Find elphenor in the odyssey

One of AC Odyssey's story missions is looking for a man named Elphenor. He escapes after you go face to face him and you need to find him in the countryside. Find out where to find The Elfenter in Assassin's Creed Odyssey. After Elpendor escapes, the snake from grass guide Assassin's Creed Odyssey must track him down to the Valley of the Serpents. As the old man said, watch out for snakes. In this area, you can find a place called the Snake Temple. You can find it on the map. This place is guarded by about 10 fanatics and must be taken out first. If you don't they will just interfere in the fight against Elfenoor. When they are all dead, they find the entrance to the ramp entrance cave near the rear end of the large snake skeleton. Elphenor is inside and you have to get him down. You may be able to sneak up on him, but I'm just in a hurry so I don't know for sure. Use what you have and bring him down. When he is down you talk to him one last time and the quest is completed. Phoinis, Greek worship of Kyra's Cosmos Elfenor (death 431 BCE) and was a member of cosmos's cult of cosmos leading up to the Peloponnesian War. And this gave him many opportunities to serve the sages of his chosen branch. When The war between Athens and Sparta became apparent, and Elphenor was already supplying weapons to both sides. [1] When the sect determined that it was most important to find members of Leonidas I of spartan lineage, Elphenor sent a whistleblower to find Meerin and Cassandra. Cretos and Antonide succeeded in finding Cassandra on the island of Kevalonia. [2] I deal with Cassandra and usually someone else can do field work. I don't think you know how to get this stain out. —When Elphenor met Cassandra, 431 BC. [src]-[m] Elfenoor proposed a contract with Cassandra, who had found Cassandra's location, and Elphenor traveled to the island and docked in Sami, seeking refuge in an abandoned house in 431 BC. Elphenor, who witnessed Cassandra slaughter the men herself, introduced herself not before the massacre of the last man under her employment. Then, with the help of Sparta Mistios Cassandra, Elphenor retrieved Penelope's precious schraud, which had been stolen by a raider. He instructed her to go to Odysseus Palace in Ithaca to begin the search. [3] When Cassandra successfully carried out this mission, Elfenoor suggested that she be kept as a reward. [4] Elphenor soon suggested a new mission to Cassandra: it was her father, Nikolaos, who hunted down and removed the Spartan general, known to Cassandra as the Unknown Wolf. [5] Audios later met Elphenor at his residence in Phokis and presented him with Nikolaos's helmet, after which he revealed that he knew all about Cassandra's relationship with the wolf. After confirming that Cassandra's mother, Meerin, was alive, the cult tried to misunderstand her to assassinate her, but Cassandra was furious and forced her to summon a security guard to play Otios while he fled. [2] Cassandra later learned of Elphenor's allegiance to cosmos worship at the Oracle of Delphi and decided to track him down. [6] Elphenor then devised a trap by placing bait in the Fort Parsalos in the Nymph Valley, but Cassandra killed the bait and found a letter revealing Elphenor's hiding place. [7] Death I am the reason you left the island alive. The cult wanted you to die. —Before Elpendor's death, Cassandra, the death of 431 BCE[src]-[m] Elfenor, at the behest of Elpenor, killed the so-called lion of the gods and met him in a cave near the remains of a snake near the valley of the serpent. When confronted with Mitios once again, Elfenor acknowledges that Meerin is the cult's only concern, and given that he already has Deimos, Cassandra may also be dead. He fought Cassandra but ended up lost and fatally injured. Elphenor exhaled dying and declared that Cassandra had made the mistake of killing him, and countered that it was her mistake to trust him in the first time. He retorted by telling her he was the only reason. Kefalonia survived, given that the cult wanted her death and that his actions had saved her so far. When she tried to interrogate him about the cult and their location, Elfenter laughed before it expired. [7] Cassandra found one eye in Elphenor, a symbol of curious shards and capes. Cassandra also found a gown and a white mask marked red. Everything she took believed they would come in handy. [7] [8] The simulation Elphenor and Cassandra were reunited in a simulation created by Isu Aleteia, a resident of hades-dominated underworlds. Elfenoor worked for him several times and helped fight the inmates of Tataros who tried to escape. On one occasion, Elphenor was deployed to remove large numbers of prisoners from Hades Palace. There he met Cassandra, who found her way to Tataro and was helping Hades with the inmates. Elphenor and Cassandra interrogated the escaped prisoner of Tataros at the location of the monger, and he revealed his location in the lost temple of Nix. Cassandra needed help obtaining fallen armor, but the fallen gauntlet was reportedly lost. Elphenor was overjoyed not to help her and instructed her to meet him at Kronos's Treasury. [9] Cassandra and Elfenor met him at the Treasury Department and searched for the legendary gauntlet. Elphenor was able to find them thanks to his knowledge of the underground Cassandra. [10] After Cassandra retrieved the remaining pieces of armor, Elfenor said it was time to return the monger to Tartá. Two former enemies I met at the Lost Temple of Nix launched an attack and defeated Monger. But even after that, Cassandra still had mixed feelings about allying with Elphenor, and although she forgave him and fled, she ran into him. [11] The legacy and influence of Elphenor's death, which had lost his life, was later discovered by Deimos, who beheaded Elphenor and brought his head to sectarian gatherings as evidence of his death, and leonidas' grandchildren became aware of each other's existence. [12] A short time later, Cassandra met a politician who claimed to be Elphenor's brother. The politician feared he would lose the position he gained when the militants targeted him, saying that Elphenor, a kind and wealthy man, had been able to participate in politics and even protected him. Unaware of Cassandra's role in Elphenor's death, the man hired Cassandra to deal with bandits. [13] Quizzed in Greek mythology, Elphenor is the name of one of Odysseus's comrades in Homer's Odyssey. While in Aiaea, Elfenoor was drunk and spent the night on the roof, and died when he collapsed in the morning. So when Elphenor tried to kill him on the pilgrim's landing, he finally brushed off his skin and revealed his character as a deadly and deadly person. Elphenor is a very important NPC for the start of assassin's creed odyssey's main story. Introduce us to the magnificent plans in the ancient Greek world of AC Odyssey, a mysterious stranger you meet in a Chapter 1 operation that kills the Wolf of Sparta in Megaris. After completing that assignment, he was instructed to meet him in a new area of The Forkis. The main story is a little more eling and I find myself on a new major quest called Snake on the Grass with a single quest step – find Elfenor. In Guide or Explorer mode, there were no quest markers and I had a chain. I do side quests and check out various POI from Pokies, but I still can't find Elphenor. If you're as perplexed as me this is a quick article that helps you find Elphenor in Porquies and understand what you need to do to progress a little further to the main story where does Porkis el-Fénor? Elphenor hides in one of The Porquis' points of interest. His location will be revealed when you complete Porkies' other main story quests, which include The Oracle of Delphi called Ghost Consulting. There is a way around if you are really patient. You can go to your own position without completing ghost consulting, but I advise against it. It's more fun to follow the quest line properly, and you'll get more XP by organizing the relevant locations. Anyway, he is found inside the Snake Temple POI. You reach satir break sync to go to a fast travel location. From there, a little northeast down the mountain, you have to see the Snake Temple. If you haven't found this synchrony point, head east of the pilgrim's landing point and you'll be following the river. It should be a few meters south of the river after about 5 minutes of horseback riding. He is hidden inside a cave in a snake temple. If you kill him you still need to complete consulting ghost quests to proceed with more key stories. When you arrive at the Snake Temple, look for the entrance to the cave. Elfenter location map
