on after connecting it to the charger. If it does not work, please try to change the USB cable and charger. If all the above instructions do not work and the tablet will still not charge properly, it may be a problem of software in your equipment and you need to flash it. If you want an SD card to be read on Windows10, you first need to remove your SD card, switch to Windows10, turn off the device and then restart. Please charge your new device for at least 10 minutes or more before first use, this ensures normal operation and optimal operation. For devices with removable batteries, make sure they are installed correctly before charging. If systems can't read the TF card, it may be because the tablet recognizes only some specific types of TF card. If only Android can read Windows can not, there should be a problem in BIOS and need to flash BIOS.
