Reliance Big Entertainment Android 4.1 + Version: \$1.84.35 0 Real Steel (MOD, Unlocked) - an action game based on the plot of a popular blockbuster called Real Steel. According to history, events are developing in the distant future, in a world in which all cruel sports are banned and the battle in the arenas of multi-ton mechanized robots has come to the fore. And so, you have to take under your control a team of metal fighters and try to climb to the top of the rankings. Real Steel mod apk has excellent 3D graphics, realistic physics and tremendous opportunities for the development of the entire team as well as each skin individually. Updated to version 1.84.35! The story takes place in the not-too-distant future when the human race among boxers has been replaced by a race between robotic boxers in Armored Iron Fist. Charlie Jackman plays Charlie as a boxer who can only make a living digging robotic boxers. One day, an 11-year-old boy named Max came home. He was the son Charlie never met and had to join Charlie because his mother passed away. Charlie who lived alone had to face the reality of taking care of Max. Both had a major change in their lives and a number of contradictions followed. Occasionally, he discovers an old boxing robot abandoned in the junkyard and waits long for Charlie to train the robot to be a good boxer. At first, Charlie simply could not discern this robot until he found the robot as unusual, as well as himself, with a certain tenacity to bow to fate. Then, with Charlie's careful tune, the robot, formerly a sparring robot, started off the court with the chance to challenge the powerful robot boxing champion. Charlie, Myers and the fate of the robot have been on for a long time, and now they have to do is come together to try, a battle steel ring! -APKAward.com As a movie game of the same name, Real Steel has a variety of robots in the film to choose from, each with its own basic skills. As in american boxing, it's the most basic operation you're squeezing my fist. I don't want to fantasize about the performance of the Kung Fu Fighting Game! The game basically no tricks, defense, attack plus special attack button! The operational interface of the game with the control of virtual buttons! The steering button is basically used only to move, although according to the next attack, you can play different angles of attack, but you do not look carefully, ignore it! Simple left and right handle is basically the speed and the attack distance is different, defense – this it's nothing to say! Real Steel Beyond the click of boxing, the most useful attack is the batsman and and Attack! Batter is very simple, since the first punch to each other (without defensive status), you continue to point it, the robot will be very happy to play continuous attacks. As for sp, a little I do not know the design of the called, when the SP button is clicked, just hit the hook. To really resort to nirvana, you must press the SP immediately after the first opponent of boxing, which will unleash the seemingly gorgeous nirvana. When the opponent is hit, you turn off, using the sp attack can finally divide the opponent into pieces. Let you finally cool down! The game is equipped with an improved system, the basic skill of each robot is divided into ARMOR, POWER and SPEED into three parts, while in Tournament (championship) mode, each person's beat can get a point To strengthen the skill, but to be honest, the enhanced feel almost does not exist as an action fighting game , attack time, demolition blows, etc. These elements don't need you to consider, just make a good defense, and then point around the boxing bout, come to the SP on OK! But note that there are two meters above the game screen. The top is blood, while blood is below the energy scale. Each punch will be It consumes a little energy, although it responds over time, but if the energy is less than the red part, the robot will not be able to move . You can't act or defensively, which is completely in the manic cut so no matter how, it's best not to leave the energy below the red part. Although Real Steel is a fighting game, it's not as complicated as the King of Fighters. More tests are the reaction of players and the use of combined blows. However, even the best combination of boxing also can not compensate for the strength of the gap, a variety of ability to update and needs a lot of game currency, easy for people to go internally without return, so that for the purchase fee is really a very headache the place. If you put aside that point, the game still has many people admire the place, for example, its impressive image and passion of sound can always evoke the enthusiasm of the fight, the freedom of the robot to create can also be good to attract movie fans, the operation of the game seems very smooth, as the friends of the fighting game will play very easily Oh!
